#### Bandwidth

#### Network Transfer [of data] rate

#### What is bandwidth? - Definition from WhatIs.com

searchenterprisewan.techtarget.com/.../bandwidth - TechTarget -

by Margaret Rouse

 In computer networks, bandwidth is often used as a synonym for data transfer rate - the amount of data that can be carried from one point to another in a given ...

#### Bandwidth - Network Bandwidth - Networking - About.com

compnetworking.about.com/.../bldef\_bandwidth.htm - About.com by Bradley Mitchell

Definition: **Bandwidth** in computer networking refers to the data rate supported by a network connection or interface. One most commonly expresses **bandwidth** ...

#### Bandwidth Definition - PC Support - About.com

pcsupport.about.com > ... > Glossary / Terms About.com by Tim Fisher - in 7,638 Google+ circles Bandwidth refers to the amount of information that something can handle in a given time.

#### Check Speed with Speed Test [Ookla]

Check How Much Data Transfer with Your Internet Service Provider vs. How Fast does data travel to you.

### My Internet Usage

Our usage measuring and reporting system is designed to update the information reported on this page every 24 hours. Typically, those updates will be processed and posted to this page each day by or before 8:00 a.m. Central Time, reflecting usage through approximately 11:59 p.m. local time of the prior day. In those cases where a new update to this page shows no incremental usage in the 24 hours since the last update, one of two conditions apply: either (a) there was no incremental usage in that time period; or (b) the transmission of daily usage (from our counter to this page) was delivered too late to be deemed useful to the customer and was thus not counted and not applied to the customer's usage total.

# How Much Usage for a Movie?

Your plan

may

provide less

usage!

#### Applies To: Internet Explorer | Internet Explorer 9 | Windows 7 Question Had this guestion Me Too JOHNBOSSERT asked on September 21, 2011 how much bandwidth does a 2 hour movie use? I have just watched a movie on netflix andwould like to know what prportion of my allowable blandwith I have used? Reply with quote | Report abuse - Subscribe to Updates Reply | Answer Found this helpful Me Too Azam K rep. ed on September 22, 2011 -Microsoft Hi. An hour and a half move usually is about 700MB and a two hour movie about 1.8 GB if you want HD movies then it is about 3 GB for two hours, this is what Netflix says. Hope the information helps.

# Adding a Suddenlink Account to Mail

#### IMAP Configuration for Email

Technical Operations Job Aid/Training Revision Date: 7/17/13 Effective Date: IMMEDIATELY

Customers may choose how their email accounts are configured whether they are set as Post Office Protocol (POP/POP3) or Internet Message Access Protocol (IMAP) accounts. In most cases, the BBT provides the information to the customer so that the customer can configure his own email account. Traditionally email accounts have been setup as POP/POP3 accounts.

With the increase in mobile devices used by our customers and the demand to check email from multiple devices from the same email server, it is recommended that email accounts be set up as Internet Message Access Protocol (IMAP) accounts. IMAP allows customers to access their emails and folders through an email client as well as webmail.

Benefit of IMAP is that the mail clients synchronize with each other allowing customers to make changes in one email client and seeing the changes on all o email clients.

When setting up a client email account, the information listed below should be used:

- Account Type: IMAP
- Incoming Mail Server: IMAP.Suddenlink.net Port 143
- Outgoing Mail Server: SMTP.Suddenlink.net Port 25

This must be setup up on each device to synchronize with the mail server.
