# Airplane Mode

Fastest way to charge a battery!

## iOS: Understanding airplane mode

Languages English

Airplane mode disables the wireless features of your iPhone, iPad, or iPod touch to comply with airline regulations.

When you enable airplane mode from the Settings screen, an airplane icon (  ) appears in the status bar at the top of the screen and the following wireless connections and services are turned off:

- Cellular (voice and data)
- Wi-Fi
- Bluetooth
- GPS
- Location services

If allowed by the aircraft operator and applicable laws and regulations, you can re-enable Wi-Fi and Bluetooth while in airplane mode:

- **Wi-Fi:** While airplane mode is on, tap **Settings** > **Wi-Fi**, then turn Wi-Fi on and choose a Wi-Fi network.
- **Bluetooth:** While airplane mode is on, tap **Settings** > **Bluetooth**, then turn Bluetooth on.

For additional information on airplane mode, see the [User Guide](#) for your iOS device. Not all wireless features are available on all iOS devices.
