Need an iPhone?

Turn Off Ringer

Want to Share as much as Can With YOU

We are all at different levels of understanding!

Old vs. New

Some have asked:

A. When will I start at the beginning for new users?

B. You're not doing the same presentation "again?"

No one is going to give you \$490 M You identity can be stolen Know your passwords Take pictures of your things.

Don't let anyone have access to your computer. Be suspicious of a foreign accent. If it is too good to be true.... Don't hesitate to hangup or pull the plug. Think, think, think before acting. What is your "gut" level telling you. Keep your software up to date.

DealDash / Quibids...or others "I bought this \$2000 Apple computer for just \$25.

6 Plus / 6 / 5 The iPhone 6 Plus is for Seniors

The iPhone is Cheap!

There are two costs: Buying & Using

To Buy: \$500 for 2 yrs [730 days] = 68 Cents per day.

Where else can one purchase a camera, phone, maps, computer that I can carry in my pocket.

"Fee" That should be paying Apple to let me use it!

What If Something Does Not Work on my iPhone or iPad?

Check settings.

Go to Multitasking and close the app.

Use the Sleep/Wake button and turn off device.

Do a Hard Reset by holding Sleep/Wake and Home Button until Apple Logo appears.

or

Handoff is new to iPhone 6

To enable Handoff, there's a process in Settings to make sure it works.

- **1.** On the iPhone 6, in Settings tap on FaceTime.
- 2. Toggle FaceTime off and on, leaving it on.
- 3. Toggle iPhone Cellular Calls off and on, also leaving it on.
- 4. Go back to General settings and tap "Handoff & Suggested Apps".
- 5. Toggle Handoff off and on, leaving it on.
- 6. Reboot the iPhone.
- 7. Repeat for every iPad you wish to use with Handoff.

To use Handoff, make sure both devices are on the same Wi-Fi network (LTE doesn't work).

They should both be logged into the same Apple ID, too.
