The screenshot shows the homepage of the website "Tom Miller-Mac Help". The site has a clean, white layout with a blue header. The main content area features a grid of images related to Apple products, including iPhones and iPads. On the right side, there are sections for "RECENT POSTS" and "ARCHIVES". A pink arrow points to a search bar in the "RECENT POSTS" section.

Apple Stores Your Siri Info

<http://www.wired.com/2013/04/siri-two-years/>

ROBERT MCMILLAN BUSINESS 04.19.13 6:30 AM

APPLE FINALLY REVEALS HOW LONG SIRI KEEPS YOUR DATA

According to Apple's Muller, the company takes steps to ensure that the data is anonymized and only collects the Siri voice clips in order to improve Siri itself. "Our customers' privacy is very important to us," she says.

Here's what happens. Whenever you speak into Apple's voice activated personal digital assistant, it ships it off to Apple's data farm for analysis. Apple generates a random numbers to represent the user and it associates the voice files with that number. This number — not your Apple user ID or email address — represents you as far as Siri's back-end voice analysis system is concerned.

Also, even if the Siri data is not linked directly to users, people should be careful about what they say to their personal digital assistant. Transcripts "of what you say to Siri could reveal sensitive things about you, your family, or business," she added. "Siri works for Apple, so make a note to yourself to really think before you speak."

Industrial Revolution vs Digital Revolution

“Learning iPhone & iPad” Observations!

1. People who learn are people who want to learn!
2. It is hard to comprehend from a book. “Dummies”
3. It is difficult to watch a video.
4. If you are new to iPhone or iPad....it is not easy to switch.
5. There is no progress without a struggle.*

*

This is probably the most famous quote by abolitionist orator **Frederick Douglass**: "If there is no struggle there is no progress. Those who profess to favor freedom and yet depreciate agitation...want crops without plowing up the ground, they want rain without thunder and lightening.

Frederick Douglass, Canandaigua, New York

Camera Auto Lock, Focus Lock, Exposure +/-

Autofocus & Auto Exposure

The screenshot shows the top portion of a mobile website. On the left is the 'iPhone Life MAGAZINE' logo. To its right are two small image thumbnails: one of Lee Kuan Yew and another with the CNN logo and the text 'Unknown group threatens tro online'. Below these is a navigation bar with links for HOME, NEWS, ACCESSORIES, APPS, TIPS & TRICKS, INSIDER, and SUBSCRIBE. The main article title is 'Tip of the Day: Why and How to Use Autofocus and Auto Exposure Lock on Your iPhone Camera'. Below the title, the author 'Sarah Kingsbury' and date '7.17.14' are listed. To the right of the author information are four social media sharing buttons: Tweet (23), Email (0), Share (14), and Share This (107).

When you capture an image with your iPhone, the camera's autofocus and auto exposure features will automatically determine the best focus position for you and the best exposure for that area of focus. (Exposure determines how light or dark your image will be.) Alternatively, you can manually designate a different area of focus (and adjust the exposure of the image) by tapping on the area you prefer on your iPhone's screen. The iPhone's camera AE/AF Lock feature allows you to lock the focus and exposure settings you've selected so you don't have to reset them between each shot.

Using AE/AF Lock will help prevent blurry shots and keep the focus on one part of the image without requiring you to refocus between each shot. The feature is also great for taking panoramic photos (since consistency of exposure as you move the camera is important), for taking shots with difficult lighting, and for when you want to adjust the exposure for artistic reasons.

To set AE/AF Lock, all you have to do is touch and hold your preferred area of focus until the focus square flashes. The AE/AF Lock icon will then appear at the top of your screen:

Copy a Document, Send a Document via eMail or Message!
