tommillermachelp.com

The screenshot shows the homepage of the website "Tom Miller-Mac Help". The site has a clean, white layout with a blue header. The main content area features a "Home" section with four images: an iPhone and iPad, a sunset over water, a close-up of an iPhone, and a Mac OS desktop. On the right side, there are two search bars, each with a "Search" button. A pink arrow points to the second search bar. Below the search bars are sections for "RECENT POSTS" and "ARCHIVES".

Disk Not Ejected Properly

Should I Be Worried?

Can I “Yank” My iPhone or iPad Out Of My Computer?

Two modes:

1. Disconnect when syncing and
2. Disconnect when not syncing.

iTunes interface has changed, then how do I eject?

Be careful with devices connected to other devices!

A small static electrical spark can destroy a

iTunes and My Computer and my iPad and iPhone

The screenshot displays the iTunes application window. At the top, the title bar includes the Apple logo, a menu icon, the user name 'Tom', and a search field labeled 'Search Playlist'. Below the title bar, a navigation bar shows icons for Music, Library, Radio, and a selected iPhone icon. The main content area is titled 'Tom Miller' and shows the 'iPhone 6 Plus' settings. A pink arrow points from the battery level indicator (94%) in the top-left corner of the device summary to the 'Backups' section below. The 'Backups' section is divided into two columns: 'Automatically Back Up' and 'Manually Back Up and Restore'. The 'Automatically Back Up' column has three radio button options: 'iCloud' (selected), 'This computer', and 'Encrypt iPhone backup'. The 'Manually Back Up and Restore' column contains a description and two buttons: 'Back Up Now' and 'Restore Backup...'. Below these sections, a 'Latest Backups:' list shows two entries: 'Today 2:55 AM to iCloud' and '10/12/14, 9:24 PM to this computer'. At the bottom of the window, a storage bar shows 'Audio' (orange), 'Apps' (green), and 'Other' (yellow) categories, with a total of '70.12 GB Free' and a 'Sync' button on the right.

Manually Back Up and Restore
Manually back up your iPhone to this computer or restore a backup stored on this computer.

Back Up Now Restore Backup...

Latest Backups:
Today 2:55 AM to iCloud
10/12/14, 9:24 PM to this computer

Audio Apps Other
70.12 GB Free Sync

What Does All This Mean?

The screenshot displays the iTunes interface for an iPhone 6 Plus. The left sidebar shows the 'Settings' menu with 'Summary' selected. The main area shows the following information:

- iPhone 6 Plus**
- Capacity: 113.92 GB
- Phone Number: +1 (325) 518-6662
- Serial Number: F2LNG2YSG5QP
- iOS 8.2
- Buttons: Check for Update, Restore iPhone...

The 'Backups' section is also visible:

- Automatically Back Up**
- iCloud: Back up the most important data on your iPhone to iCloud. (Marked with a red star)
- This computer: A full backup of your iPhone will be stored on this computer. (Marked with a red star)
- Encrypt iPhone backup: This will allow account passwords and Health data to be backed up. (Marked with a red star)
- Buttons: Change Password...

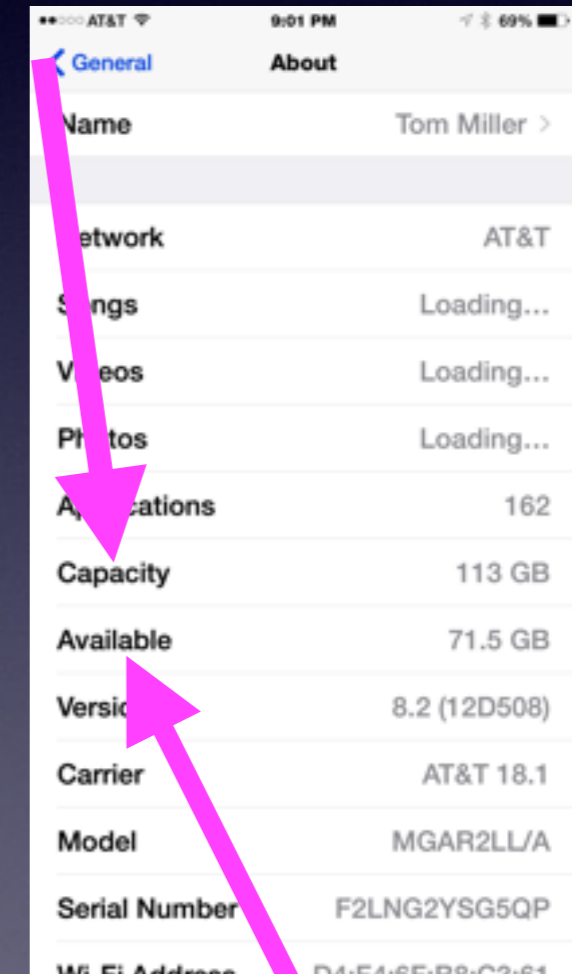

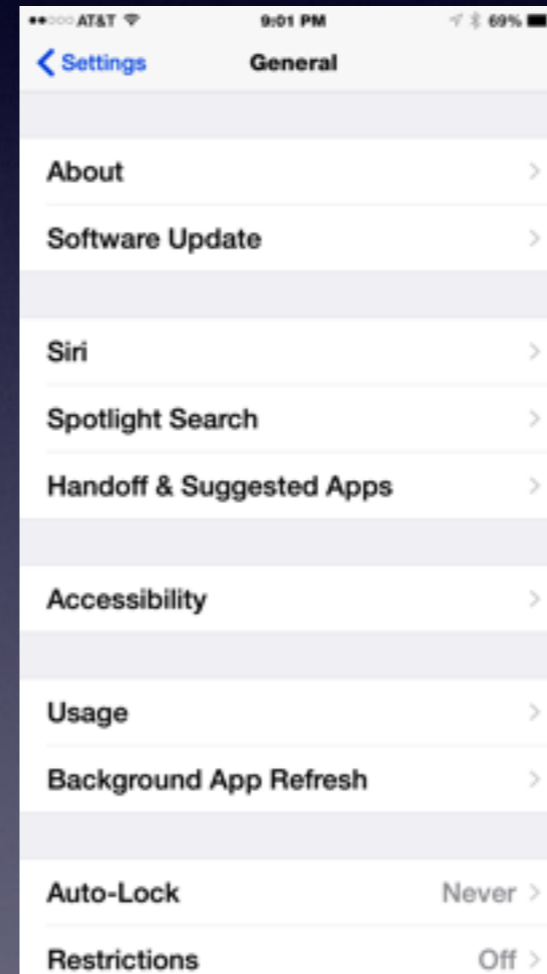

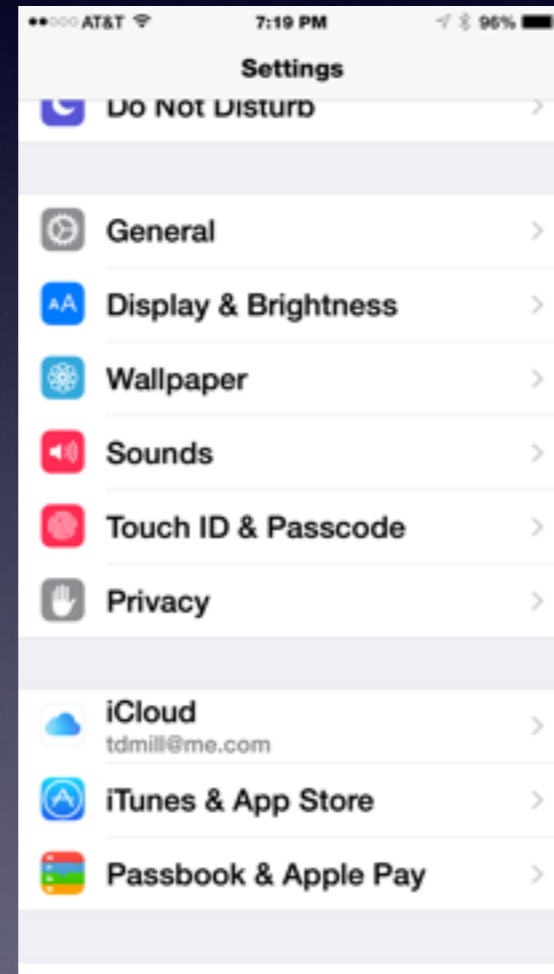

The 'Manually Back Up and Restore' section includes:

- Buttons: Back Up Now, Restore Backup...
- Latest Backups:**
 - Today 2:55 AM to iCloud
 - 10/12/14, 9:24 PM to this computer

At the bottom, a storage bar shows '70.12 GB Free' and a 'Sync' button.

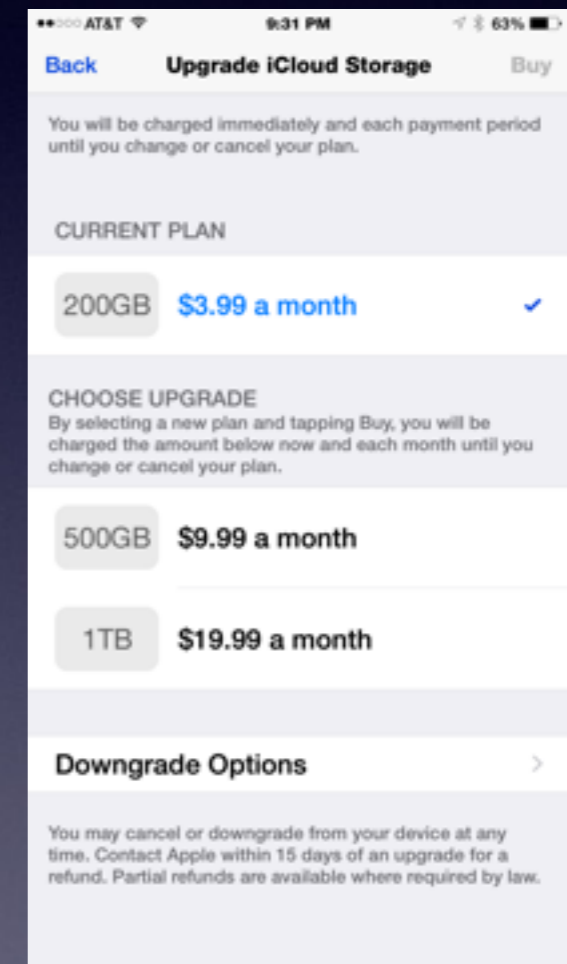

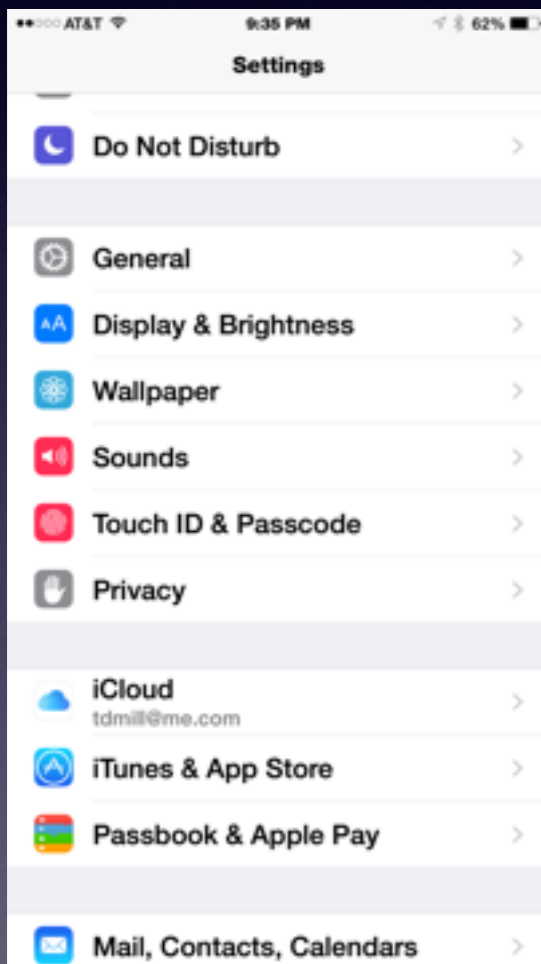

128 GB - 14 GB for IOS - 70 GB free = 44 GBs to backup!

How Much Data Is On My iPhone?

Data Storage Is Cheap!

If you lost your phone...what would you loose?

iPhone 6 and 6 Plus

They come in three sizes!

<http://www.apple.com/iphone/compare/>

The image shows four iPhone models side-by-side: iPhone 6 Plus (largest), iPhone 6 (medium), iPhone 5s (small), and iPhone 5c (smallest). Each model has color swatches below it. The iPhone 6 Plus, 6, and 5s have three swatches (Silver, Gold, Space Gray). The iPhone 5c has five swatches (Yellow, Blue, Red, Green, White). Below the phones is a table titled 'Capacity and Price'.

iPhone 6 Plus		iPhone 6		iPhone 5s		iPhone 5c	
16GB	\$299	16GB	\$199	16GB	\$99	8GB	Free
64GB	\$399	64GB	\$299	32GB	\$149	—	—
128GB	\$499	128GB	\$399	—	—	—	—

You can see that if you were to purchase a 16 GB iPhone or iPad you would have little or no free space.

Expensive Apps for iPhone & iPad

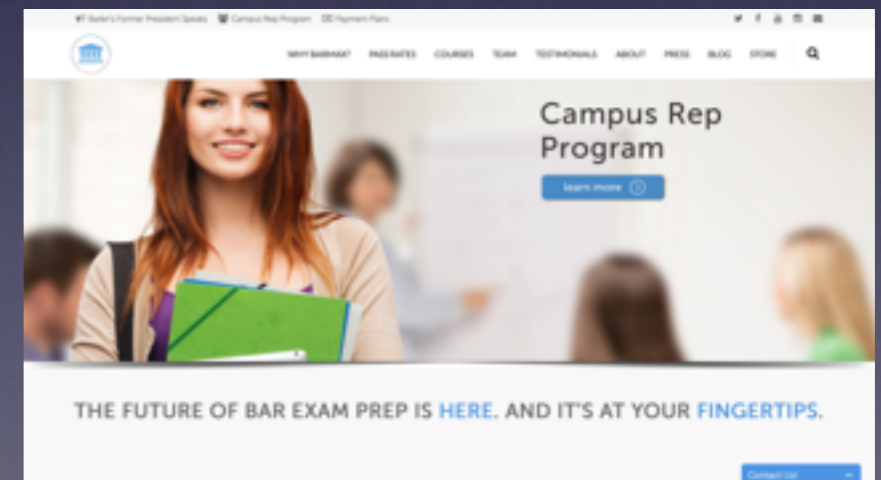

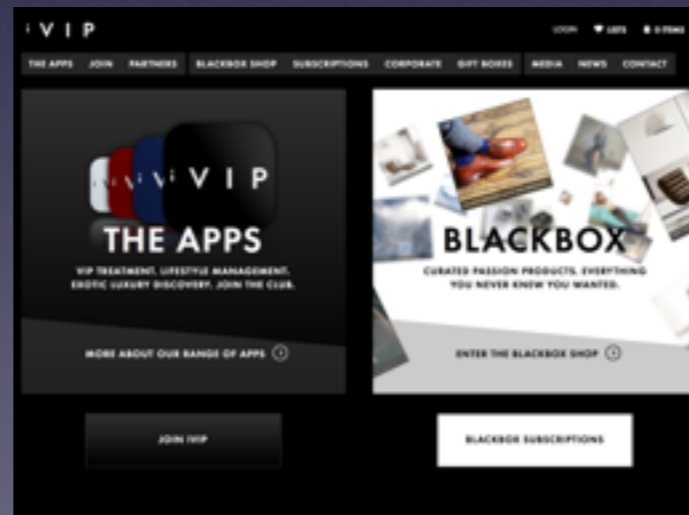

What is the cost of the apps you have added to your iPhone or iPad?

<http://theultralinx.com/2014/09/most-expensive-apps>

Dictation & Privacy

Do You Have Privacy When Using Dictation or Siri?

AT&T 8:17 PM 77%

About Privacy Done

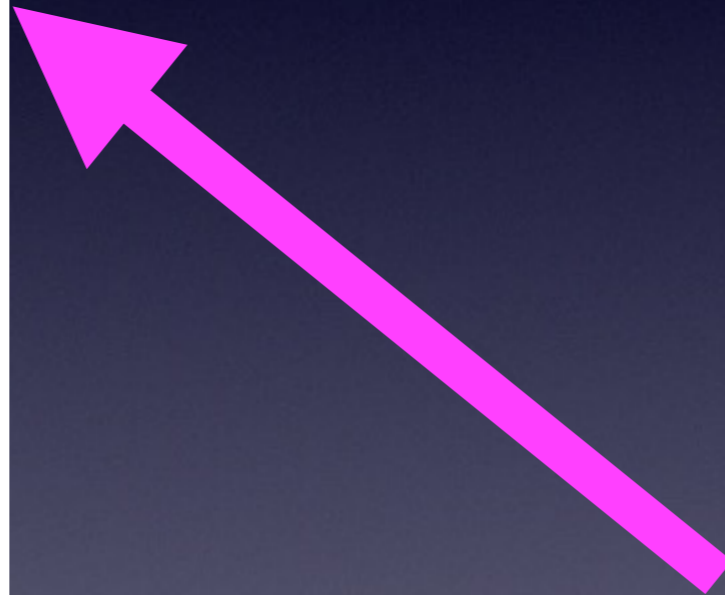

When you use Siri and Dictation the things you say and dictate will be recorded and sent to Apple to process your requests. Your device will also send Apple other information, such as your name and nickname; the names, nicknames, and relationship with you (e.g., "my dad") of your address book contacts, song names in your collection, and HomeKit-enabled devices in your home (e.g., "living room lights") (collectively, your "User Data"). All of this data is used to help Siri and Dictation on your iOS device and any paired Apple Watch understand you better and recognize what you say. It is not linked to other data that Apple may have from your use of other Apple services.

If you have Location Services turned on, the location of your device at the time you make a request will also be sent to Apple to help Siri and Dictation improve the accuracy of its response to your requests. You may choose to turn off Location Services for Siri and Dictation. To do so, open Settings on your iOS device, tap Privacy, tap Location Services, tap Siri & Dictation and select "Never".

Information collected by Apple will be treated in accordance with Apple's Privacy Policy, which can be found at www.apple.com/privacy.

You may choose to turn off Siri or Dictation at any time. To turn off Siri, open Settings on your iOS device, tap General, tap Siri, and slide the Siri switch to "off". To turn off Dictation, open Settings, tap General, tap Keyboard, and slide the Enable Dictation switch to "off". If you turn off both Siri and Dictation, Apple will delete your User Data, as well as your recent voice input data. Older voice input data that has been disassociated from you may be retained for a period of time to generally improve Siri, Dictation and dictation functionality in other Apple products and services. This voice input data may include audio files and transcripts of what you said, related diagnostic data, such as hardware and operating system specifications and performance statistics, and the approximate location of your device at the time the request was made.

You can also restrict the ability to use Siri & Dictation altogether under the Restrictions Setting.

Restrict the Use of Siri and Dictation
