Apple pulls iOS 9.3.2 for 9.7" iPad Pro after update errors

By AppleInsider Staff Friday, May 20, 2016, 10:44 am PT (01:44 pm ET)

Following reports of broken updates, Apple has pulled the iOS 9.3.2 update for the latestgeneration 9.7-inch iPad Pro, promising that a fix is in the works.

Owners of the new, smaller iPad Pro can no longer download the iOS 9.3.2 update from Apple. The issues do not affect other devices, like the 12.9-inch iPad Pro or iPhone models, and the iOS 9.3.2 update remains available for all other models.

MMS And / VS SMS

SMS stands for Short Message Service Its a short, text only message from one phone to another. They are limited to 160 characters.

> MMS stands for Multimedia Messaging Service MMS Supports videos up to 40 seconds. It supports picture sending and audio files.

The Messaging App

Use iMessage Make Sure iMessage Is Turned On.

If you have limited text messaging...green ones count against your plan. If you have 200 messages a month... You do not want to see green!

What Makes a Message An iMessage?*

You have iMessage Turned on. You have a good Internet connection. You have a good router. *Don't try to do it on Dec. 31 in Times Square.

iMessage Problems

<u>Messages switching from Blue to Green</u>

1. Poor Internet connection: You or the one sending.

2. Bad router. Linksys or Cisco Routers probably will give problems.

3. Network congestion. Whatever is faster and sometimes "text messaging" is faster than iMessage.

What If I Can't Wait For A Download to Finish!

You can always pause a download!

Apple [Mac] downloads can be stopped and restarted anytime or anyway.

Close the lid. Turn off the iPhone. Stop your connection to the Internet. Etc.

Restart by tapping.

What Is Going On That I Don't Know About!

Double tap the home button twice in rapid succession. Some of these apps I opened two or three weeks ago. <u>Background refresh is on and hence, the battery is being drained</u>.

Closing apps only helps with battery not function or operation of your device!

Use The Multitasking Feature to Close Apps!

Double tap the home button twice in rapid succession. Scroll through all the apps and swipe up to close app.

What If An App Quits Responding And The Home Button Won't Work?

You won't be able to use the Home Button and you won't be able to use the Multitasking feature.

Work around!

Hold the On/Off button. Wait until "Slide to Power off" appears. Let go of Slide to Power off. Then press the Home Button. This forces the last app to quit. You will be returned to the Home Screen.

You Can Reset Every Thing.

Go to General then to Reset and the Reset Six Things.

If Siri thinks it didn't get a word correct, it will have a dotted blue underline.

Tap the dotted blue underlined word and get an alternative or type what you want.

Correct Siri's Pronunciation

Teach Siri how to pronounce a name correctly.

Today, 7:19 PM

Doing quite well! Still notice that I am weak. Barber said anybody who sits for three months will have difficulty recovering strength!

How to teach Siri to pronounce someone's name in iOS 7

- 1. Press and hold down the Home button on your iPhone or iPad to activate Siri.
- 2. Say something that coaxes Siri to incorrectly say the name in question. For example, "What's my name?" if your name is the one in question.
- Now tell her she is saying it wrong, but make sure you use her pronunciation. She always says my name as "A lie" so in my case, I say That's not how you pronounce A Lie.
- Siri should now ask you to tell her how to pronounce it. When asked, say the correct pronunciation.
- Now Siri presents you with three options for the correct pronunciation. Listen to them and tap Select next to the correct one.

I Have a <u>New Old</u> iPhone?

ATT and other carriers will be happy to get rid of their old inventory.

It is an older production model and it will be new to you.

You will be enticed to purchase it because it will be cheaper. Out dated pancake mixes will be cheaper than current ones.

While it is new to me...it is an older model.
