iPhone/iPad Basics for Winters Public Library April 19, 2016

Below is a link to the slides presented at the Winters Public Library on April 19, 2016.

You can view the slides by clicking on the blue text below.

[iPhone & iPad for Winters April 19, 2016](#)

iCloud.com contains your iPhone and iPad data and you can use it to find your iPhone!

Be careful with your storage. There are two types of storage on the iPhone and iPad. One type of storage is on the iPhone. The other type of storage is cloud storage.

Too Much / Not Enough

“Way over my head! I did not know what you were talking about.”

The difficulty of teaching a class like this:

We are at different levels of learning.

What interests one may be boring to another.

Some are new to iPhone & iPad; others are not.

The “teacher” is rather fallible.

The explanation may be rather obtuse!

“Share” Discretely Your Passwords!

Be sure to keep Passwords in “Notes” App.

Let someone know what your passwords are.

With iCloud your passwords are stored and backed up and shared with all of your devices that are signed into iCloud.

7 Tips to Free Up Storage

iPhone 6s

Free Up Storage

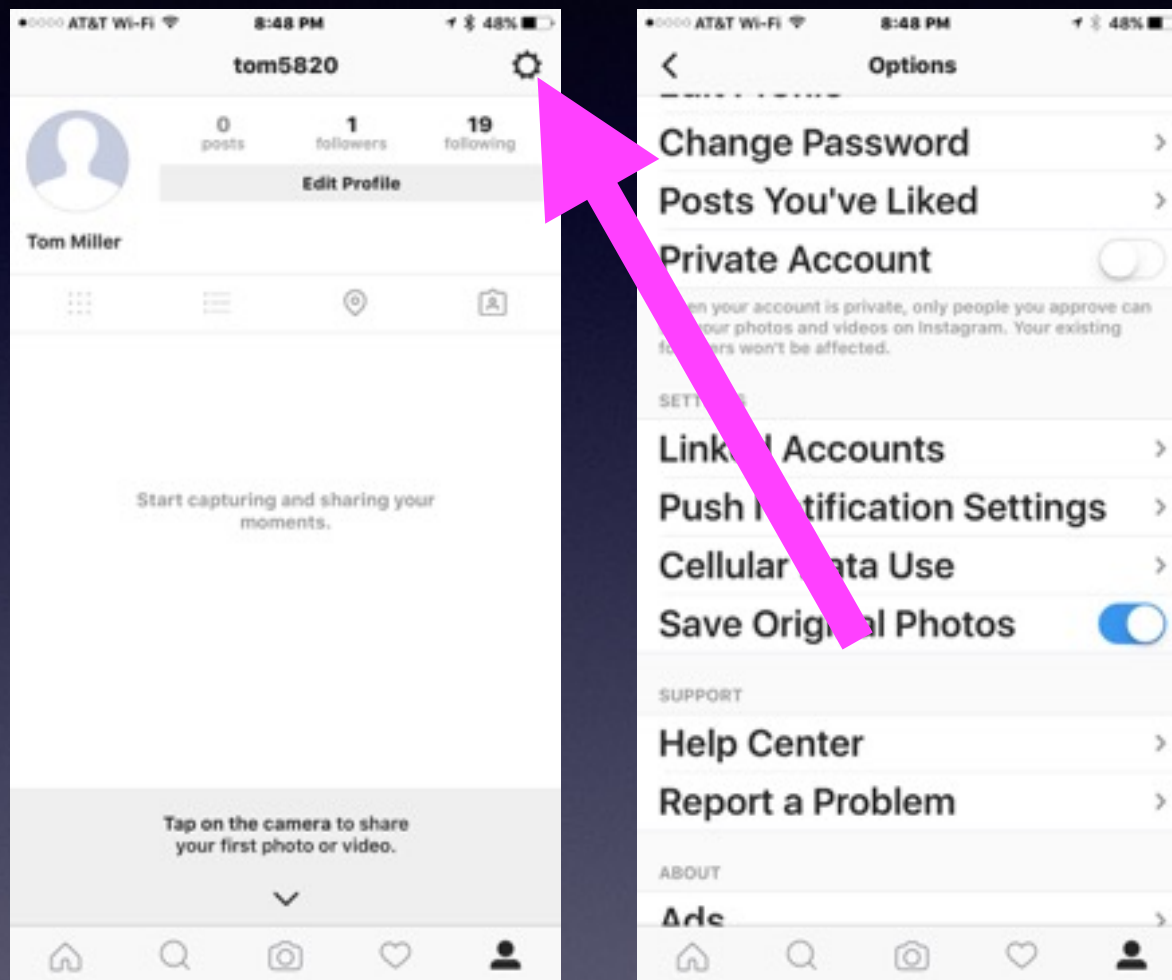

Don't save two images!

Uncheck
this!

Instagram Will Save Two Images!

Uncheck “Save Original Photos!”

Open the Instagram App,
Go to Profile,
Click settings,
Uncheck Save Original Photos.

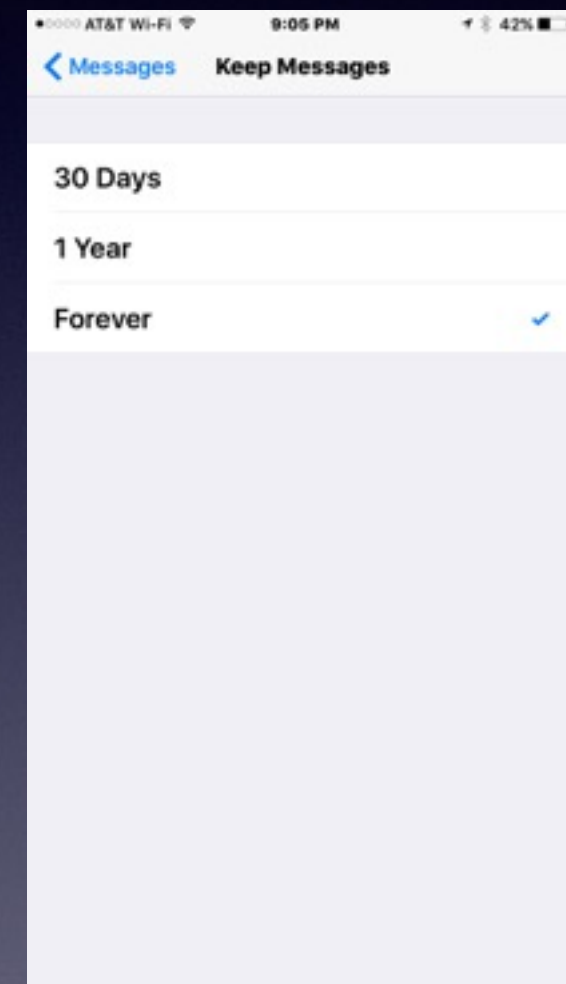

Clear History & Website Data.

If you use **Safari** often, your iPhone may be storing Web history and data that you simply do not need. To clear Safari's browser cache, open up the **Settings** app and tap **Safari**. Scroll down and click **Clear History and Website Data**.

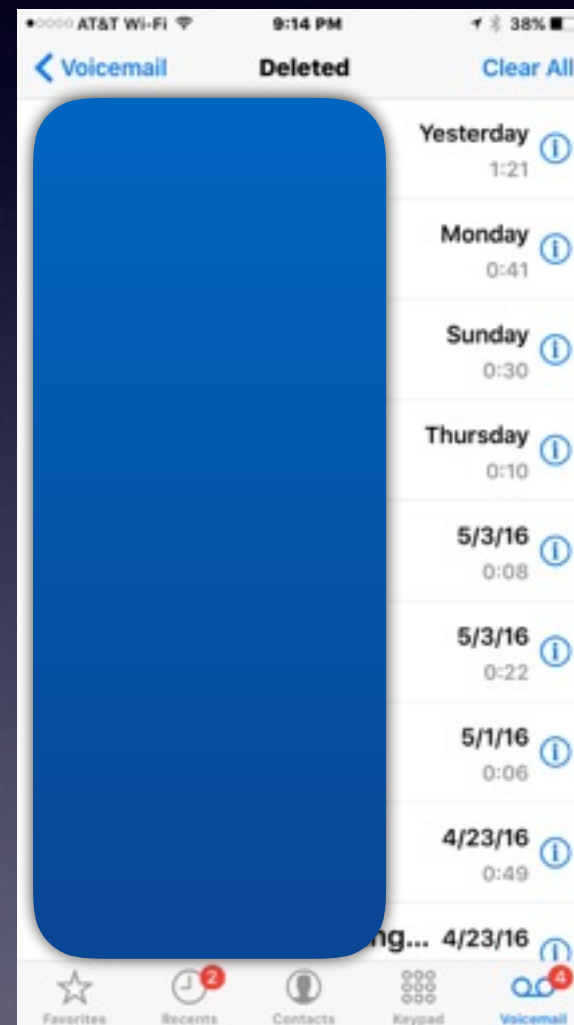

Stop Storing Texts Forever!

By default, your iPhone stores all of the text messages you send and receive...forever. This is convenient if you need to look up a 15-month old conversation; not so convenient if you need that storage space back. To stop your phone from saving texts forever, open up the **Settings** app and tap **Messages**. Scroll down until you find **Message History** and tap **Keep Messages**. Change **Forever** to **30 Days** or **1 Year**. A pop-up will ask you if you want to delete older messages; tap **Delete** to proceed.

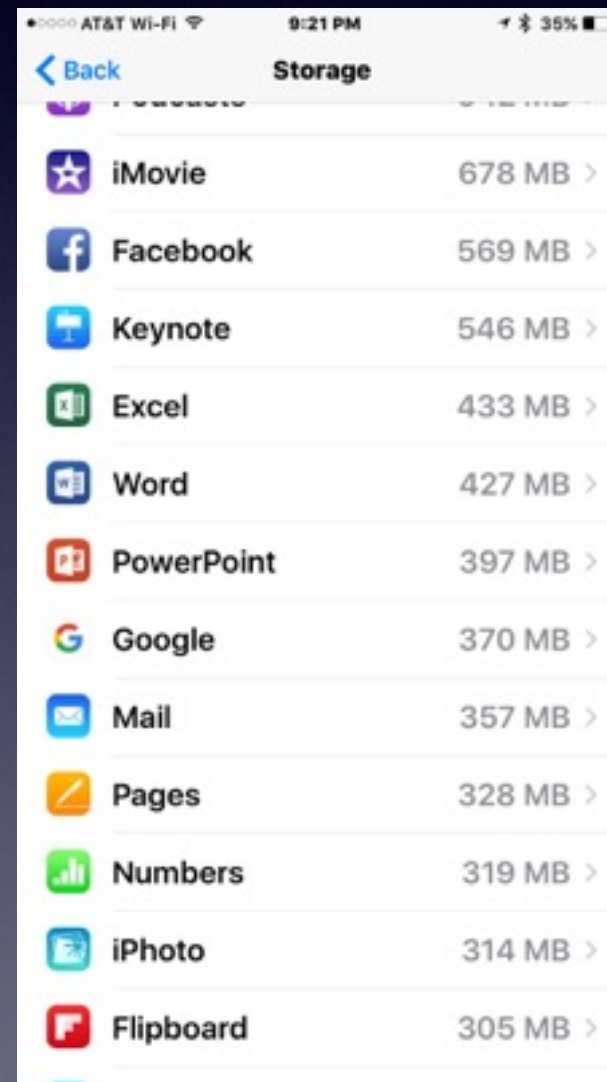

Delete “Deleted” Voicemails.

Have you emptied your deleted voicemails?

Remove Unused Apps!

Deleting An App will delete the data that the app created.

Spoofing

DEFINITION

email spoofing

E-mail spoofing is the forgery of an e-mail [header](#) so that the message appears to have originated from someone or somewhere other than the actual source. Distributors of [spam](#) often use spoofing in an attempt to get recipients to open, and possibly even respond to, their solicitations. Spoofing can be used legitimately. Classic examples of senders who might prefer to disguise the source of the e-mail include a sender reporting mistreatment by a spouse to a welfare agency or a "whistle-blower" who fears retaliation. However, spoofing anyone other than yourself is illegal in some jurisdictions.

Another iPhone Scam

Can a phone be hacked? Watch Lookout on 60 Minutes

By Lookout 44 Comments

Interested in getting more in-depth information on our attacks? Read about how we did the [Wi-Fi attack here](#) and the [mobile malware attack here](#).

Tonight, 60 Minutes featured Lookout co-founder [John Hering](#) and a number of other well-known and respected security researchers demonstrating mobile attacks.

This snippet of conversation from the segment, captures the reality of mobile security:

60 Minutes' Sharyn Alfonsi: "Is everything hackable?"

Hering: "Yes."

A: "Everything?"

H: "Yes."

A: "If somebody tells you, 'You can't do it?'"

H: "I wouldn't believe them."

“We live in a world where we can’t trust the technology we use!”

ABILENE, Texas - Region 11 Education Service Center was taken over by ransomware hackers Sunday, causing Abilene ISD's website to crash.

The site was down until Wednesday morning.

Ransomware hackers target various establishment by encrypting their data and holding their websites

AISD Website Hacked!

“Ransom Ware”

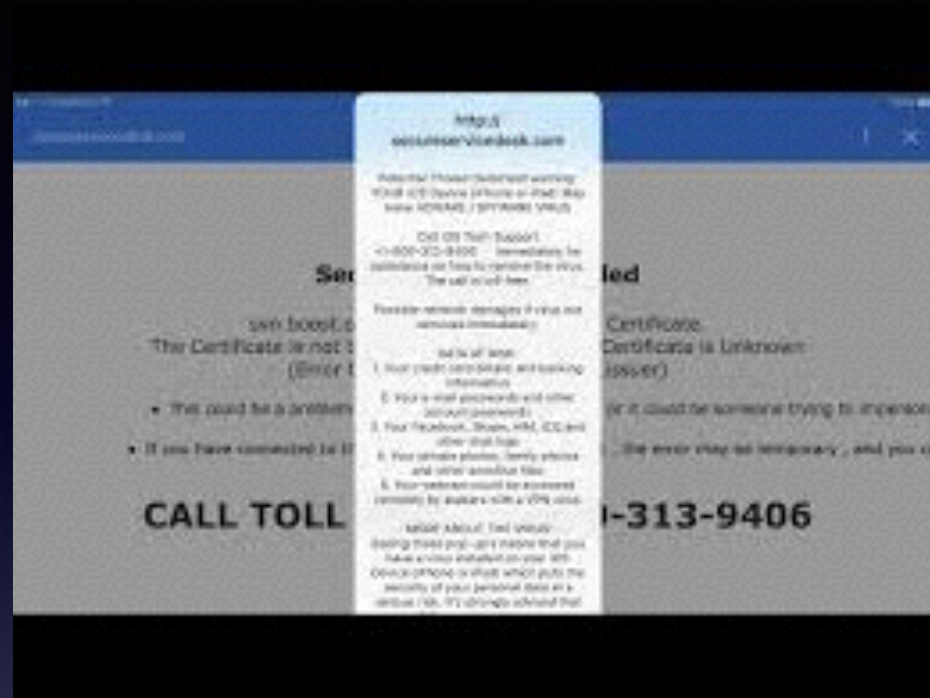

Ransomware Hits iPhone and iPads.

<http://www.komando.com/happening-now/316770/ransomware-scam-hits-phones-and-tablets-heres-how-to-beat-it-in-15-seconds>

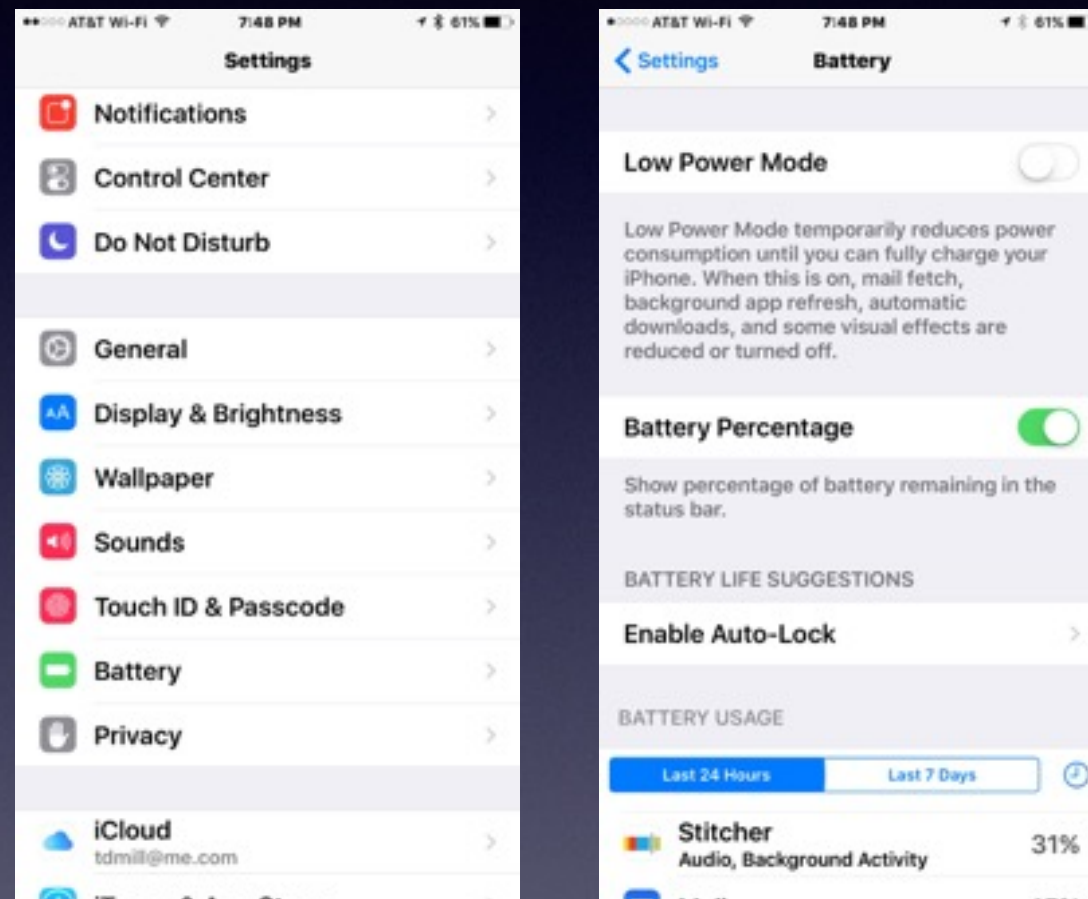

Ransomware

Show Battery %

This setting is in a new place!

Keep your battery in good condition by letting it go “down” before charging and let it fully charge before unplugging.

Turn On “Low Power Mode”

This feature combines all the best methods to conserve battery power while giving as many features as possible!

Notice the yellow battery symbol!

Organize Contacts And Edit Them

You can do it on the iPhone, iPad, computer or iCloud.

First... check your own personal info.

Look at favorites.

Are Digital Cameras “Safe”

You can accidentally delete photos on a digital camera and on the SD card.

Nothing is as safe as an iPhone or iPad...since photos are backed up and saved in iCloud!

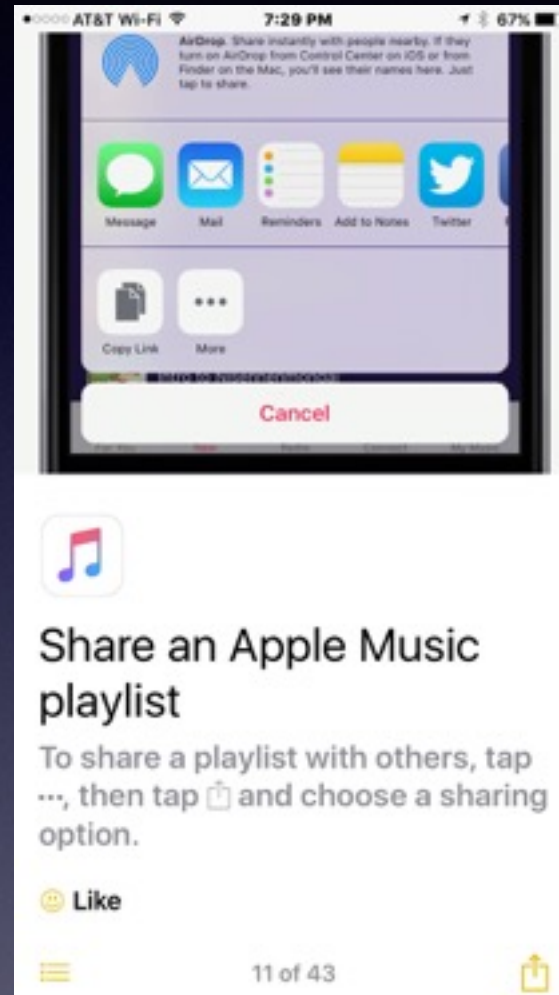

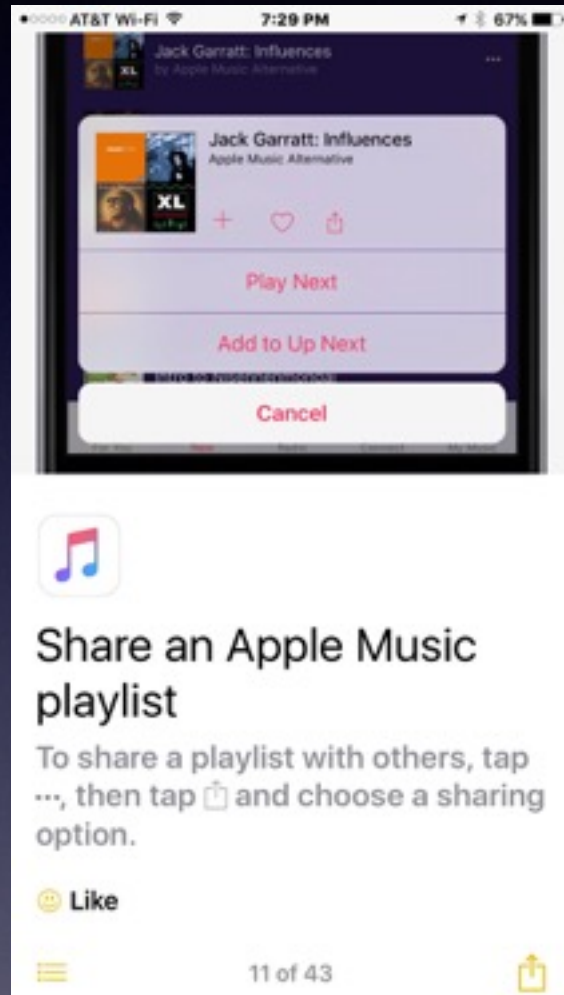

Go To iCloud.com To See The Photos You Have Backed Up!

Remember: You cannot go to iCloud.com on an iPhone, iPad or iPod Touch.

**You can use any computer that is:
Connected to the Internet,
You have your Apple ID
And you have your Apple ID Password**

Use Siri To Open An App!

Open the “Tips” App!

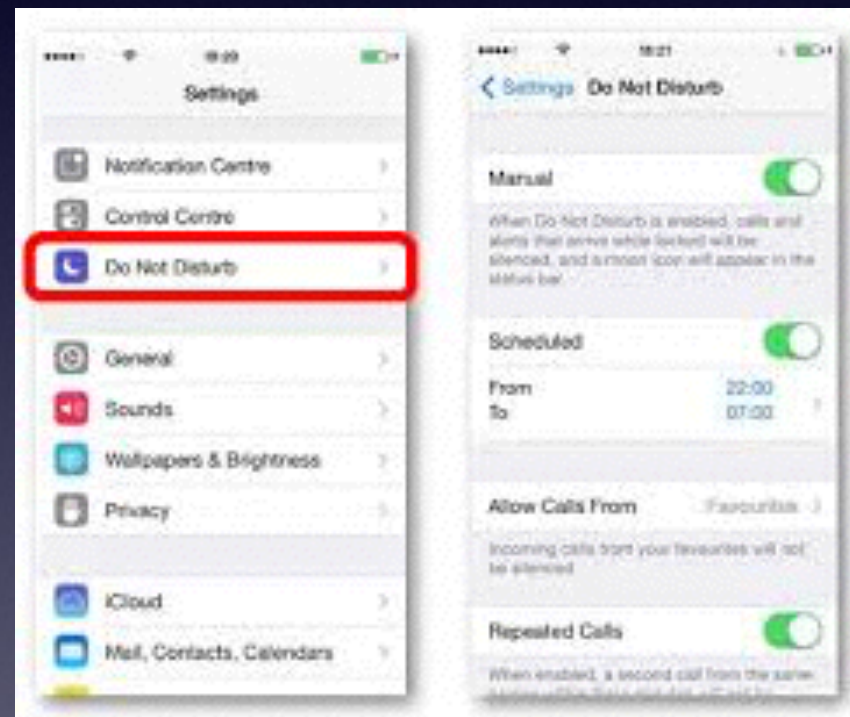

Why can't I share my Buddy Holly playlist?

Do Not Disturb

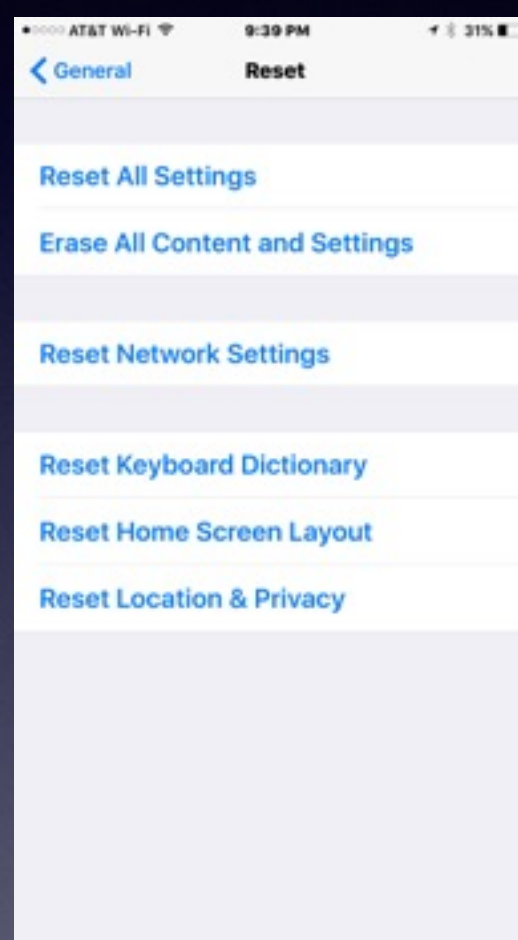

I was “disturbed” when Do Not Disturb was “on”!

Ask Siri to “Turn On Do Not Disturb!”

Problems: Do A Reset.

Network not working!

Follow The 3-2-1 Rule!

Backup

3 copies on two different media and one off site.
