## Software Update

**iOS 11.3.1**

Apple Inc.

49.5 MB

iOS 11.3.1 improves the security of your iPhone or iPad and addresses an issue where touch input was unresponsive on some iPhone 8 devices because they were serviced with non-genuine replacement displays.

Note: Non-genuine replacement displays may have compromised visual quality and may fail to work correctly. Apple-certified screen repairs are performed by trusted experts who use genuine Apple parts. See [support.apple.com](https://support.apple.com) for more information.

# iMovie, App Store Updates & Facebook

I never use iMovie...Do I need to update it?

The screenshot shows the Mac App Store interface. At the top, there are navigation icons for Featured, Top Charts, Categories, Purchased, and Updates, along with a search bar. Below the navigation, a section titled "1 Update Available" contains a list of updates. The first update is for iMovie, version 10.1.9, released on April 9, 2018. The update details include:

- App Preview creation now supports iPhone X and additional iPad resolutions
- Resolves an issue which could prevent logging into Facebook
- Resolves an issue in which HFVC video clips and HFIF photos could appear black in the viewer
- Resolves an issue in which the import date was used as the capture date when importing from certain SD...

A pink arrow points to the second bullet point, "Resolves an issue in which HFVC video clips and HFIF photos could appear black in the viewer". To the right of the update details is an "UPDATE" button. Below the iMovie update is a section titled "Updates Installed in the Last 30 Days" which shows a "Security Update 2018-001" installed on April 26, 2018. The details for this update state: "Security Update 2018-001 is recommended for all users and improves the security of macOS. For more information on the security content of this update see <http://support.apple.com/kb/HT201222>."
