iPhone, iPad & Mac Basics

Sept. 16, 2021

Welcome
to the
Abilene Mac Users Group!

A class for all levels of understanding!

Call, Text, Email Me Don't Hesitate!!!!!!

My web site is on the top of my business card. Use the web address to see the slides that I present today!

My Slides Are Available. Go to tommillermachelp.com and click on “Blog”.

tommillermachelp.com

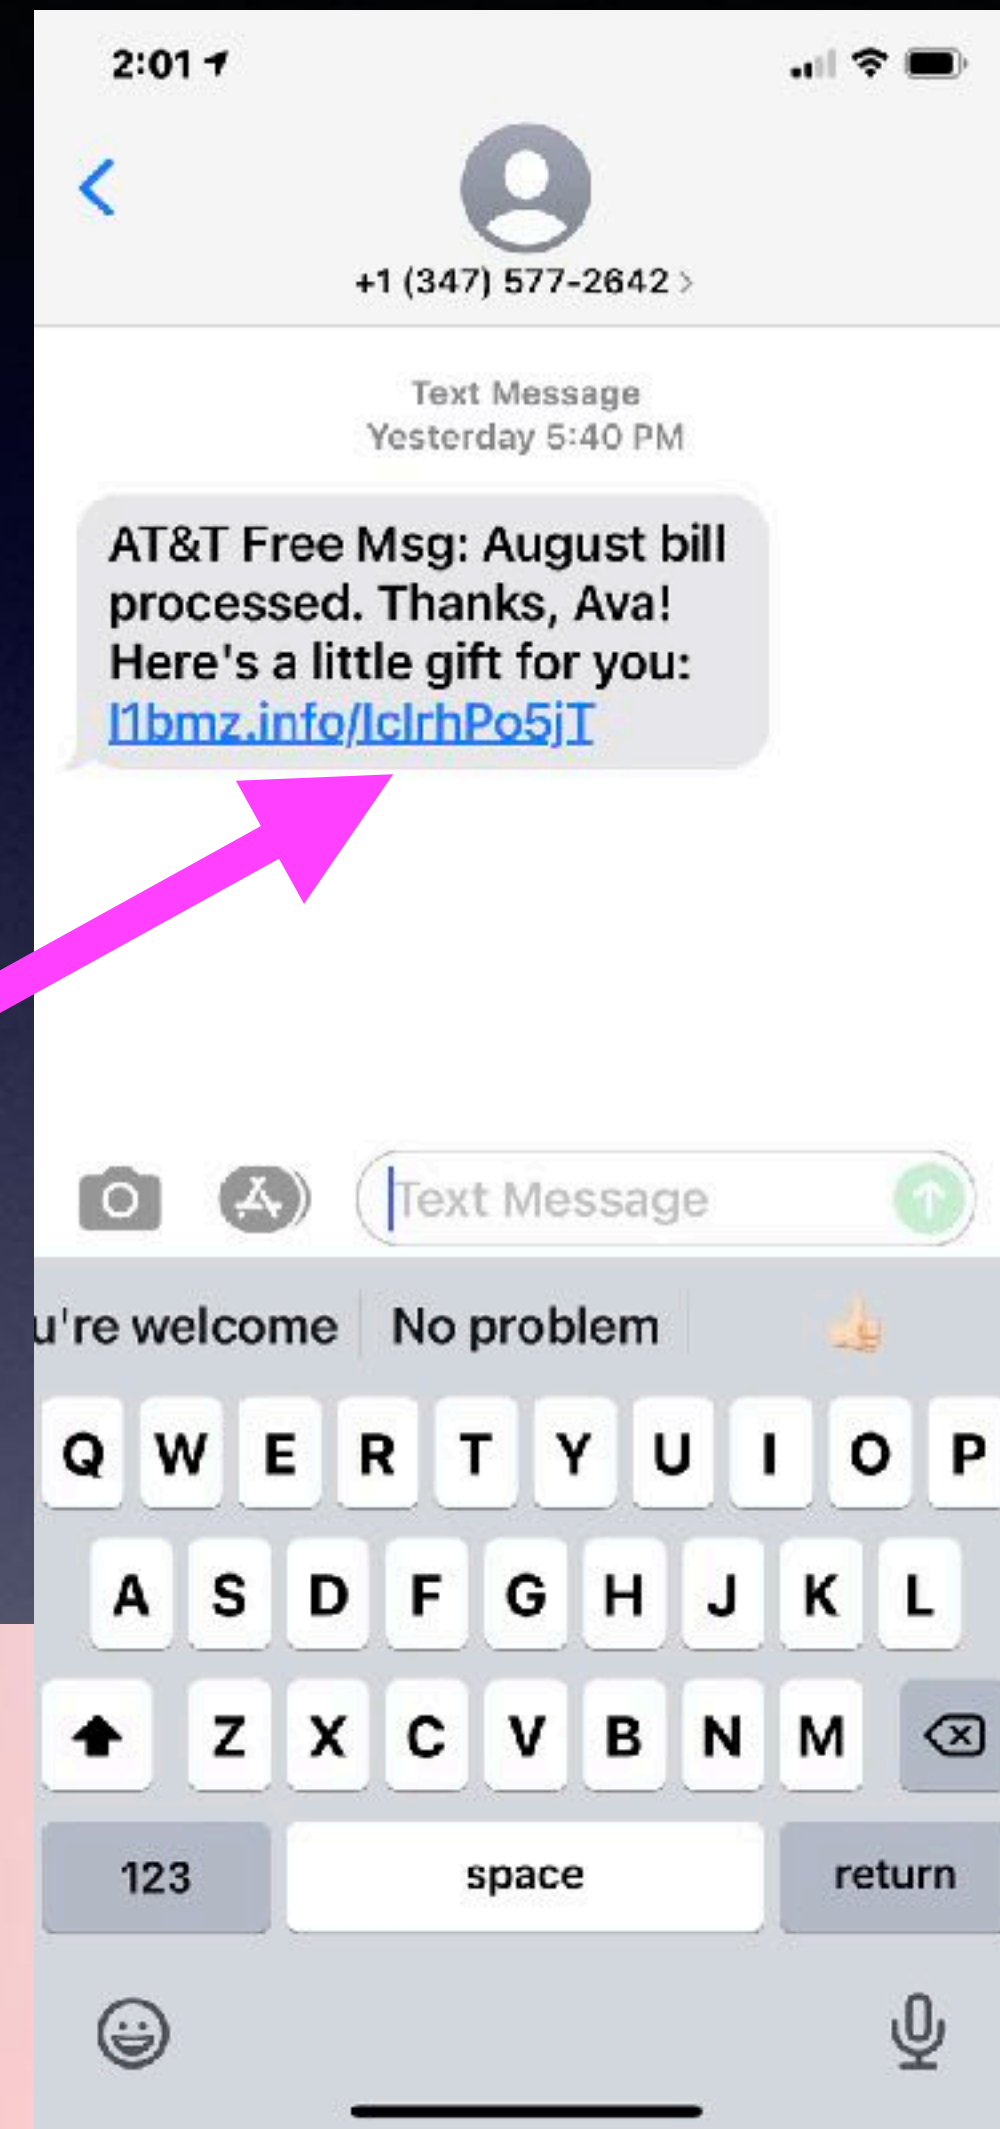

Look for “Blog”!

This is a learning class...some things may be new to you. Learning (a foreign language) is not easy.

Update Your IOS!

IOS 15 will be out before our next class.
Everyone should be on IOS 14.8.
IOS provides security again hacking threats!
IOS will not protect you from opening
a malicious email, text or web page.

Pegasus and Security

 **Kim Komando** ✓
8h · 🌐

A few months ago, we learned cybercriminals got their hands on military-grade hacking software called Pegasus.

Apple has rolled out several security patches for its devices, so you can protect yourself from this scary bug. If you have an iPhone, iPad or Apple Watch, you should install the latest updates as soon as possible.

Blood Oxygen Sensor With The Apple Watch.

More Medical Apps are working with iPhone!

Don't forget "Fall Detection" with the Apple Watch!

What Is Edge, 3G, 4G, 5G, Wi-Fi, and LTE?

These are different types of connections that bring (and send) information to (and from) your iPhone, iPad, computer and Apple Watch.

"G" stands for "generation".

4G is synonymous with LTE!

All these connections come from your service provider and come through towers and the air.

You have traveled and you will get no speed, no incoming data and no outgoing.

Do I Need Suddenlink?

(or Vexus, or AT&T)

Can I cut the cable?

You may not need Suddenlink for Cable TV but probably you will need some type of Internet connection* if you want to watch a streaming service such as Hulu or Netflix.

I do know of a person who does everything on an iPhone. He has no modem, no router, no connection to Suddenlink, Vexus or a modem provided by AT&T.

https://www.walmart.com/browse/electronics/tv-antennas/3944_1060825_133270_4536

You Can Also Send And Receive Data On Your Devices Via Wi-Fi.

This type of connection usually comes physically into a house, a business, or library.

It comes via cable (Suddenlink), Fiber Optics (Vexus) or telephone line (AT&T)

You will need a modem and from the modem a cable connects to a router and the connection to and from the Internet is spread throughout the building.

<https://www.leverage.com/blogpost/how-does-wifi-work>

You can always test your Internet speed.
On any browser: go to [speedtest.net](https://www.speedtest.net).

Hey Siri, "Tell"

Rather than "send a message".
Hey Siri, Tell Bill I'm on my way.
Hey Siri, Tell _____ I will be home shortly.
Hey Siri, Tell _____...

Hey Siri, "Send a Voice Message".

Tap the microphone here to send a voice message.

Tap the microphone to send a text message.

Many of you use Siri to send a text message. But what Siri thinks you said and what you actually said may be quite different.

Add a Nickname To Your Contacts!

It is much easier to tell Siri to call my sister than to find her contact info.

Hey Siri, Call my sister!

In Order Communication, The iPhone Must Know Who You Are!

“My iPhone Has A Virus”! No, No, No!

Why do things quit working?

The number one response...“I didn't do anything”!

Is Your iPad Frozen,
Not Responding?

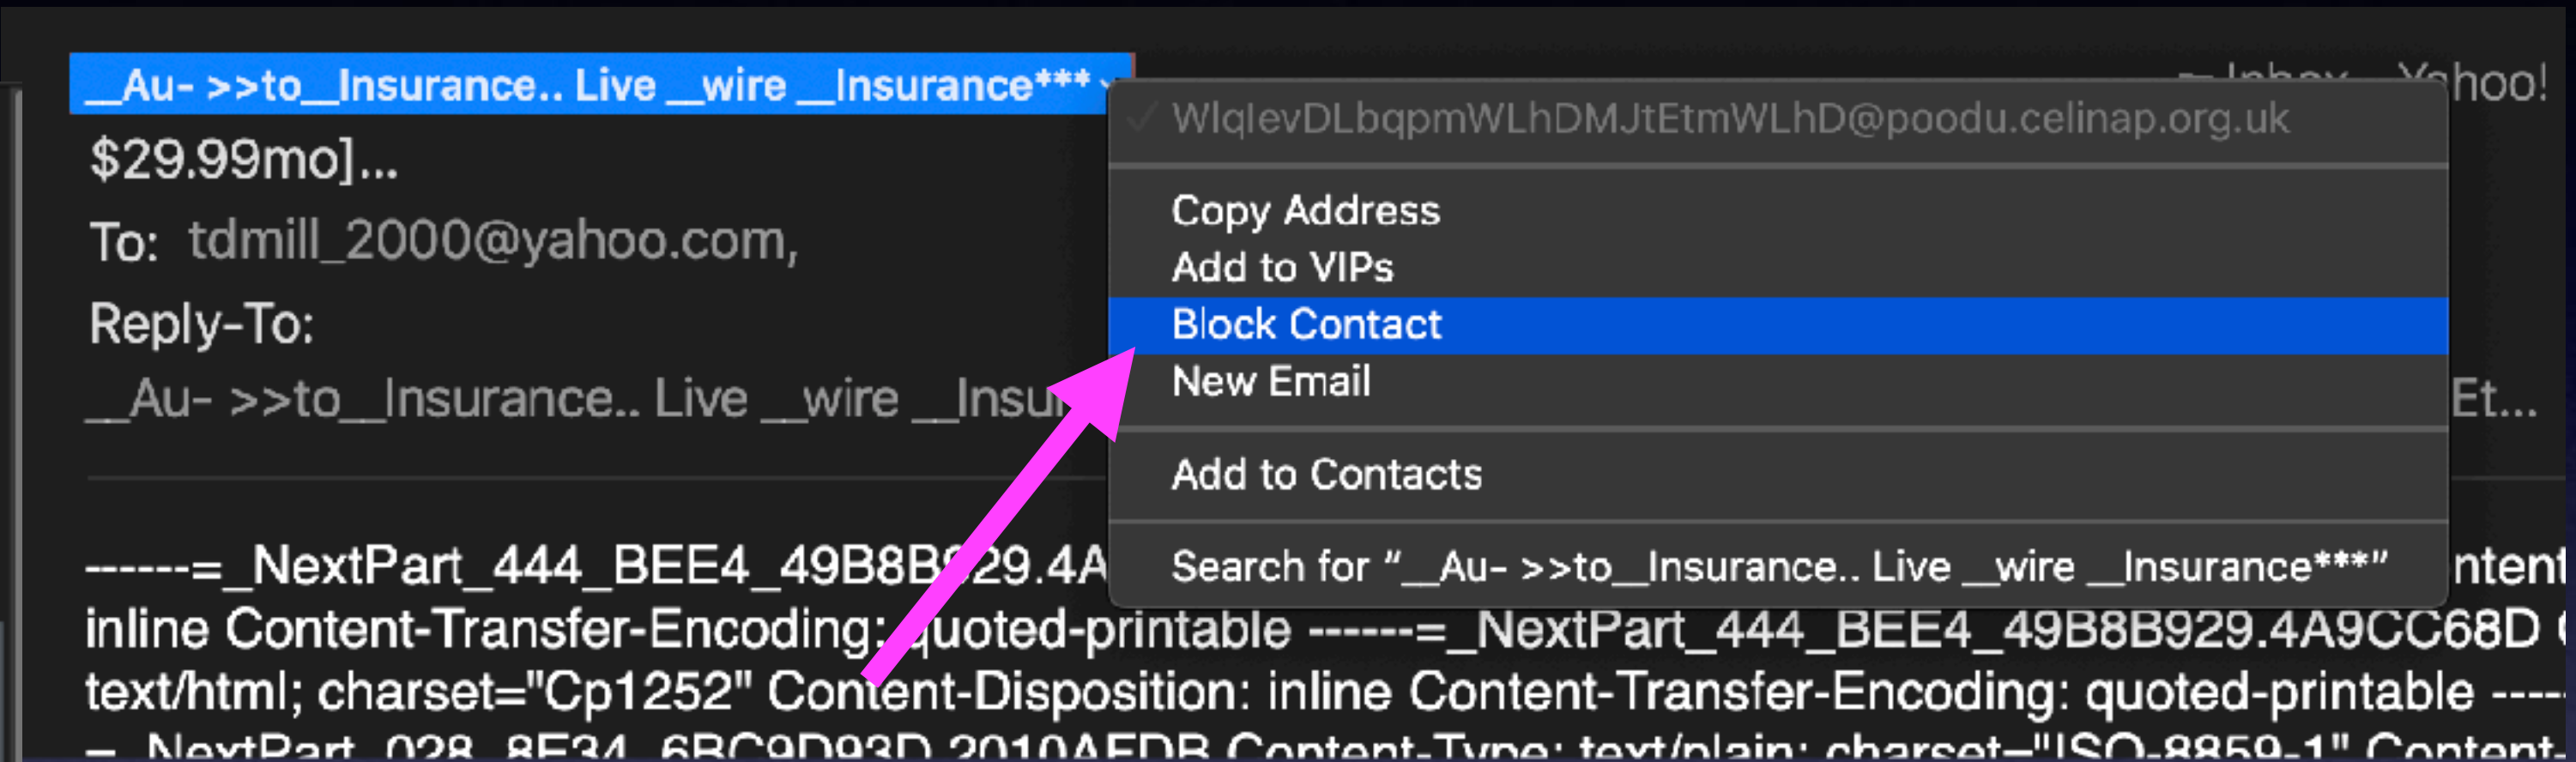

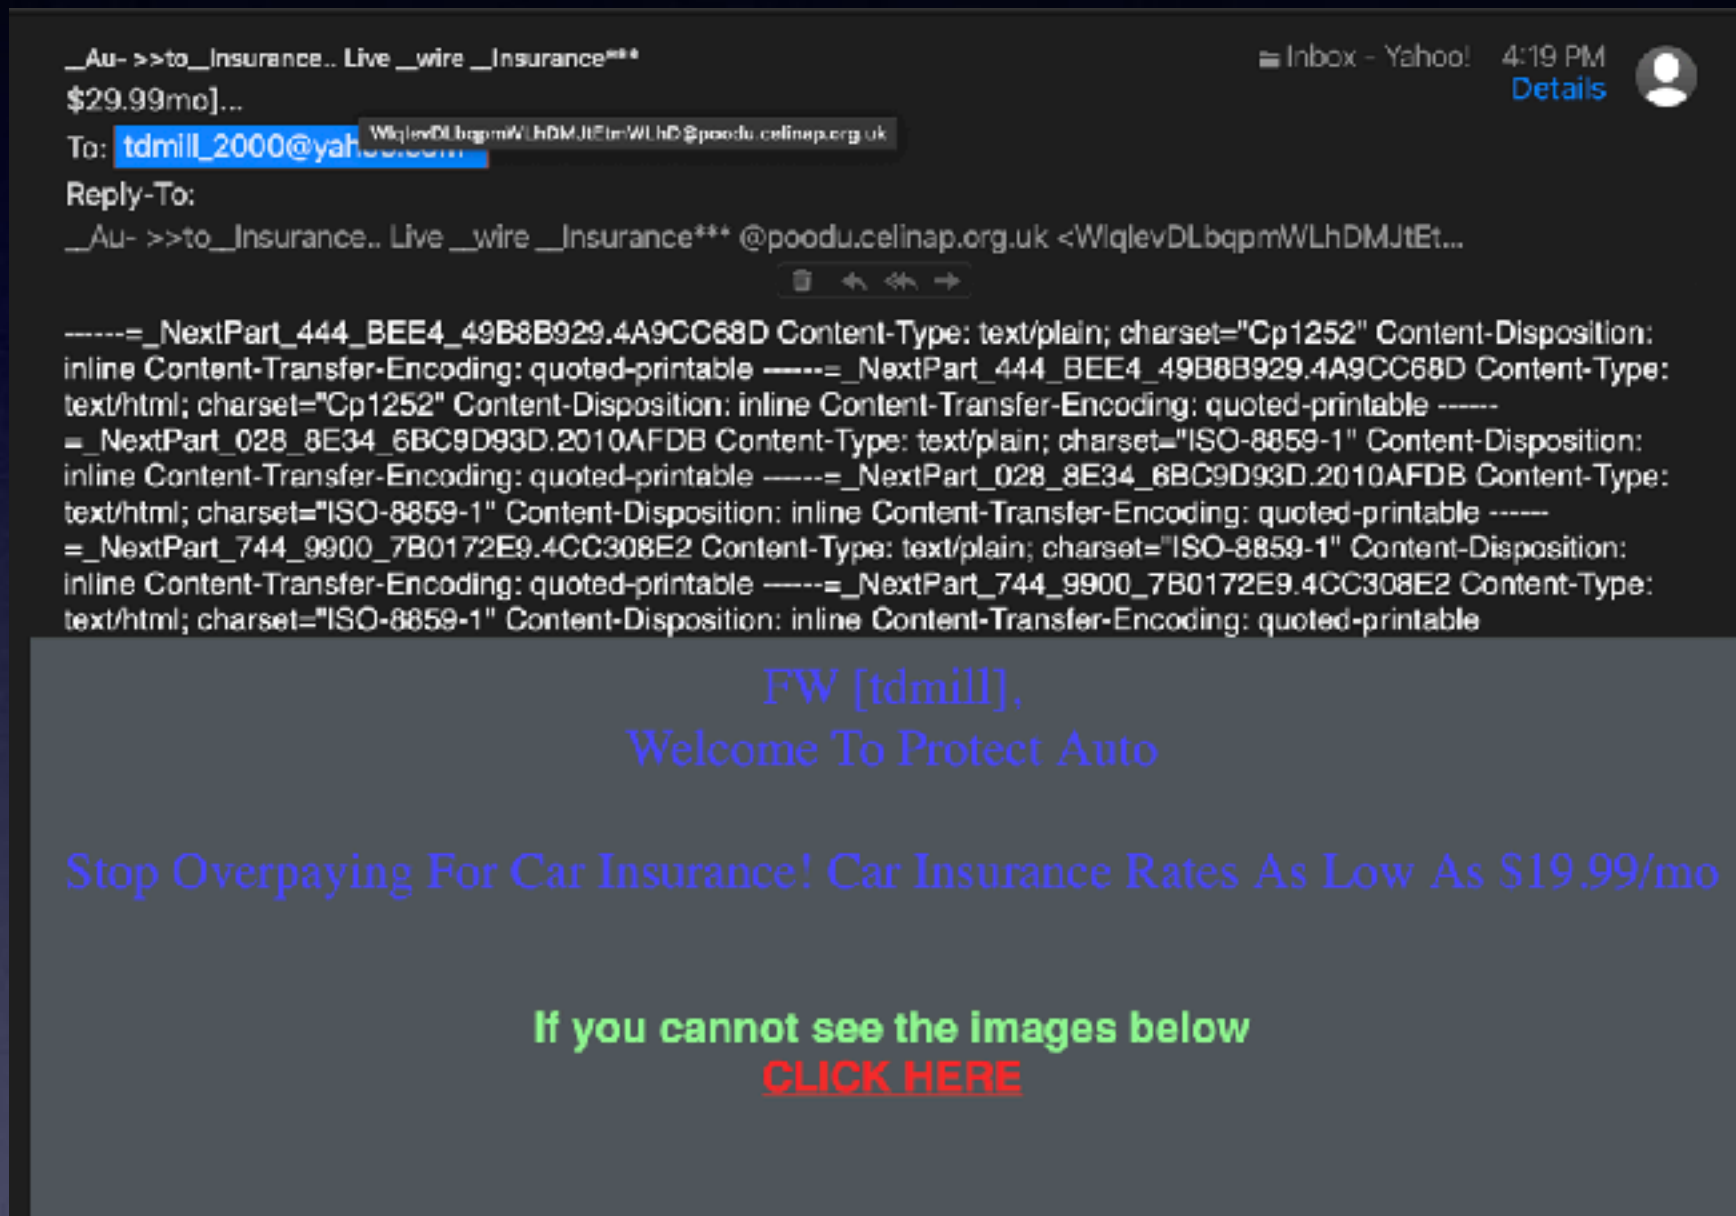

Force restart.

Older iPads and iPhones,
hold home button and power
button until you see the Apple logo 🍏.

2. Newer iPhones and iPads,
tap the volume up, then volume down,
and then hold the power button until
you see the Apple logo 🍏.

Block Email Senders!

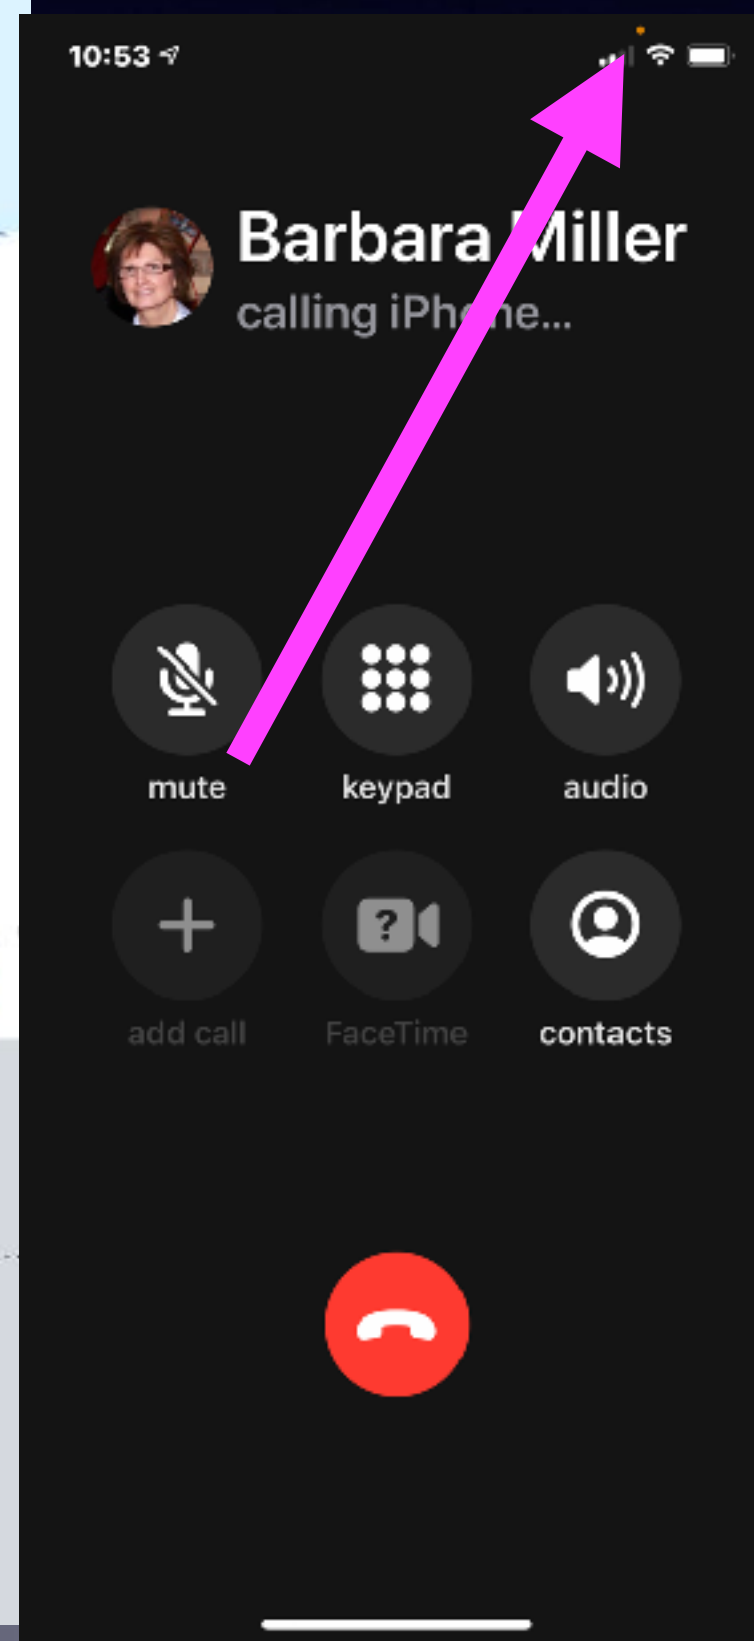

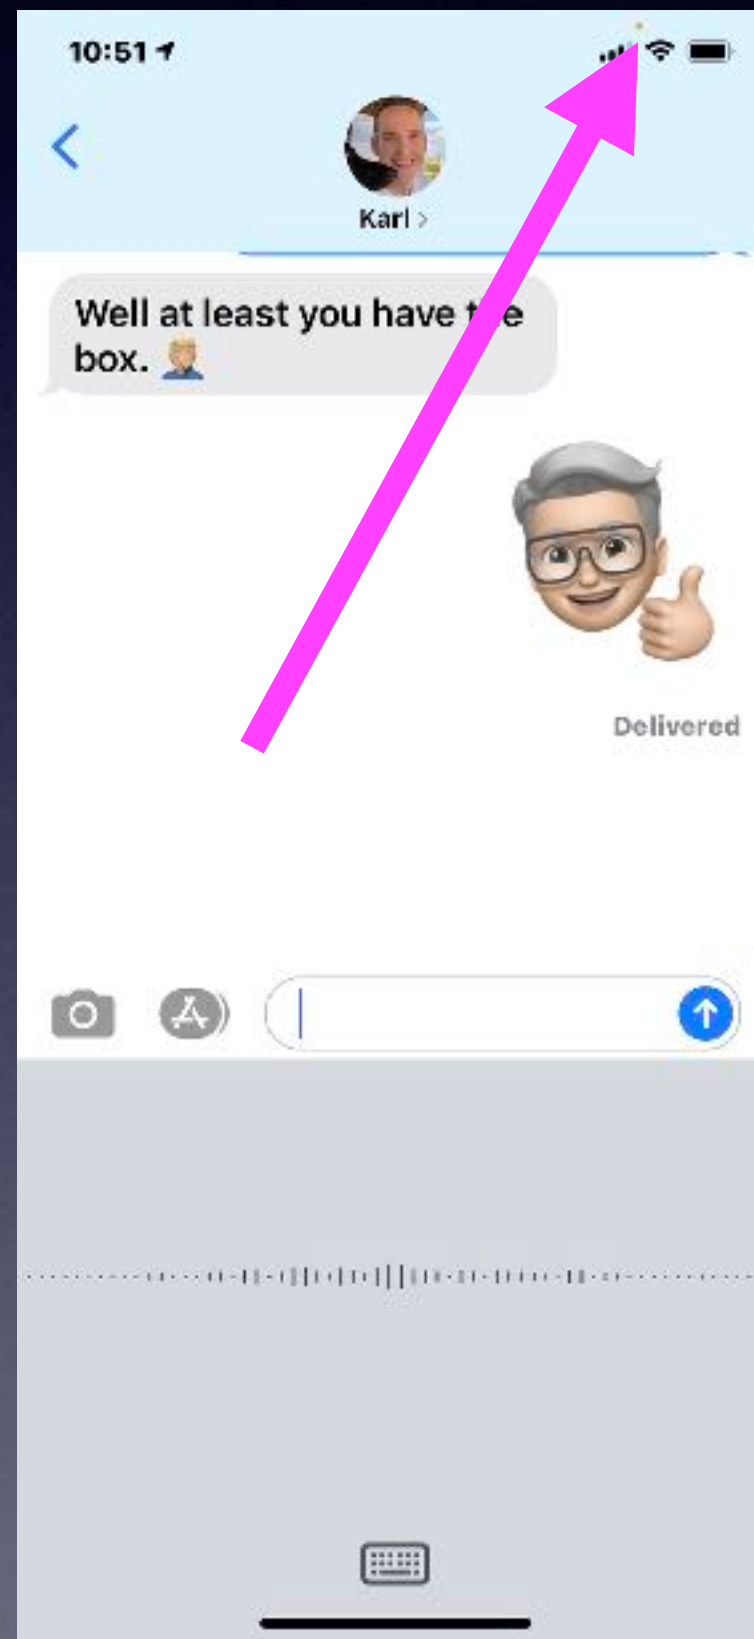

Just click on "Block Contact"!

I Am Seeing A Yellow Dot and A Green Dot On My iPhone!

(And A Lot Of People Don't Like It!)

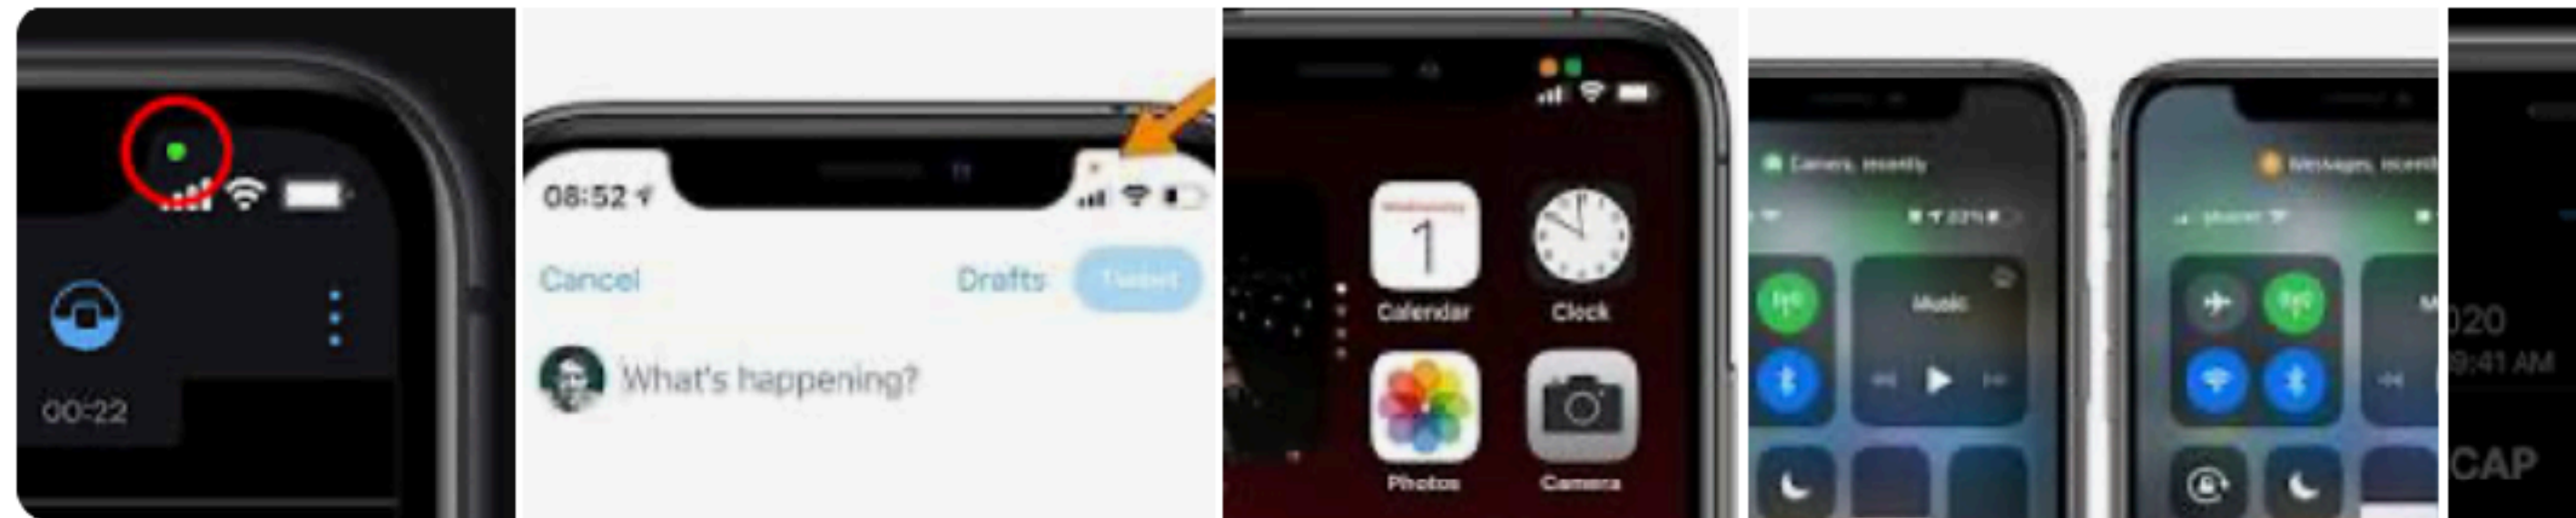

Yellow dot means the microphone is being used.

Green dot means the camera is being used.

Apple is warning you that an app is listening and or watching what you are watching.

Apple Is Concerned About Your Privacy!

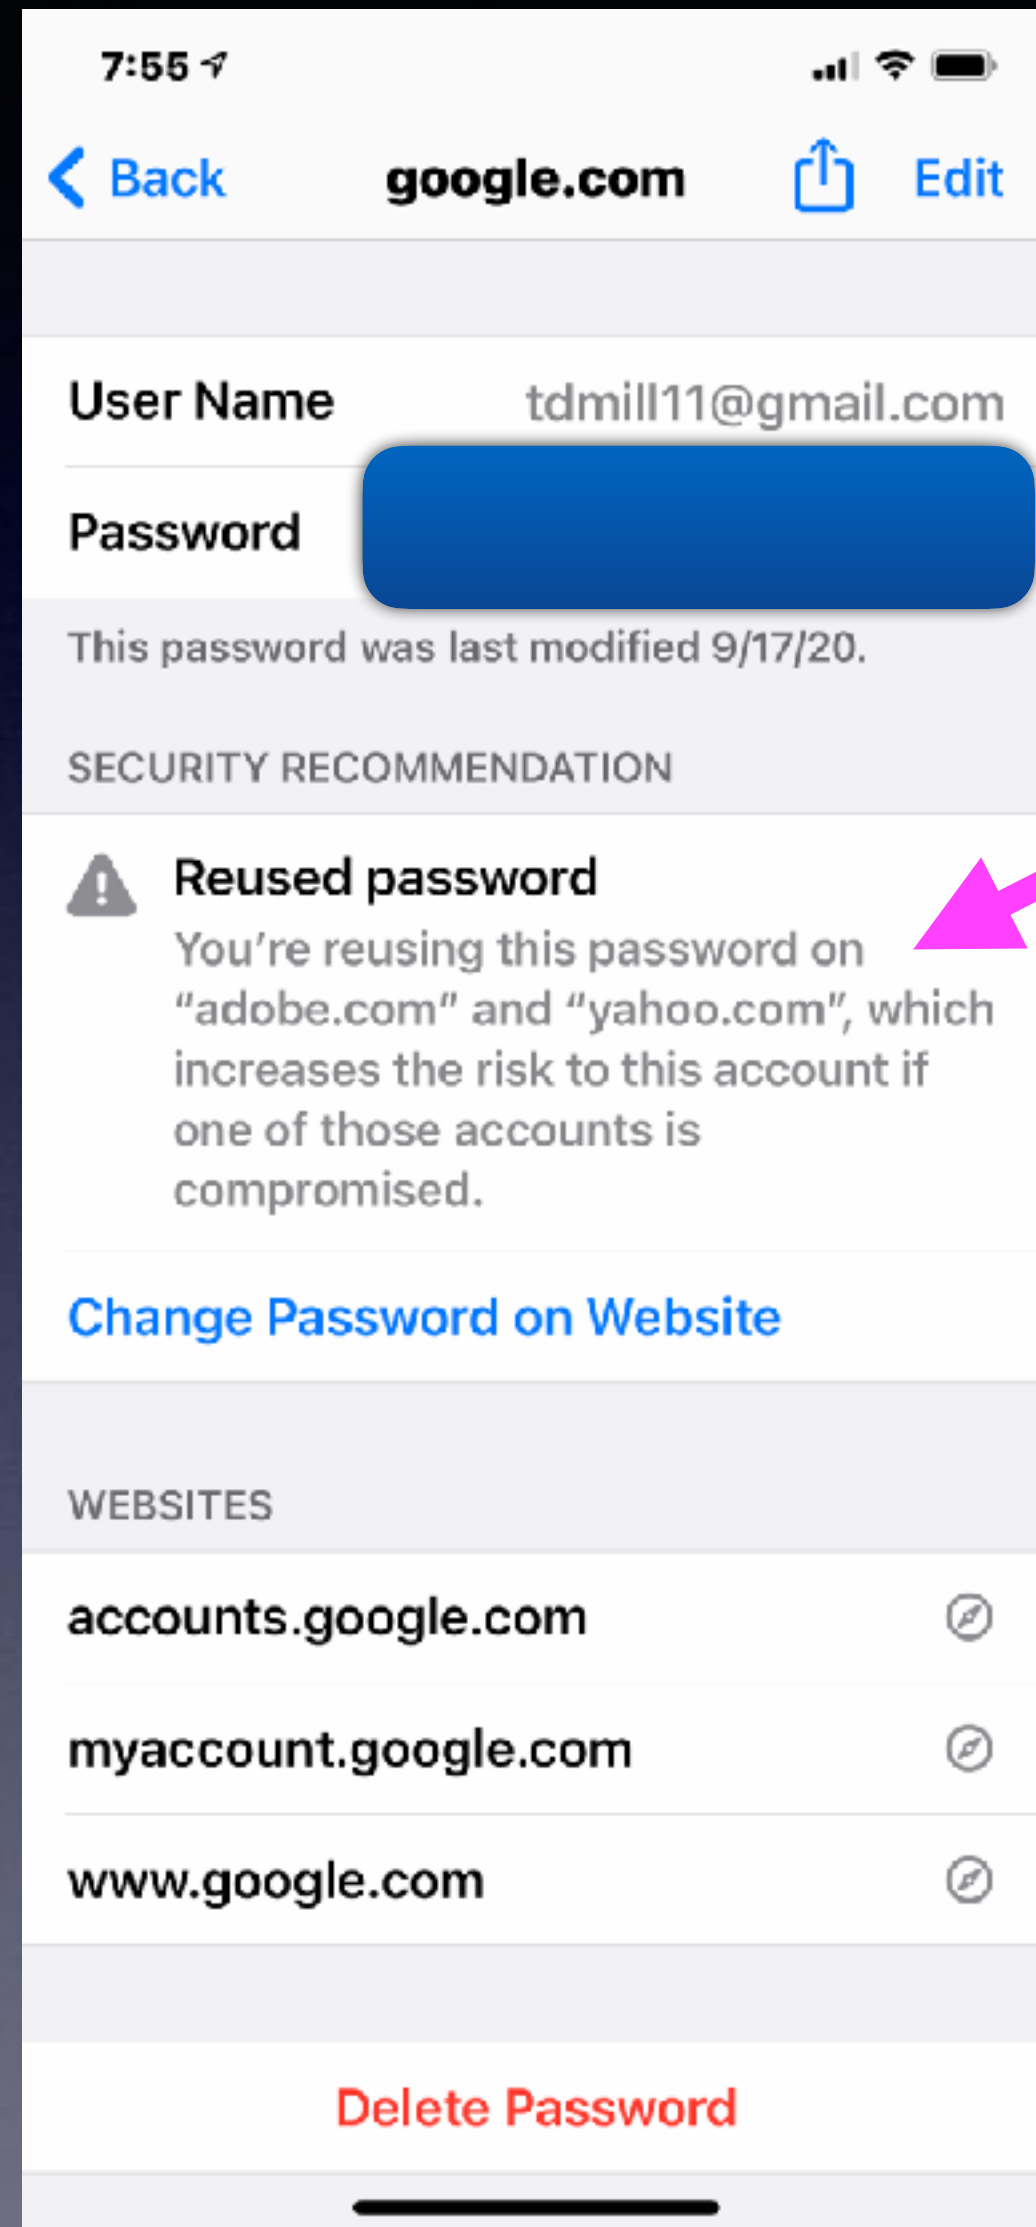

The green light dot on iPhone means an app is **using your camera or your camera and microphone** simultaneously. When the green dot appears in the top-right corner of your screen — also right above your cellular bars — it's an indication that an app is using your iPhone's camera, or both its camera and microphone. Feb 17, 2021

<https://www.businessinsider.com> > ... > Tech Reference

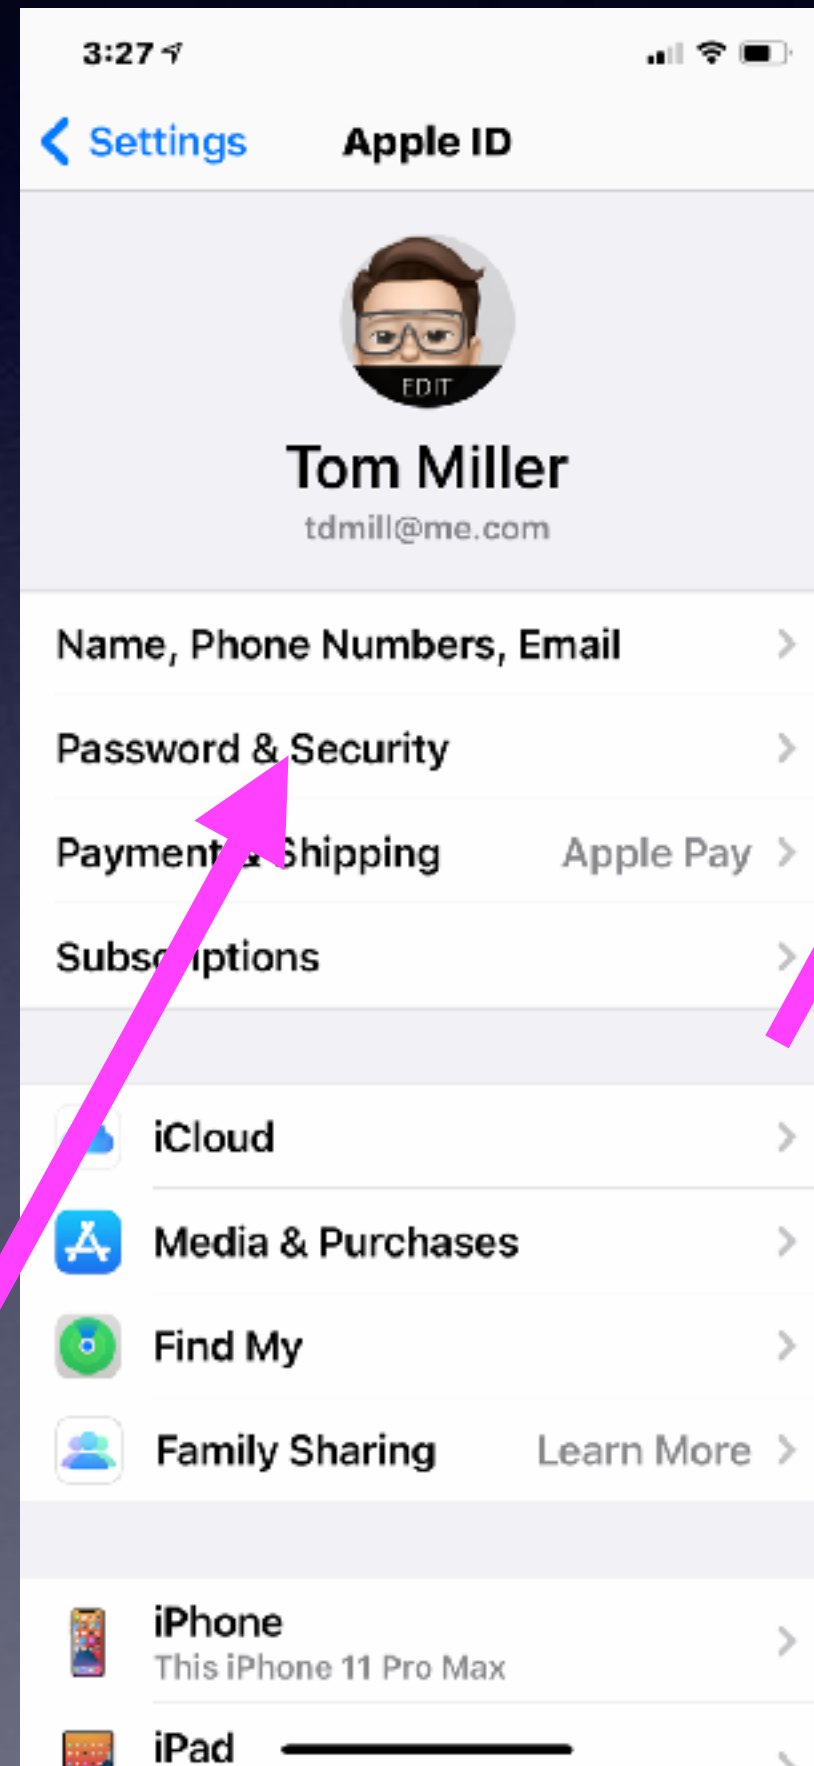

What Do the Green and Orange Dots on Your iPhone Mean?

You are taking a risk by using an app...knowing full well that someone may be listening to what you say or seeing seeing what you see!

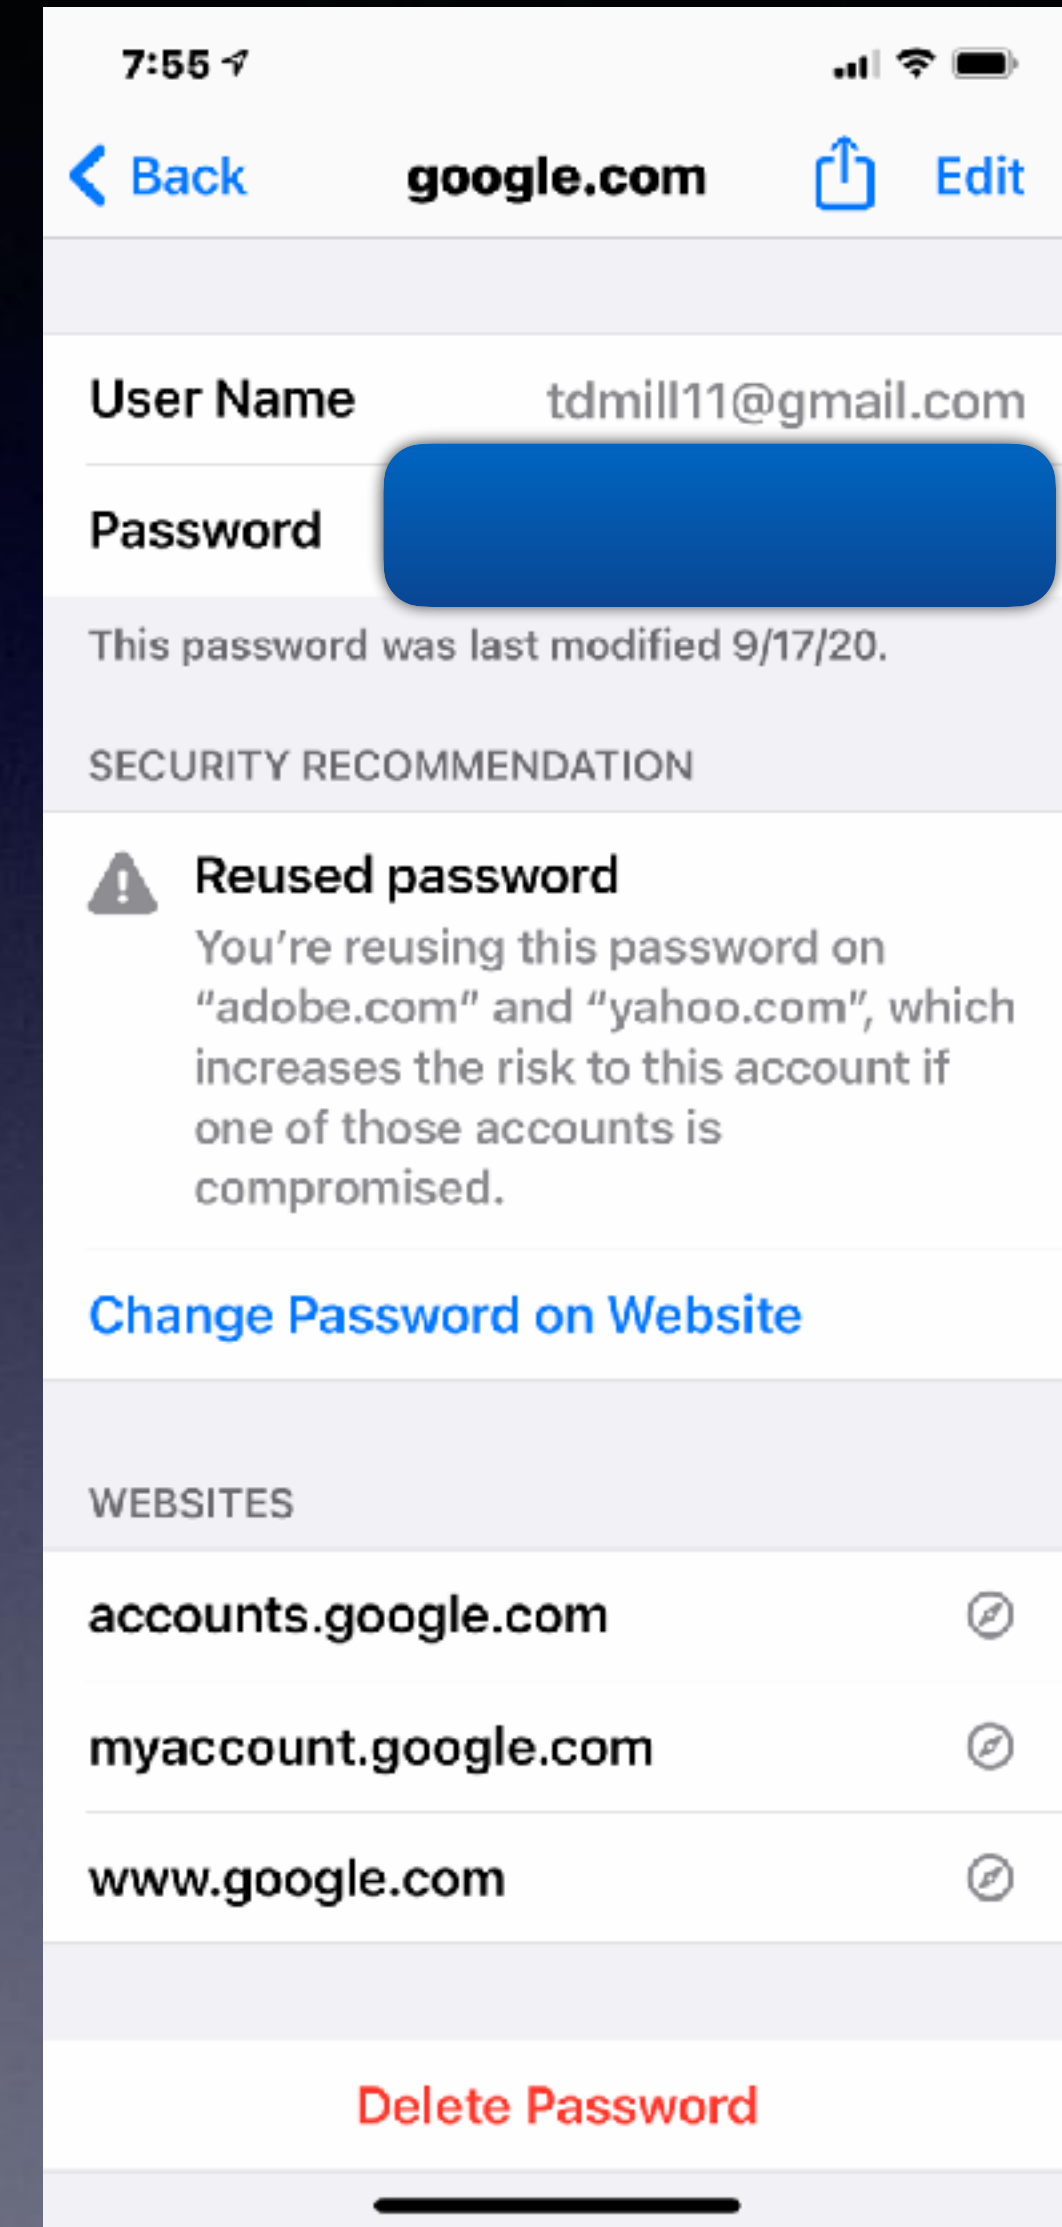

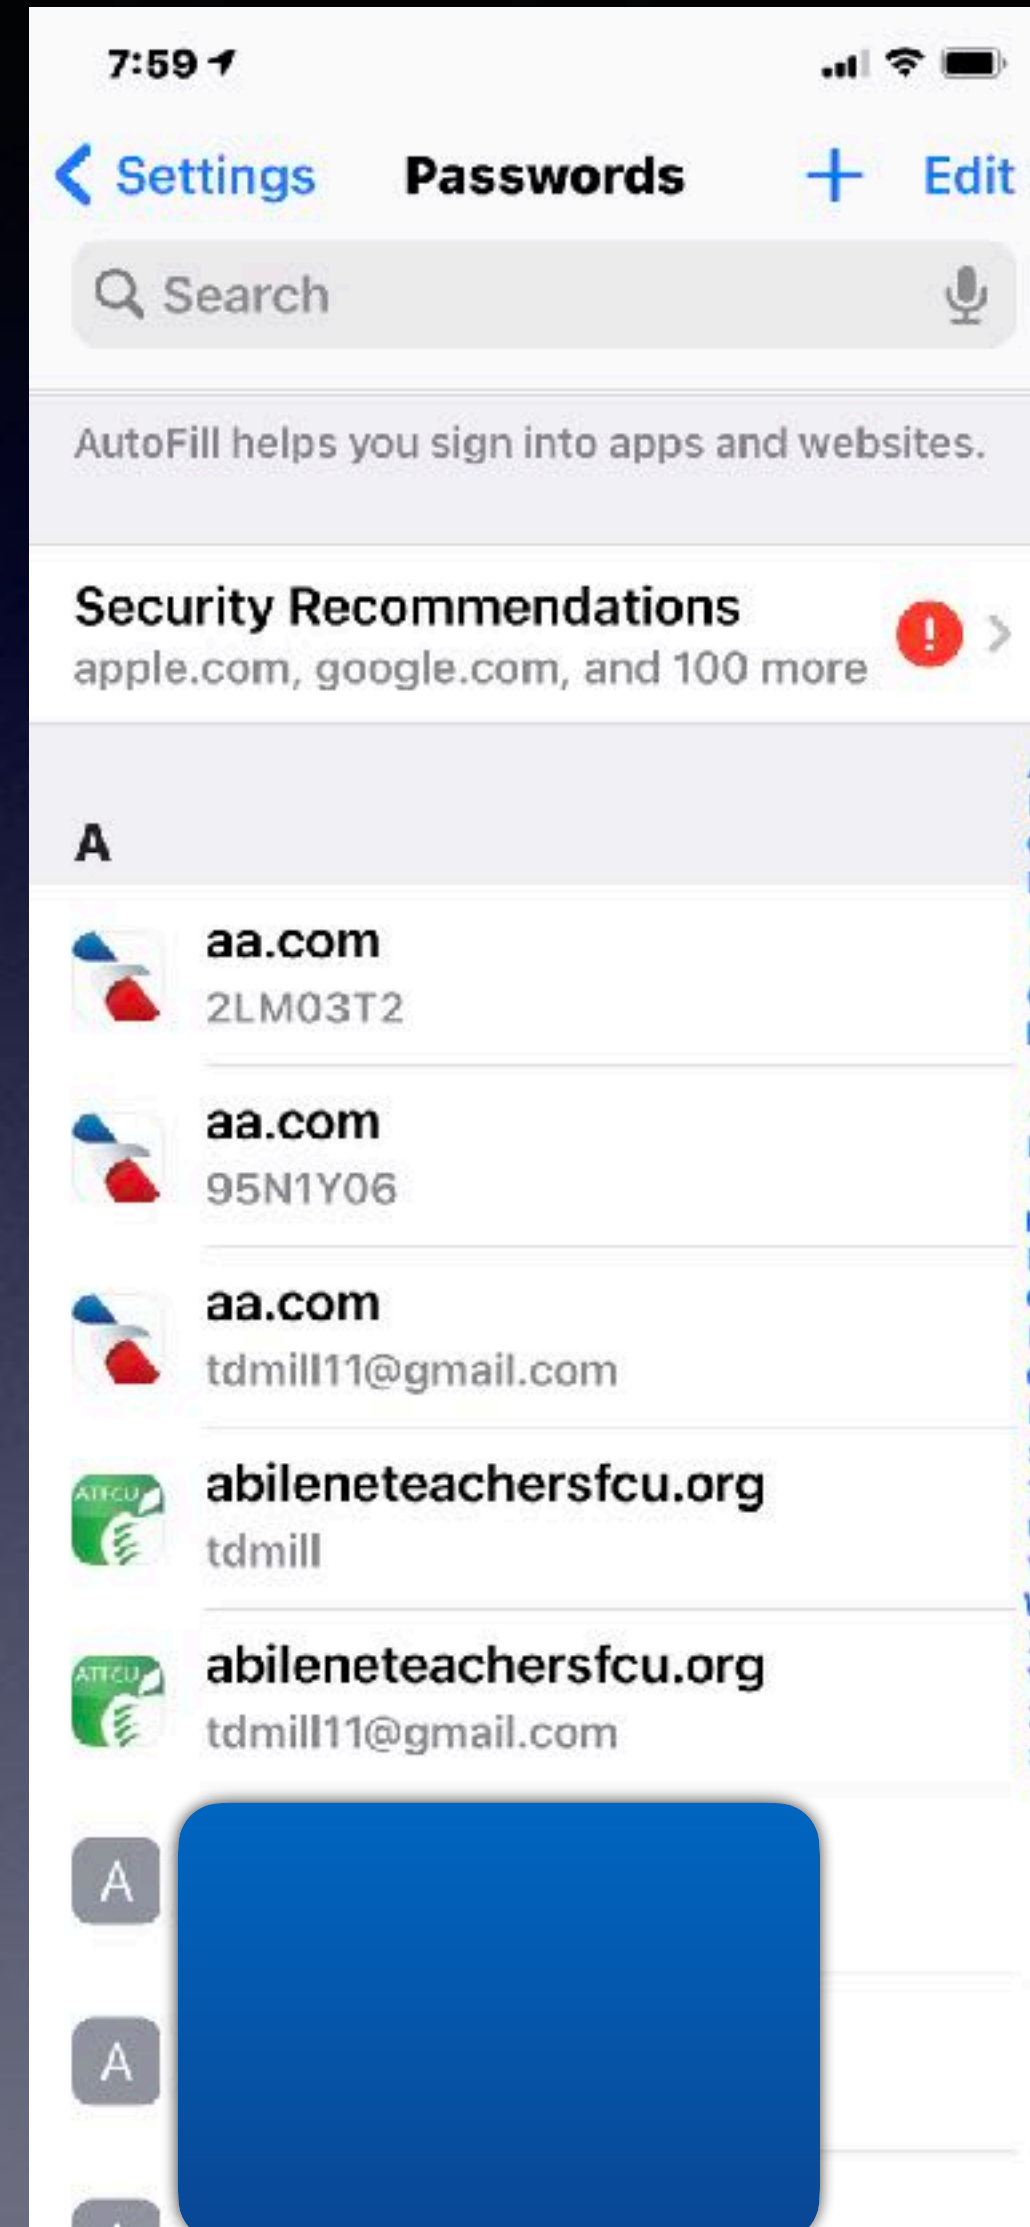

Don't Reuse Passwords...Please!

You Can Change Your Apple ID Password On Your iPhone! And Update Your Credit Card.

Am I Able To Locate My Passwords?

You Can Save and Find Your Passwords!

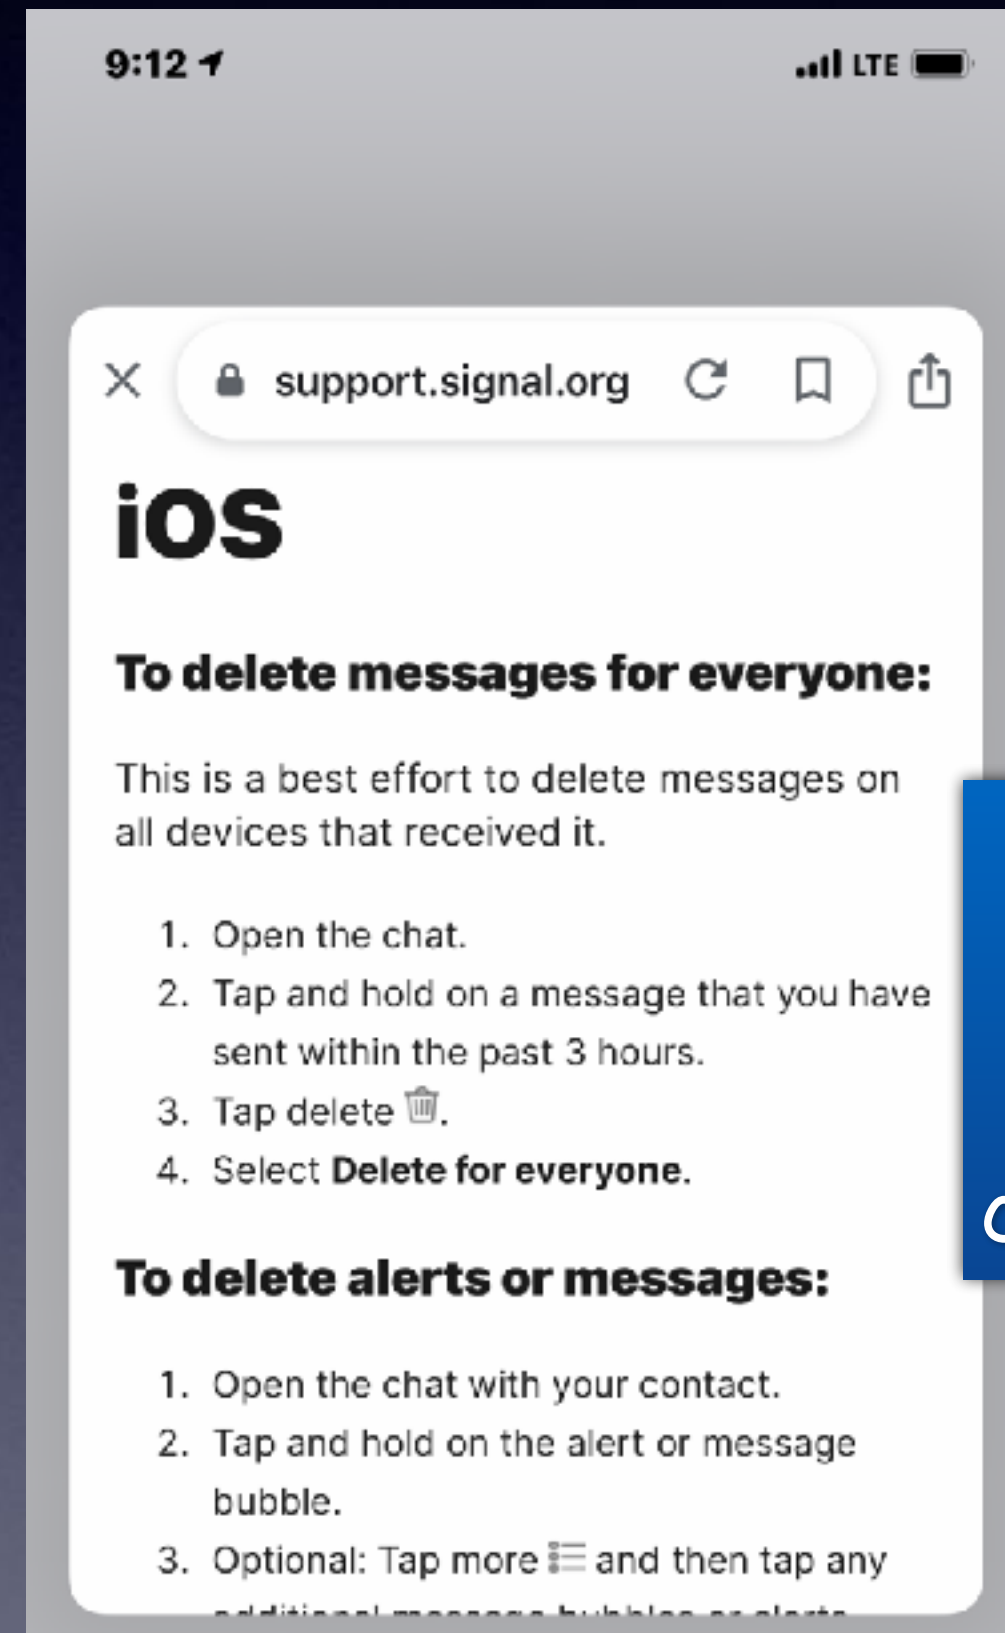

The most difficult job when working with a client:
Trying to recover lost or unknown passwords.

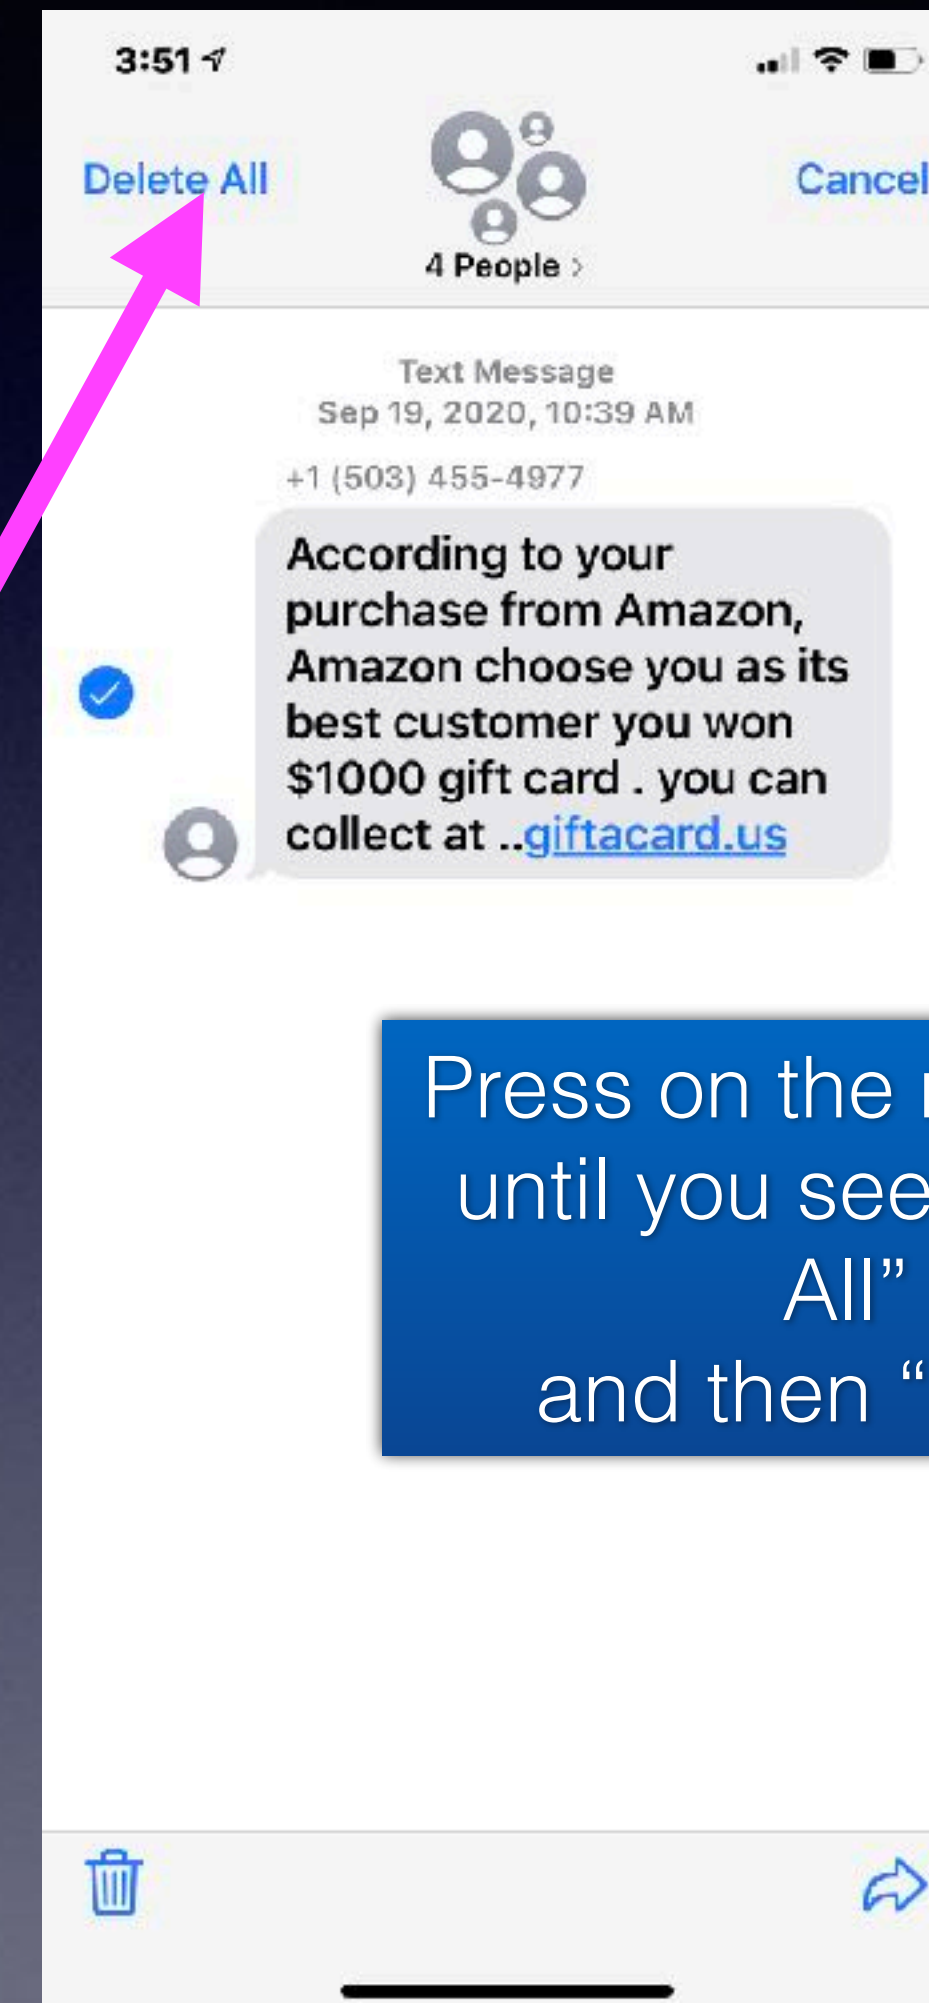

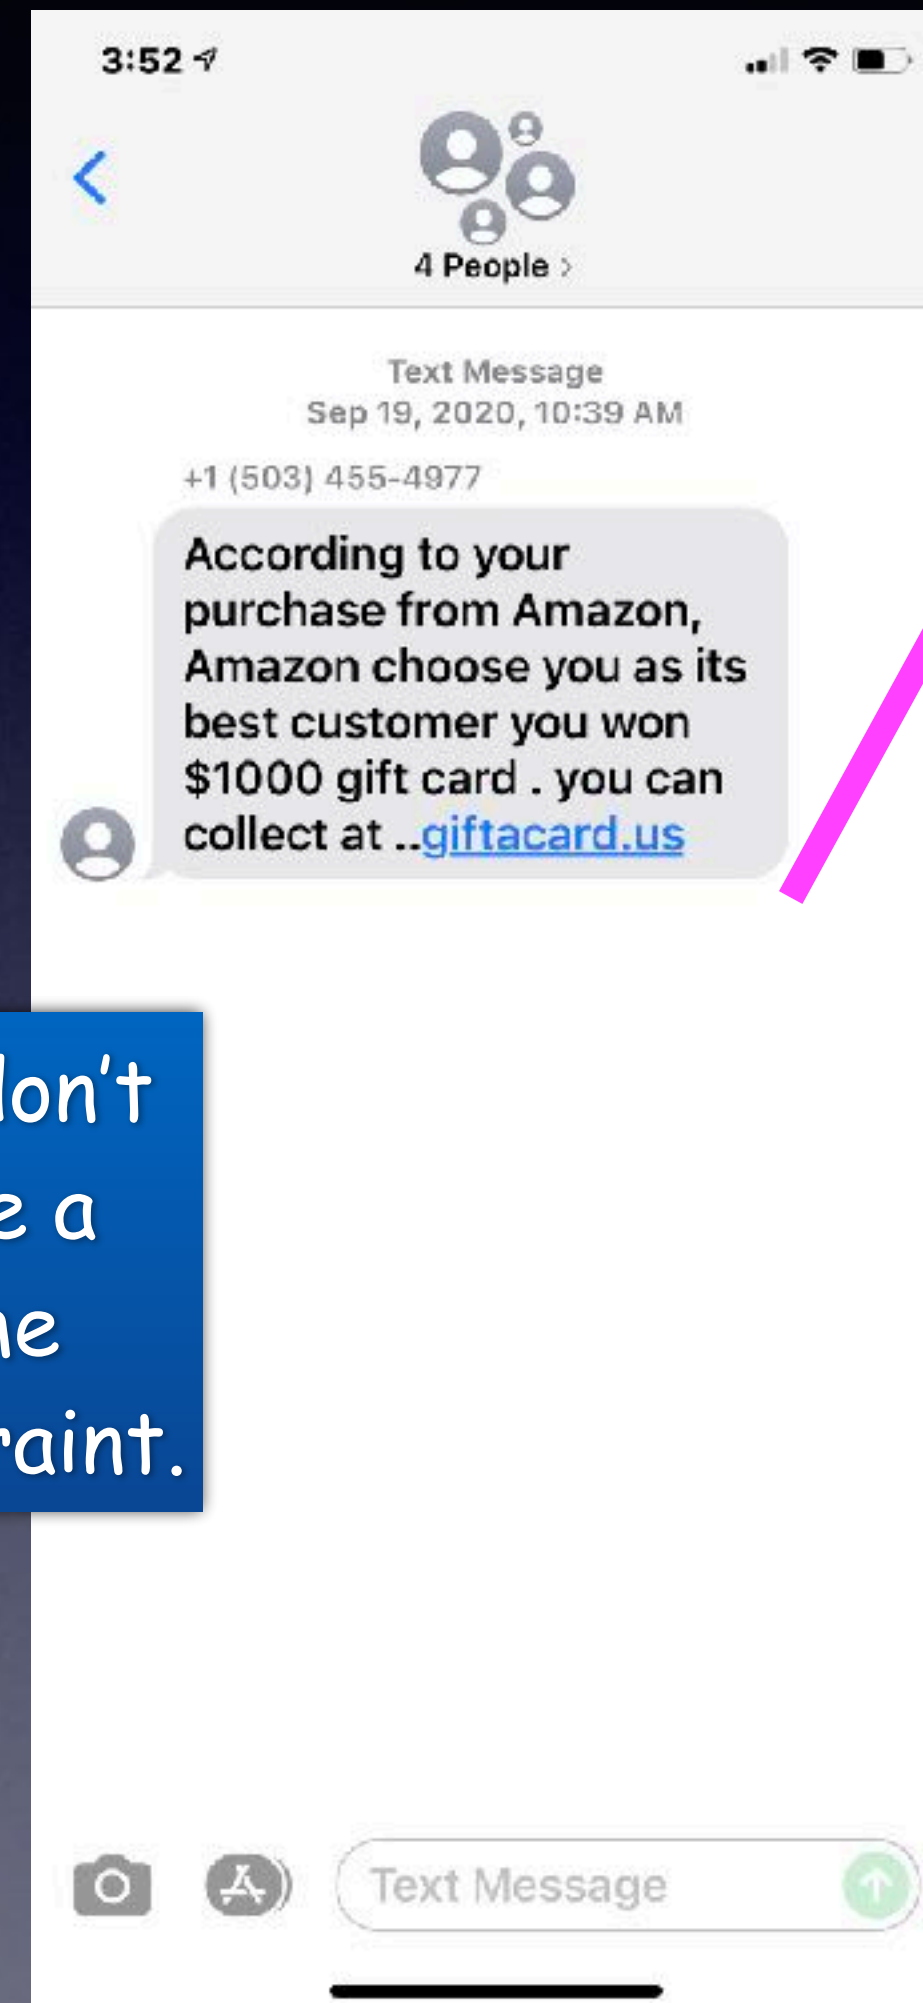

When setting a new password with any site: Be sure to save it. Safari will save passwords. It's done through Keychain in iCloud. Your iPhone, iPad and Apple computer will save them.

Deleting Group Texts!

You don't have a time constraint.

Press on the message until you see "Delete All" and then "do it"!

Using Face ID With A Mask!

<https://www.macworld.co.uk/how-to/use-unlock-iphone-wearing-mask-3787588/>

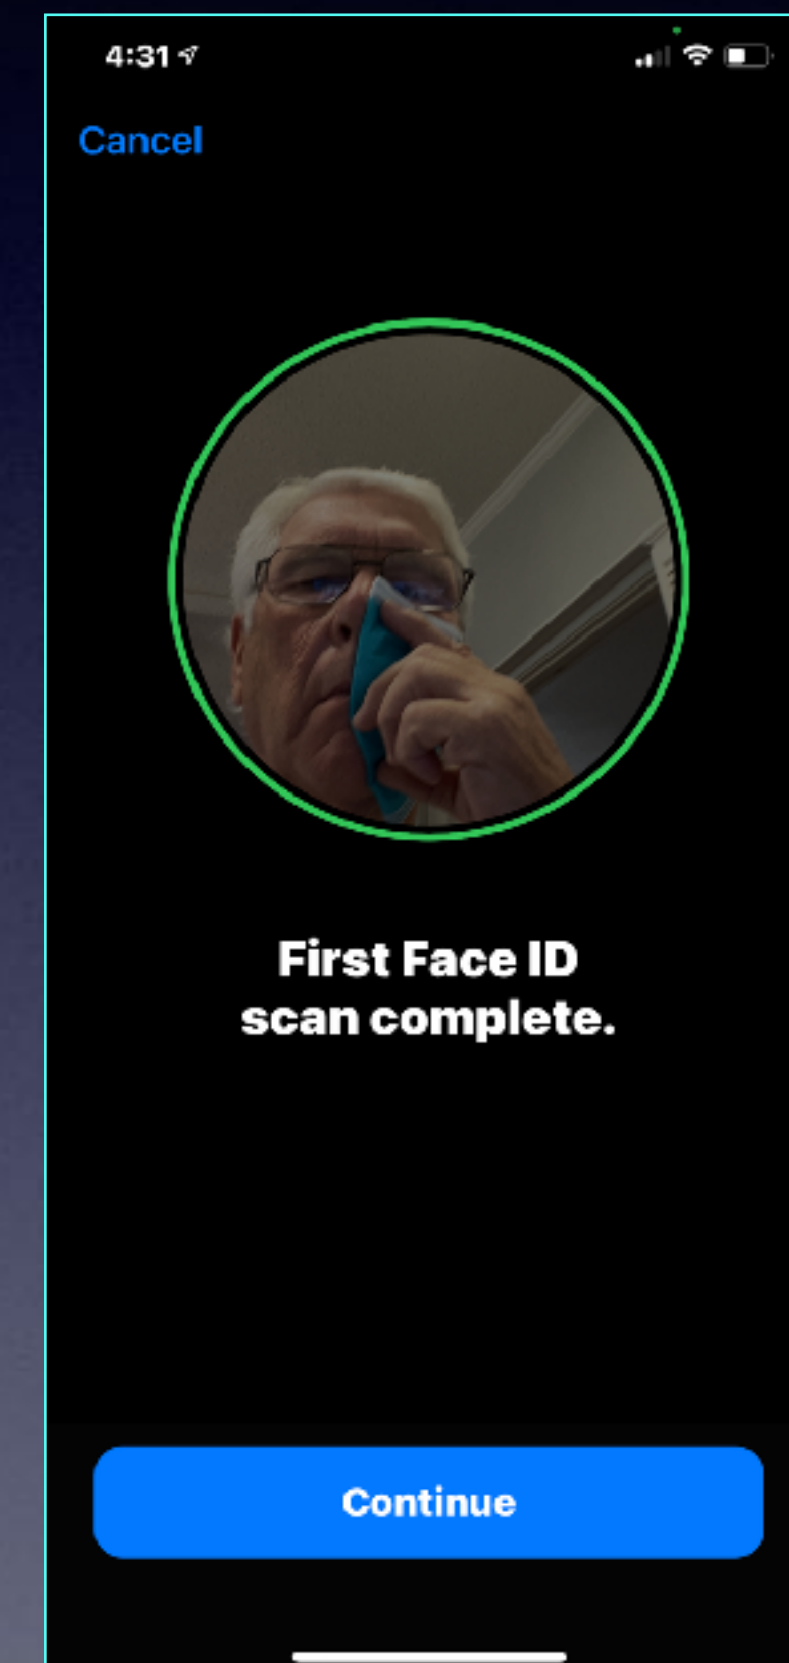

What you will need

- To use the new unlock iPhone with Apple Watch feature you will, obviously, need an Apple Watch. That watch needs to be running WatchOS 7.4 (which launched on 26 April).
- The Apple Watch needs to be on your wrist and unlocked.
- In addition you will need to have a passcode enabled on your iPhone (if you haven't got a passcode go to Settings > Passcode > Turn Passcode on).
- You also need to have Wrist Detection turned on.
- Your iPhone will need to be running iOS 14.5.

How to unlock iPhone with Apple Watch

You need to turn on the Unlock with Apple Watch feature on your [iPhone](#).

1. Open Settings
2. Face ID & Passcode
3. Enter your passcode
4. Choose Unlock with Apple Watch

Face ID With Mask!

Even if you don't have an Apple Watch.

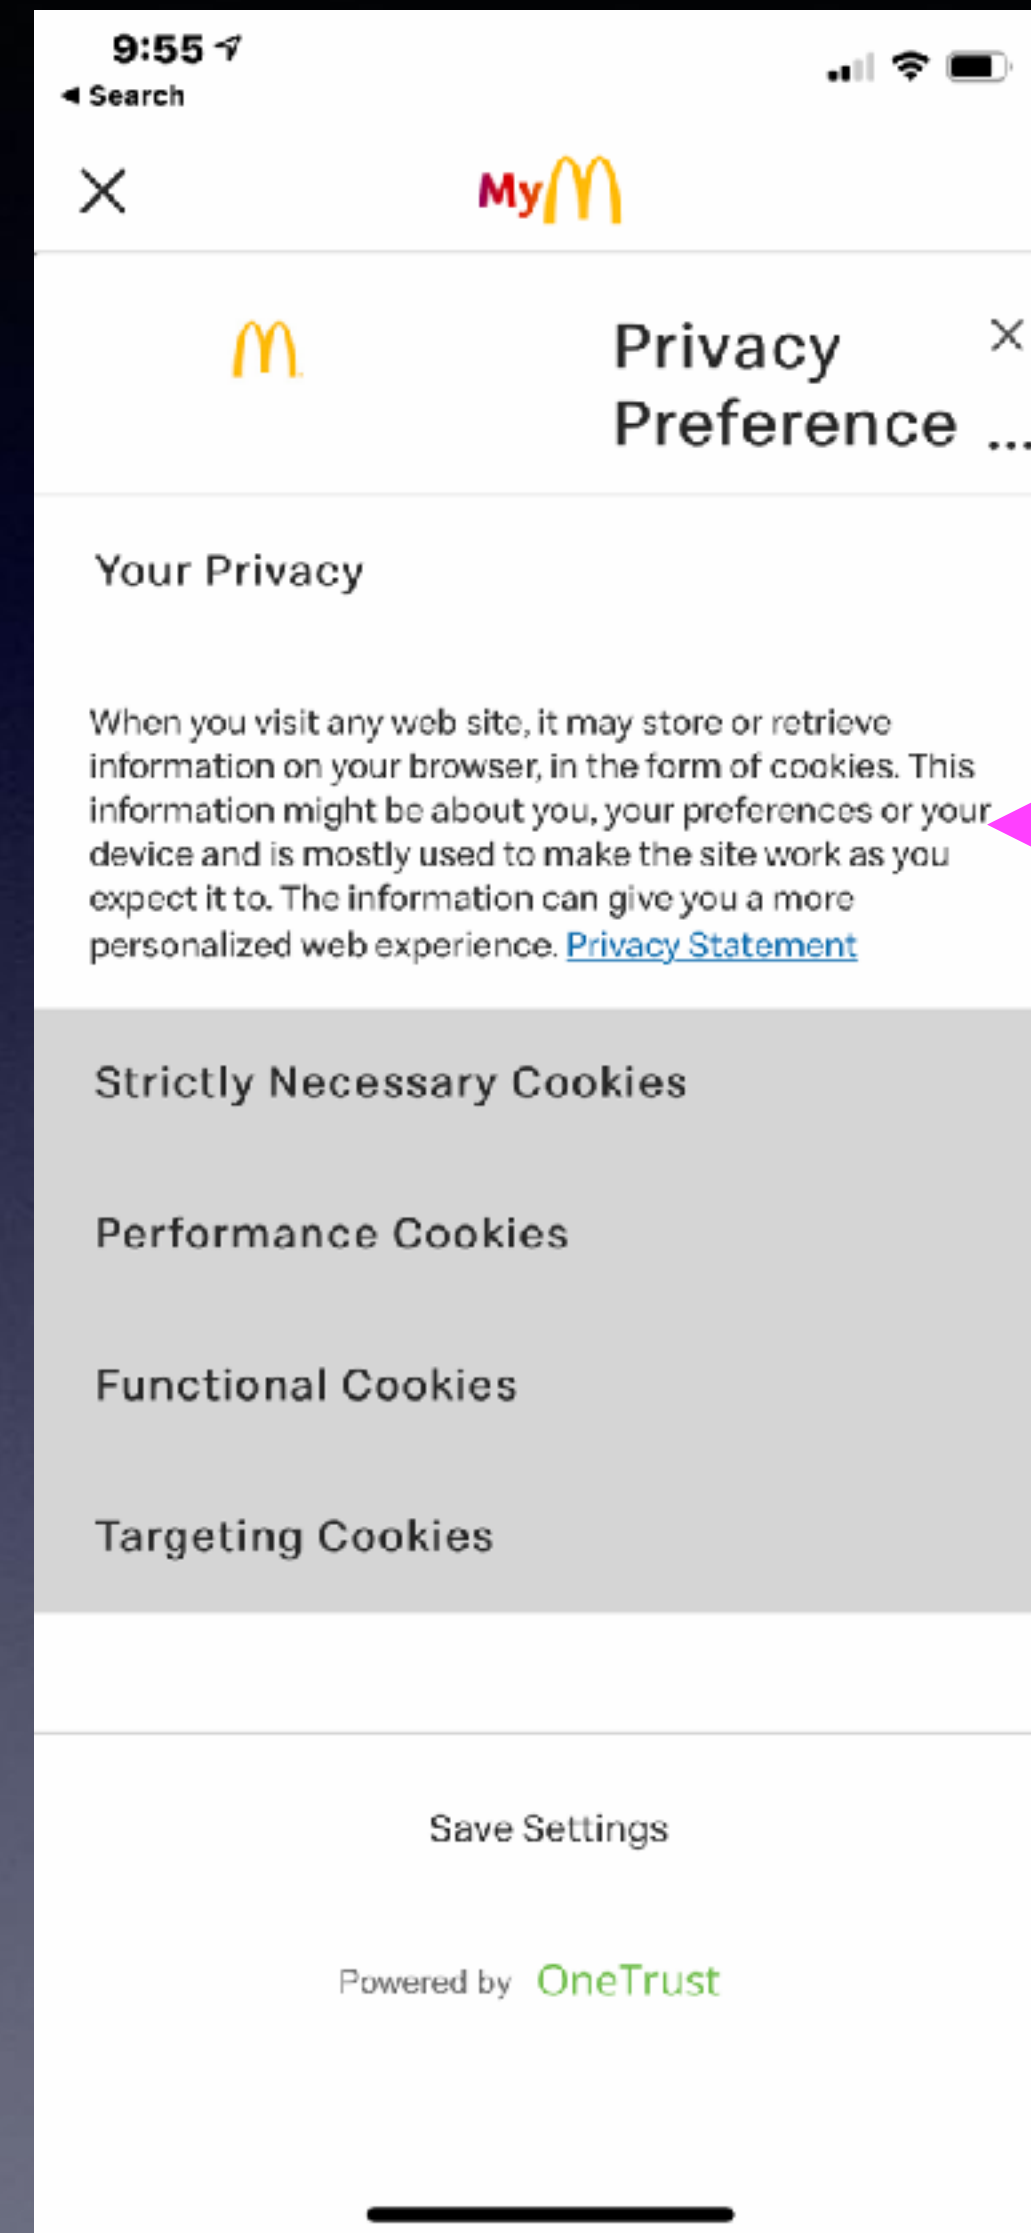

The image shows a YouTube video player interface. At the top, the YouTube logo and search bar are visible. The search bar contains the text "face id with mask iphone". The video content shows a man wearing a black mask over his nose and mouth, sitting at a desk. To his right, an iPhone screen is displayed, showing the "Face ID & Passcode" settings. The settings are as follows:

- Phone Unlock:
- iTunes & App Store:
- Apple Pay:
- Password AutoFill:
- Other Apps: 6 Apps >
- Reset Face ID: An alternate appearance has already been set up. To enroll another appearance, Face ID needs to be reset.
- ATTENTION: Require Attention for Face ID:
- Attention Aware Features:

At the bottom of the video player, there is a progress bar showing 3:01 / 6:08. Below the video, the text "#iPhone #FaceID #MaskID" and "Unlock iPhone with Face Mask without Apple Watch! (Face ID with a Mask Setup)" are visible.

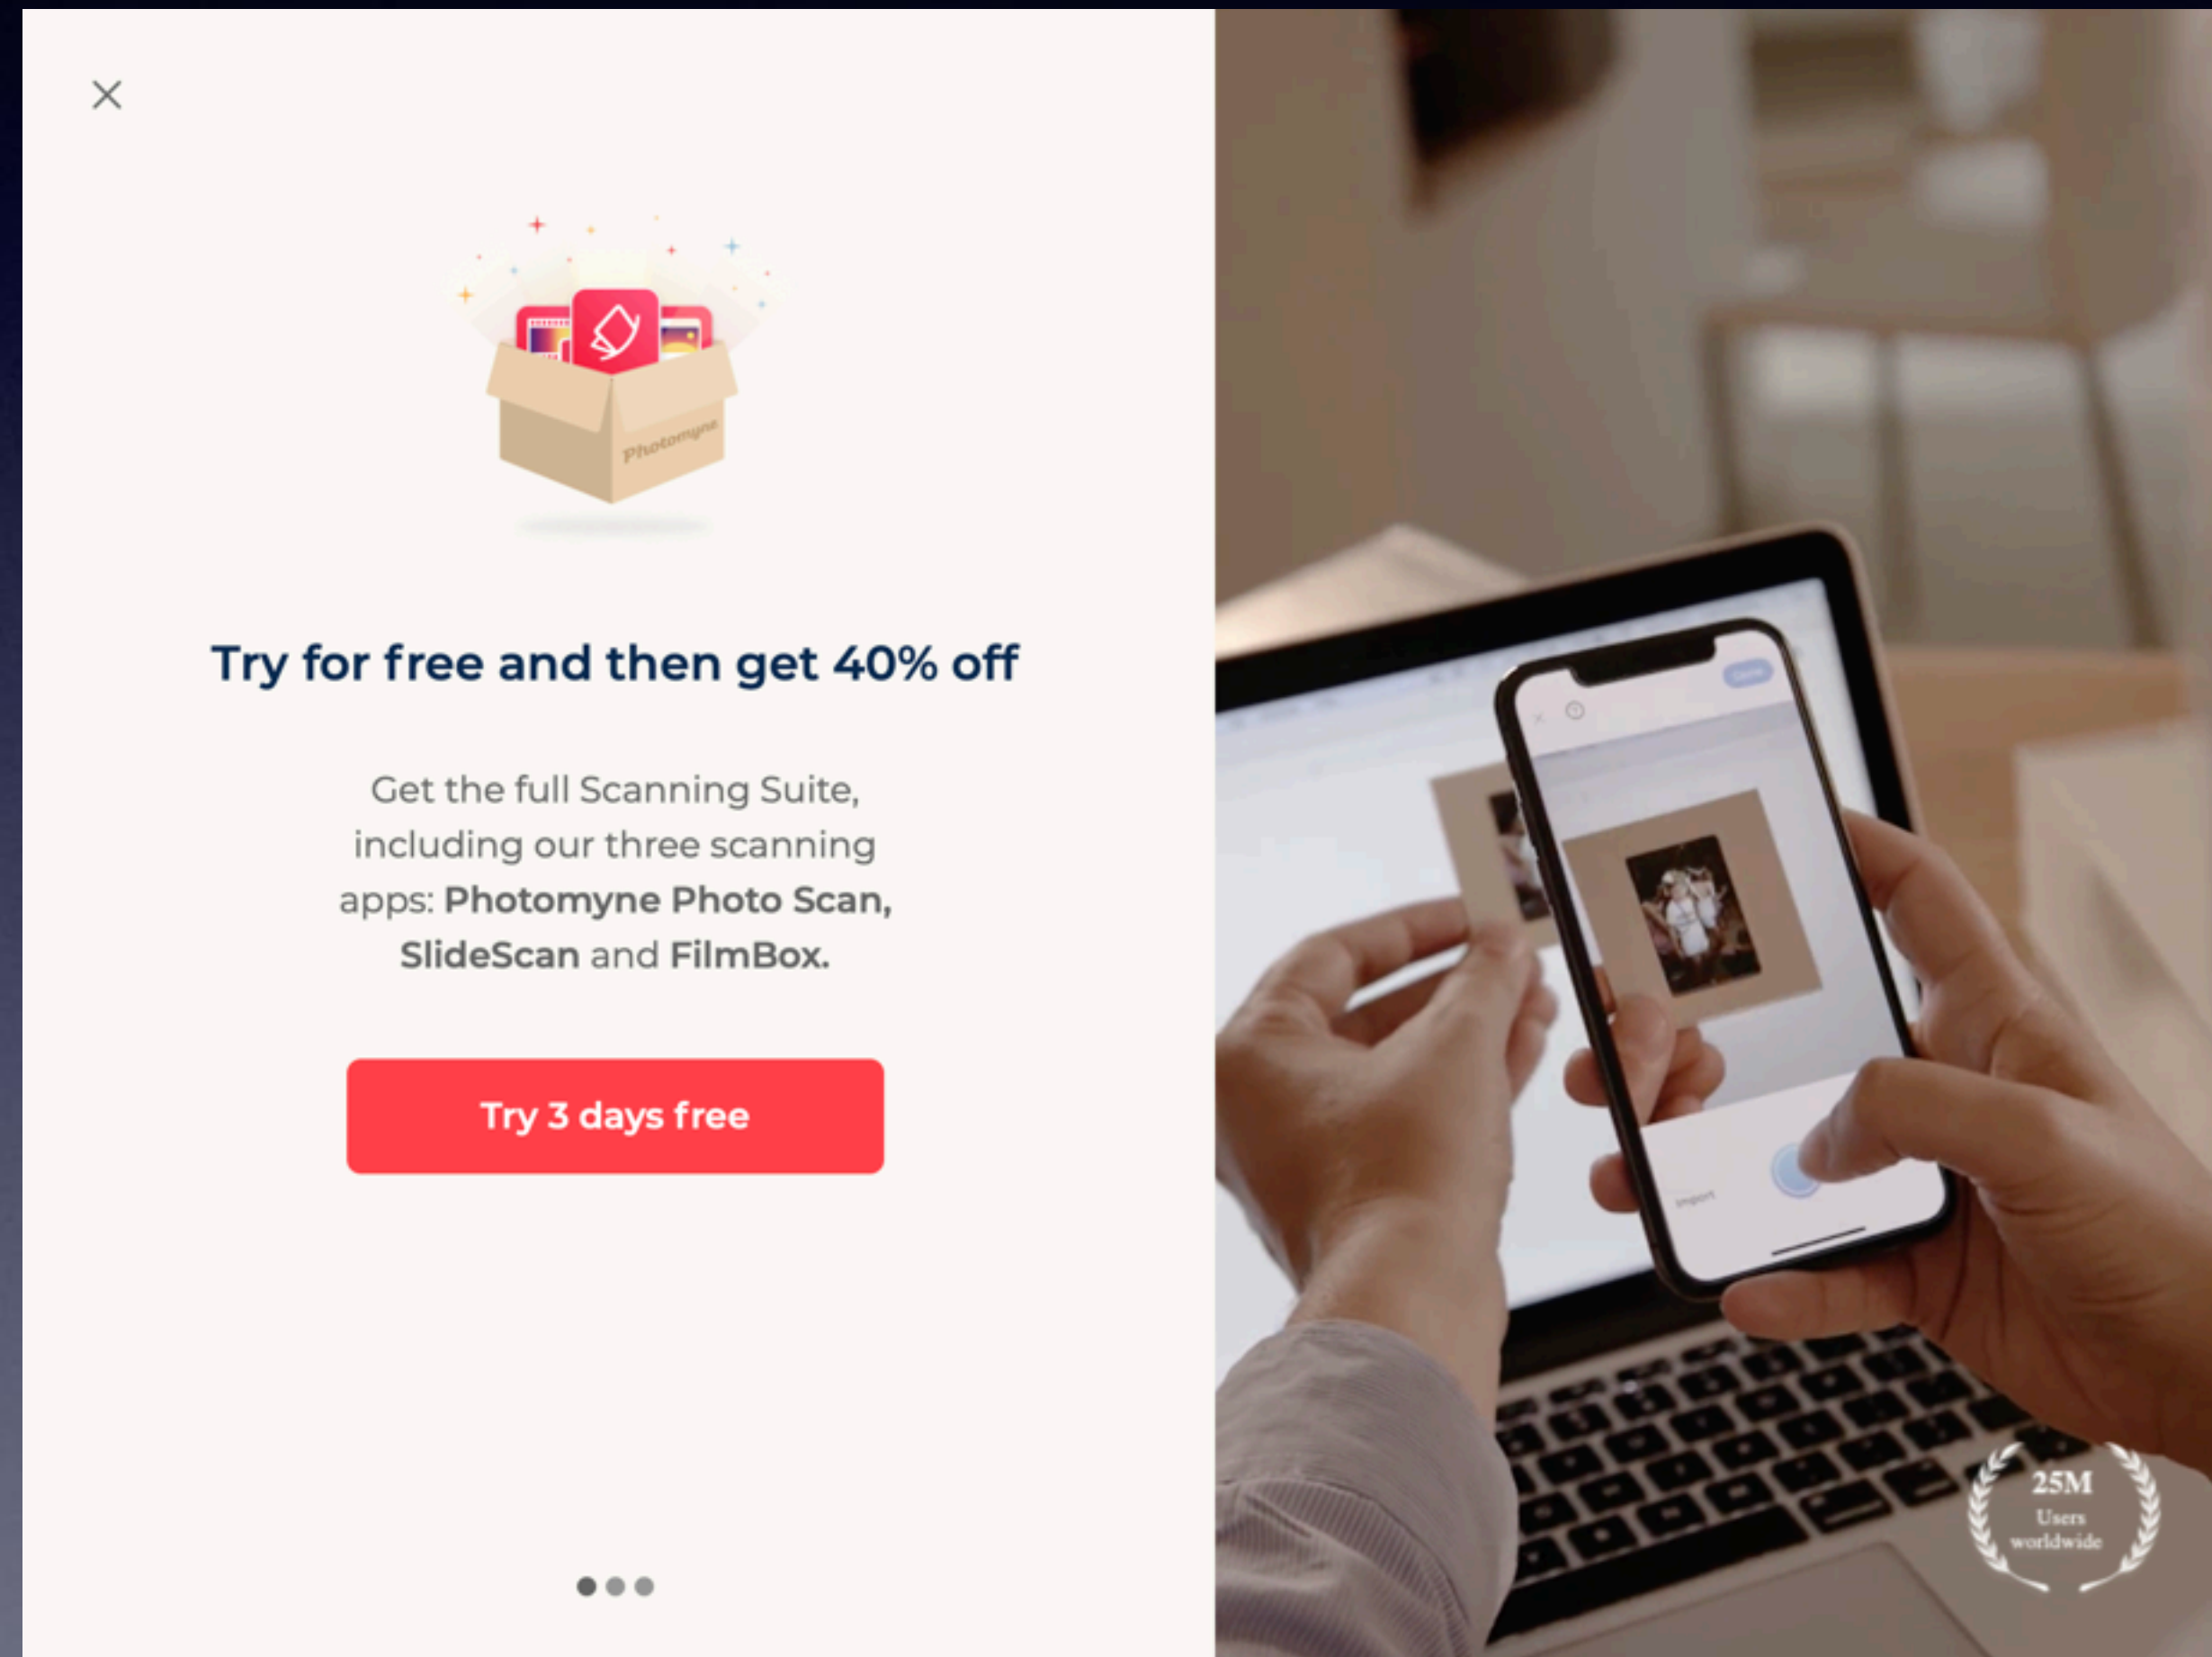

What Are Cookies?

This message is Apple's way of warning you that you are giving a Web site some of your personal info!

Scanning Slides and Negatives Using My iPhone!

The advertisement is split into two main visual areas. On the left, a white card with a close button (X) in the top left corner features an illustration of a cardboard box labeled 'Photomyne' overflowing with colorful icons representing different scanning applications. Below this, the text reads 'Try for free and then get 40% off' in bold, followed by 'Get the full Scanning Suite, including our three scanning apps: Photomyne Photo Scan, SlideScan and FilmBox.' A prominent red button with white text says 'Try 3 days free'. At the bottom of the card are three small grey dots. On the right, a photograph shows a person's hands holding an iPhone over a laptop. The phone's screen displays a scanning application interface with a photo of a group of people. In the bottom right corner of the photo, there is a circular badge with a laurel wreath border containing the text '25M Users worldwide'.
