Press and keep holding the side button and either volume button to make an emergency call.

Call with Side Button

Call Emergency SOS when you rapidly press the side button 5 times. Pressing and holding the side button along with the volume buttons will continue to work when this is on.

Auto Call

You may still need to specify an emergency service to dial when using Emergency SOS in certain regions. Auto Call requires a SIM card.

EMERGENCY CONTACTS

Set Up Your Medical

Setting up the Medical ID in the Health app on your iPhone

Medical ID helps first responders access your critical medical information from the Lock screen, without needing your passcode. They can see information like allergies and medical conditions as well as who to contact in case of an emergency.

How to set up your Medical ID

Open the Health app and tap the Summary tab. Tap your profile picture in the upper-right corner. Under Medical Details, tap Medical ID. Tap Edit in the upper-right corner. To make your Medical ID available from the Lock screen on your iPhone, turn on Show When Locked. In an emergency, this gives information to people who want to help. Enter health information like your date of birth, allergies, and blood type.

Tap Done.

**** * Ben AM * Medical ID	Edit	Cancel st Medical ID D

What If You Don't (Own) Have Wi-Fi?

You could go to a local business that has a free Hotspot. Hotels (motels) have free Wi-Fi.

Good morning Tom! I've got a real problem. My FB account has been hacked with someone else's identity so I can't get into it or Messenger. I'm not sure but I think they've done something with my email address as well. I'm still receiving emails but I'm afraid they're able to access other info. I don't know if you're booked tomorrow but I would appreciate it if you can come over tomorrow anytime to help me. Wish I could today but I've got somewhere to go from 2:00 to probably 3:30 or 4:00 maybe longer this afternoon. Please let me know if you could come today from 11-12 or tomorrow. Thank you

Also just FYI I did get notified from ADT & Amazon that someone tried to order over \$1,000 iPhone from my account to be sent to a different address than mine. So at least they're watching.

I denied payment

Be very wary of free Wi-Fi Hotspots!

Security Dangers of Public Wi-Fi

My Alternative To Dangerous Free Local Hotspots!

Common "free" Hotspots: The library, McDonalds, Starbucks, Hotels, Walmart, Airlines & Airports, etc.

Cafe's: some of the best places for hackers!
