Look for “Blog”!

This is a learning class...some things may be new to you. Learning (a foreign language) is not easy.

5G Will Be Delayed!

Even Though It Shows To Be Available On iPhones 12 and 13.

FFA warns pilots of 5G interfering with cockpit systems!

AT&T, Verizon to Delay 5G As FAA Weighs Airline Safety

BY ANDREW TANGEL
AND DREW FITZGERALD

AT&T Inc. and Verizon Communications Inc. agreed to delay their planned Dec. 5 rollout of a new 5G frequency band so they can work with the Federal Aviation Administration to address concerns about potential interference with key cockpit safety systems.

The cellphone carriers said Thursday they would delay their planned 5G deployments until Jan. 5, responding to the aviation regulator's warnings

while disputing claims that the proposed cellular signals would represent a danger.

The FAA, a unit of the U.S. Transportation Department, had been planning to issue official mandates as soon as this week that would limit pilots' use of certain automated cockpit systems such as those that help planes land in poor weather, according to government and industry officials familiar with the planned orders. Those limits would aim to avoid potential interference from wireless towers

on the ground transmitting new 5G signals.

Such limits for pilots could disrupt passenger and cargo flights in the 46 metropolitan areas where the towers are located, aviation industry officials have said.

Telecom industry officials have disputed the need for more safeguards, saying that available evidence doesn't show that the proposed 5G signals will interfere with flight equipment. Cellphone carriers in some other countries already use the wireless

frequencies in question.

The Federal Communications Commission, which oversees telecom regulations, issued a statement with the FAA later Thursday confirming the voluntary pause.

"Aviation safety and technology leadership are national priorities, and with today's announcement these companies have demonstrated their commitment to both," the federal agencies said, naming both carriers. The agencies said they would continue working

FATHER OF SLAIN UCLA GRAD STUDENT BLAMES POLITICIANS FOR CRIME SPIKE

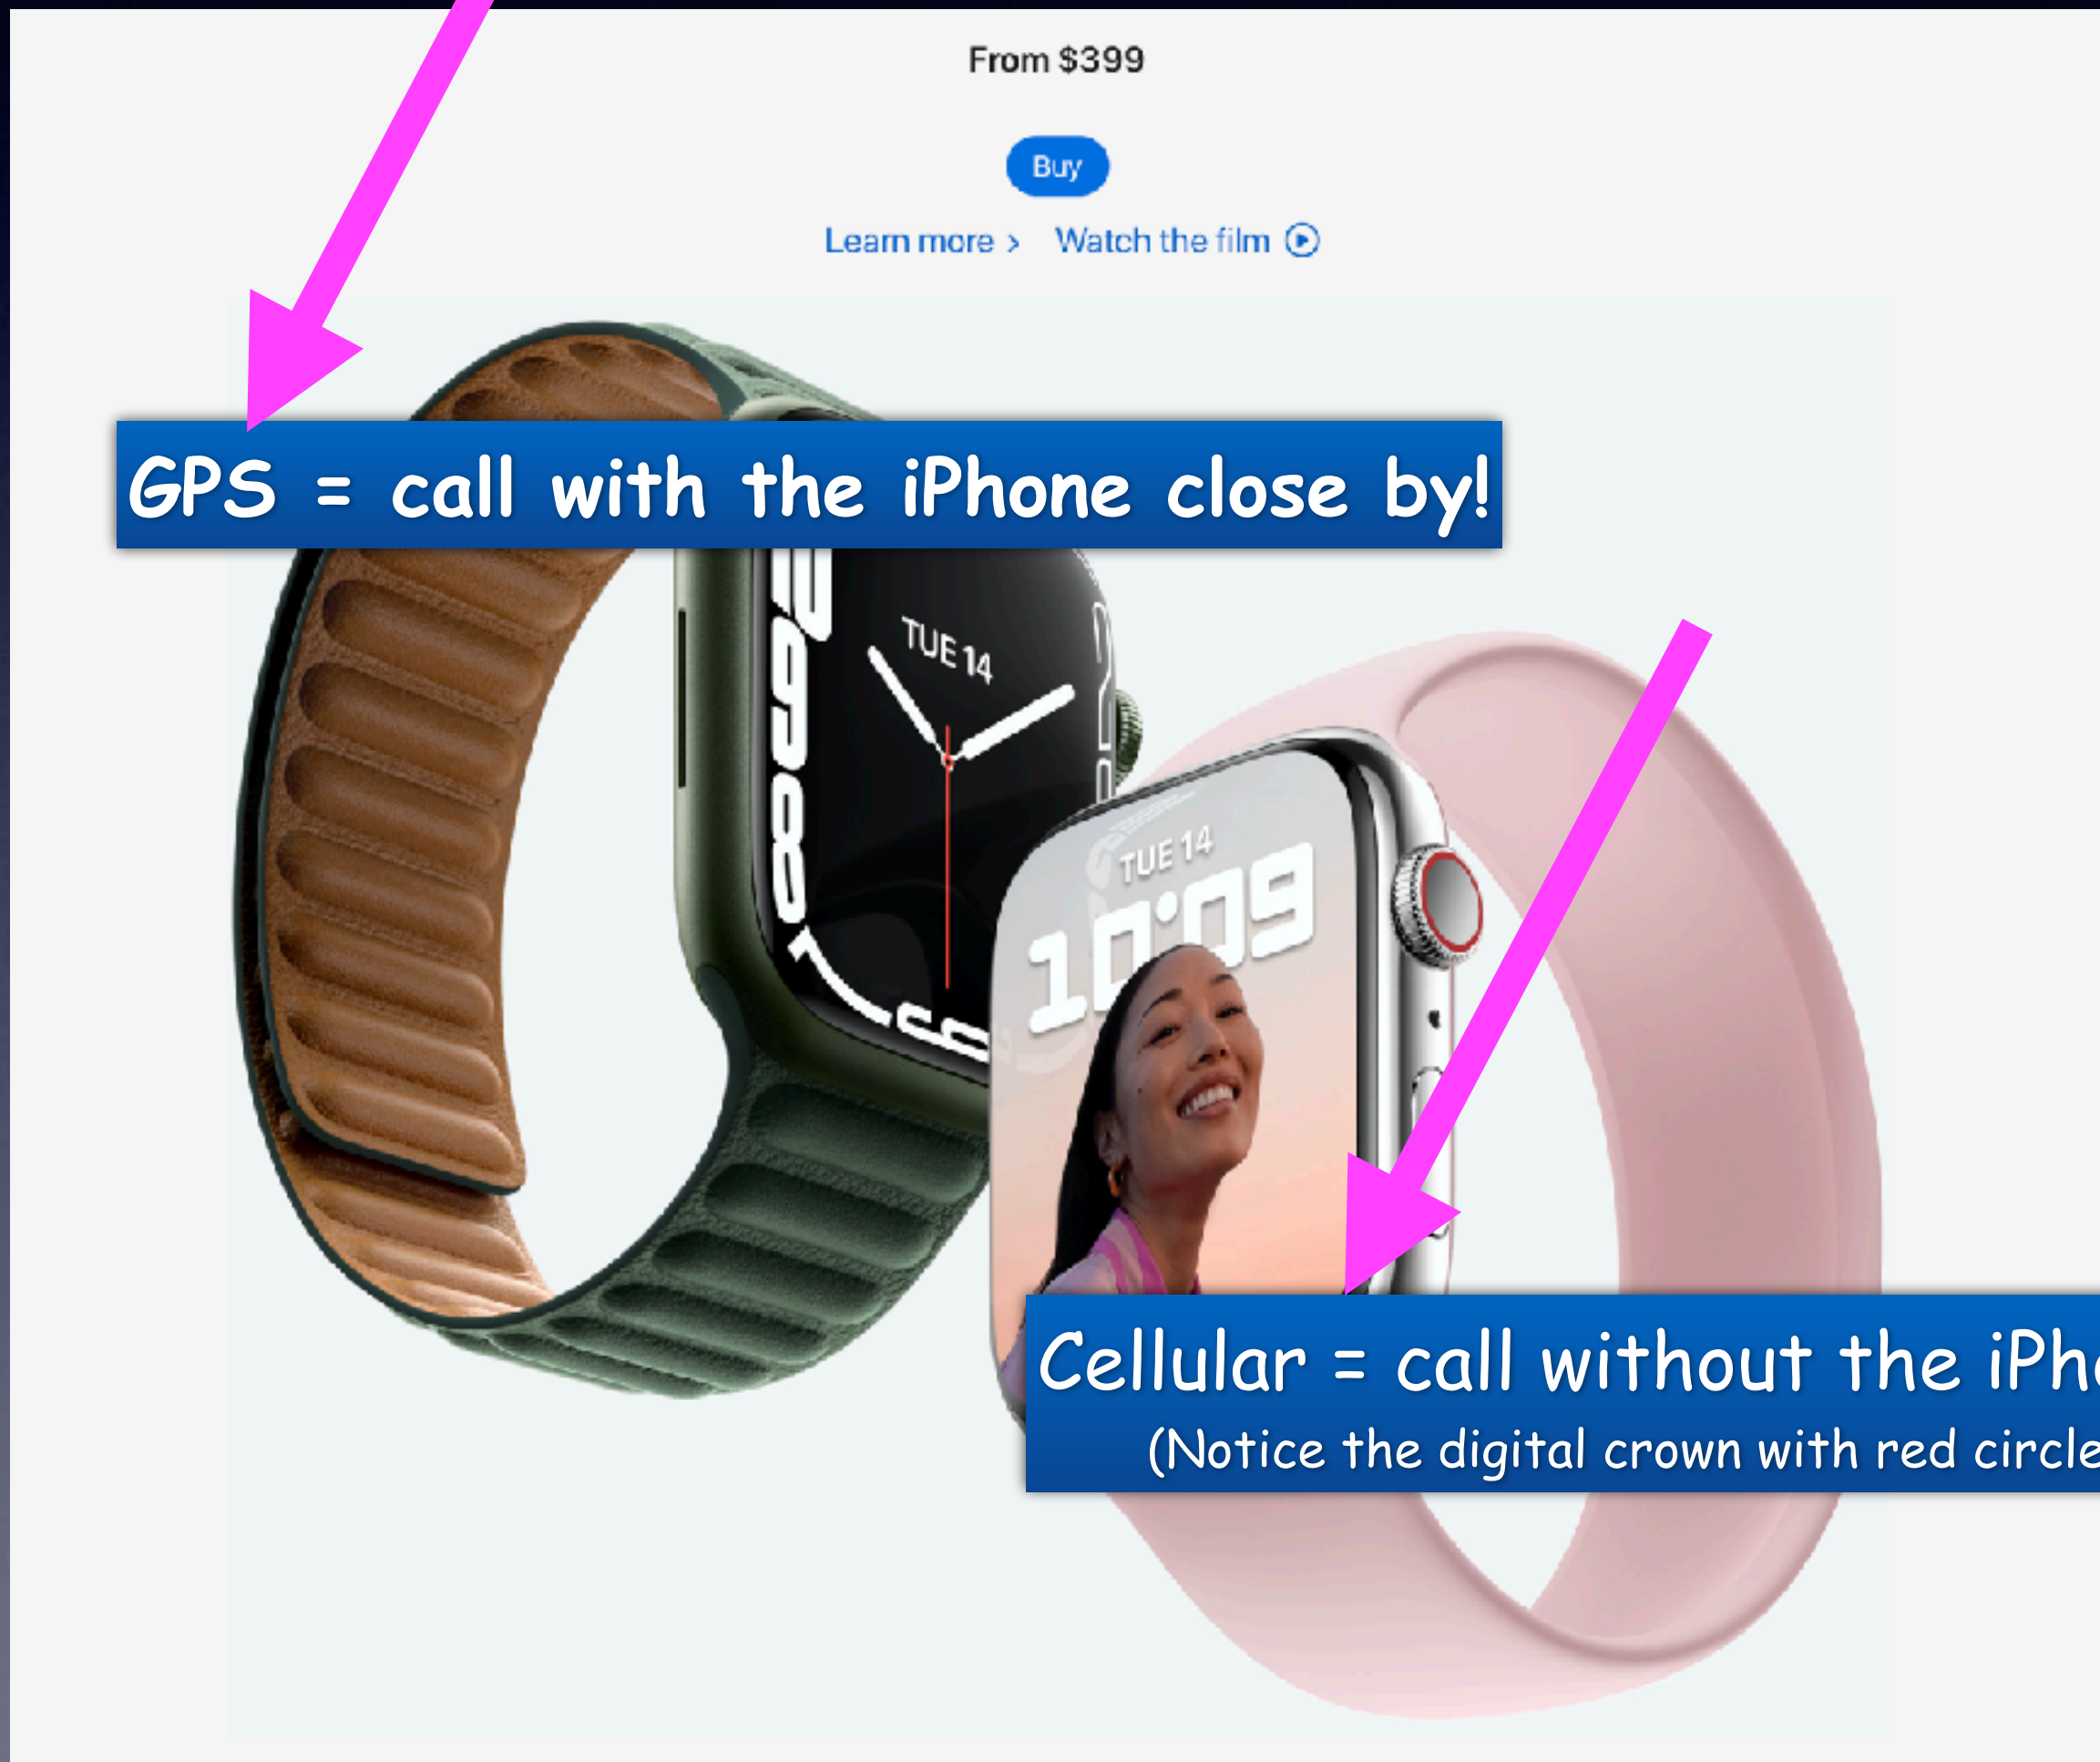

Smith allegedly walked into a furniture store on North La Brea Avenue on Jan. 13 and stabbed Kupfer to death moments after she texted a friend to say a man in the store was making her uncomfortable.

→ "She sent a text to a friend letting her know that there was someone inside the location that was giving her a bad vibe," LAPD Lt. John Radtke said of the Jan. 13 slaying. "Regrettably, that person did not see the text immediately."

Anyone who sees him should call 911 and no approach, police said Tuesday evening.

A Case For The Apple Watch With Cellular!

Apple makes two very different Apple Watches!

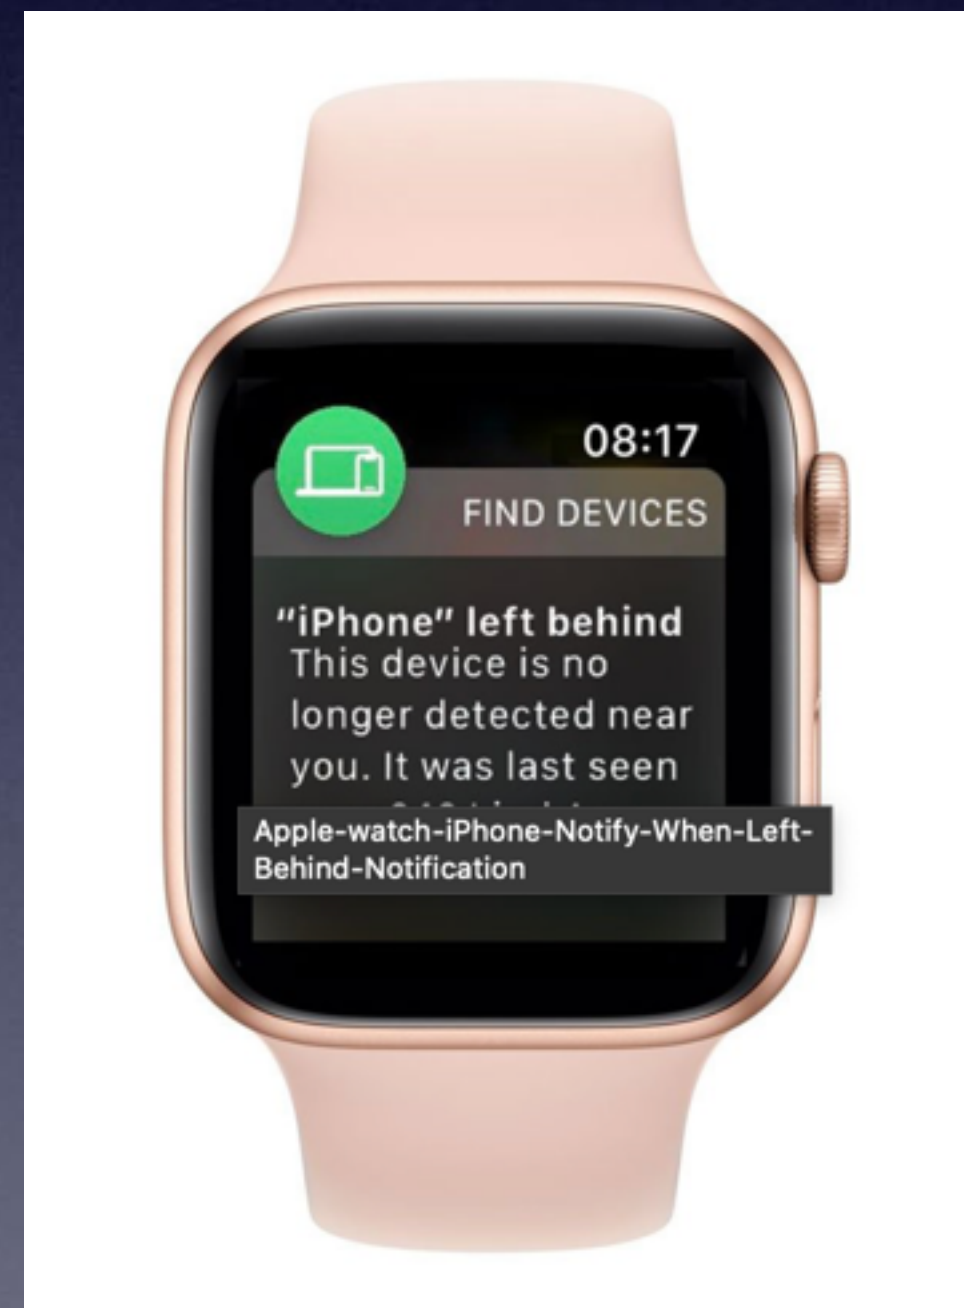

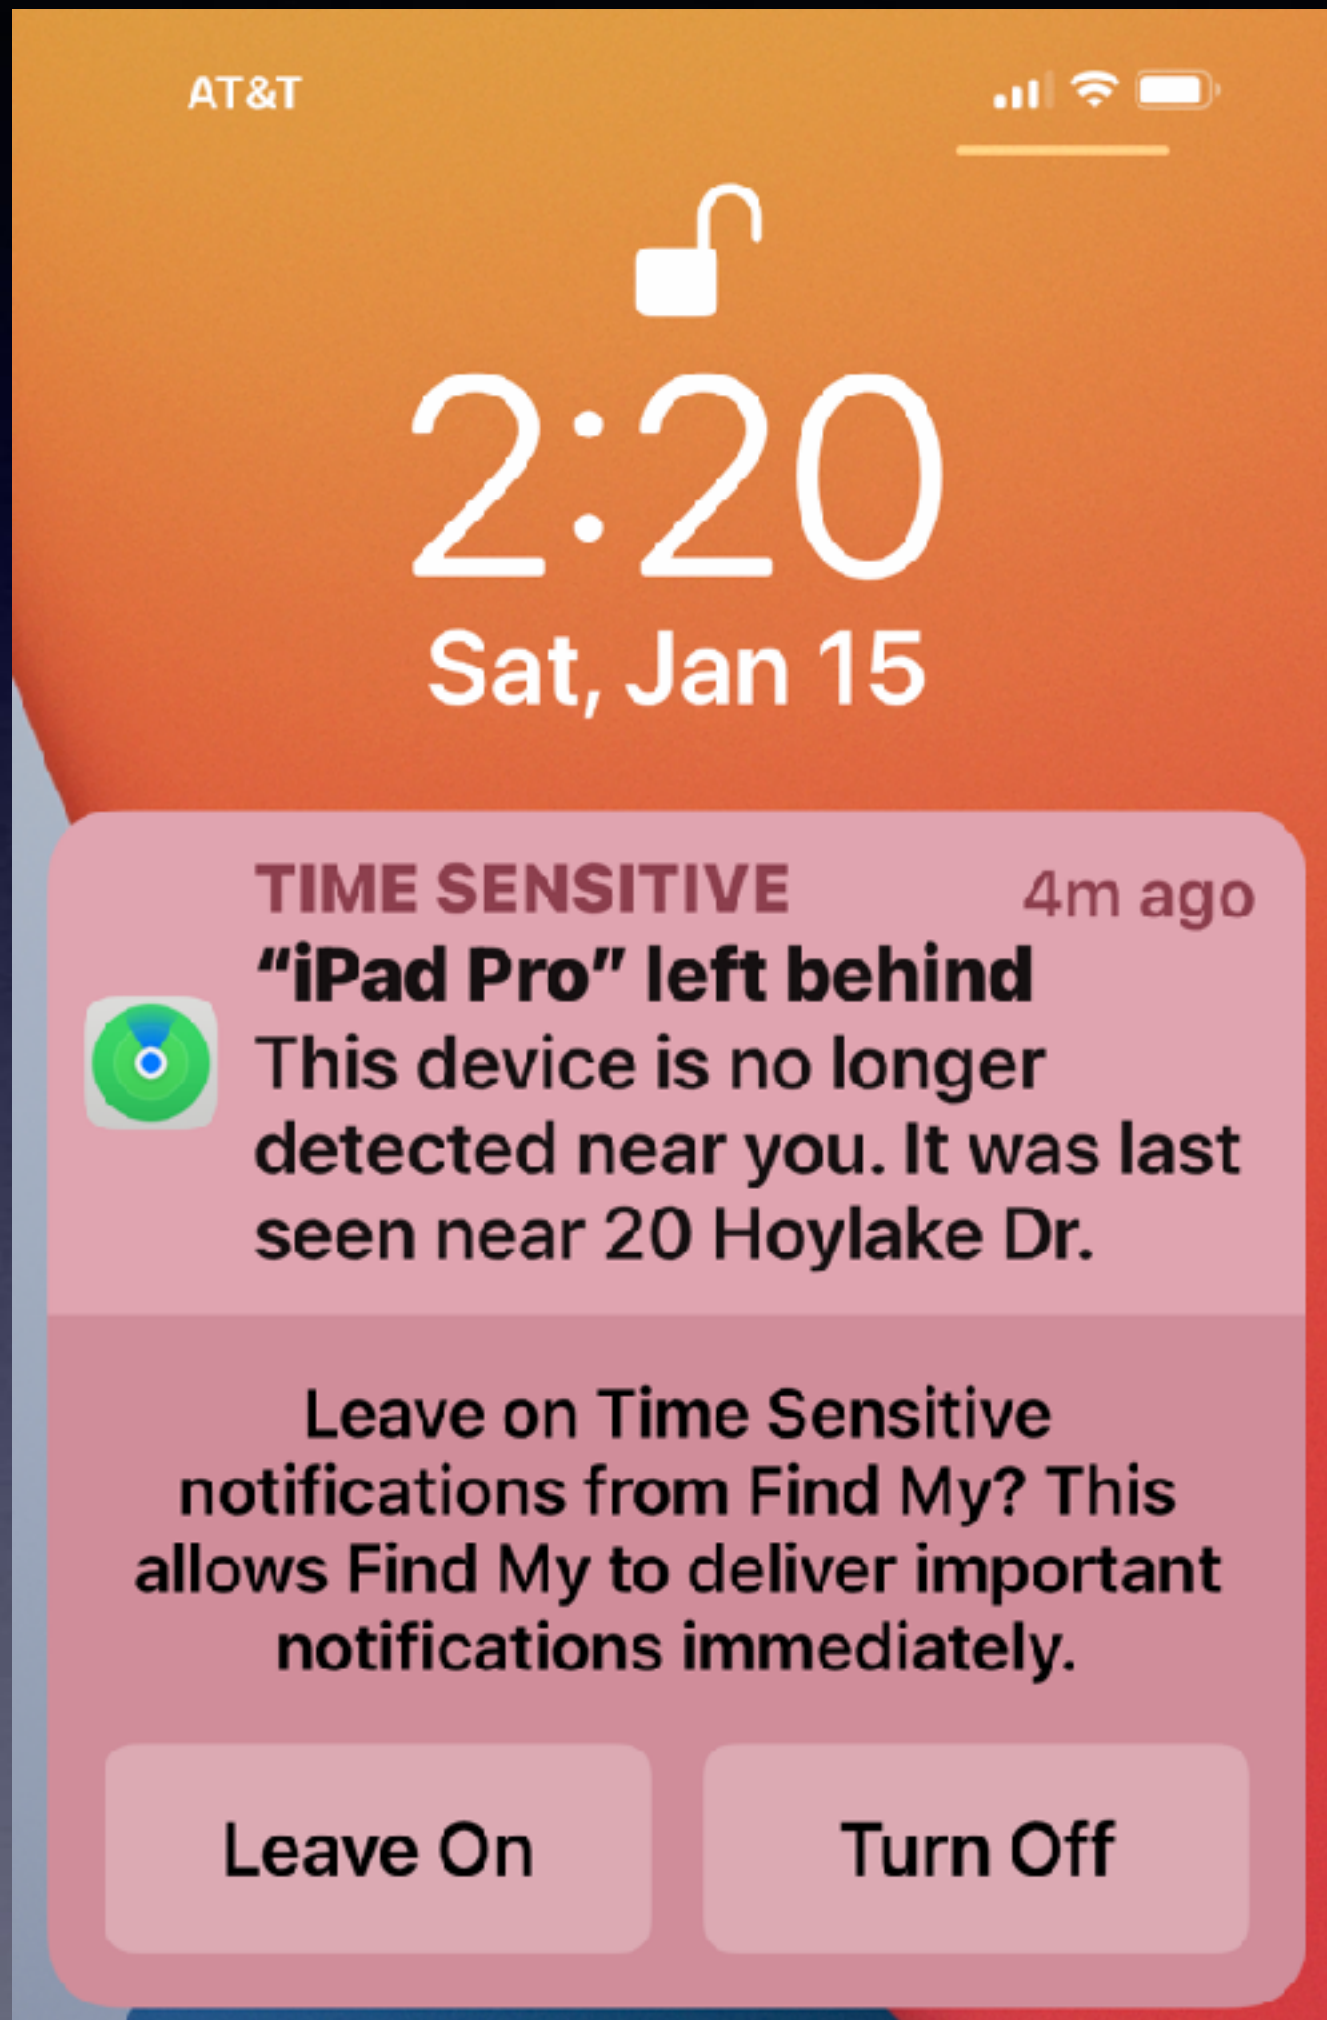

Suppose you don't have a landline or damaged your iPhone!

If you can't keep your iPhone on you; keep it close. You can make and receive telephone calls, text messages & SOS!

If you purchase the cellular version; usually about \$100 more, you can do text, make phone calls and SOS without the iPhone!

I Left My Device Behind!

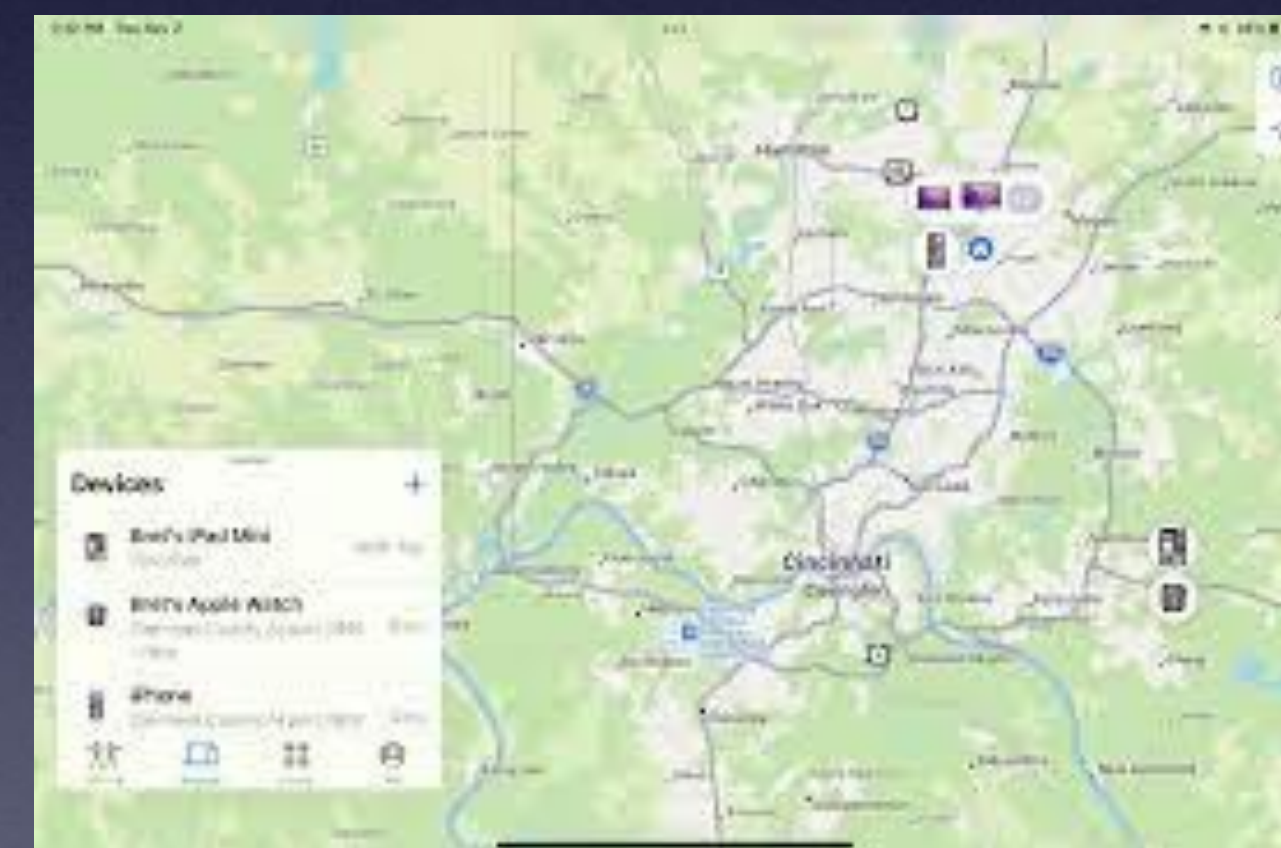

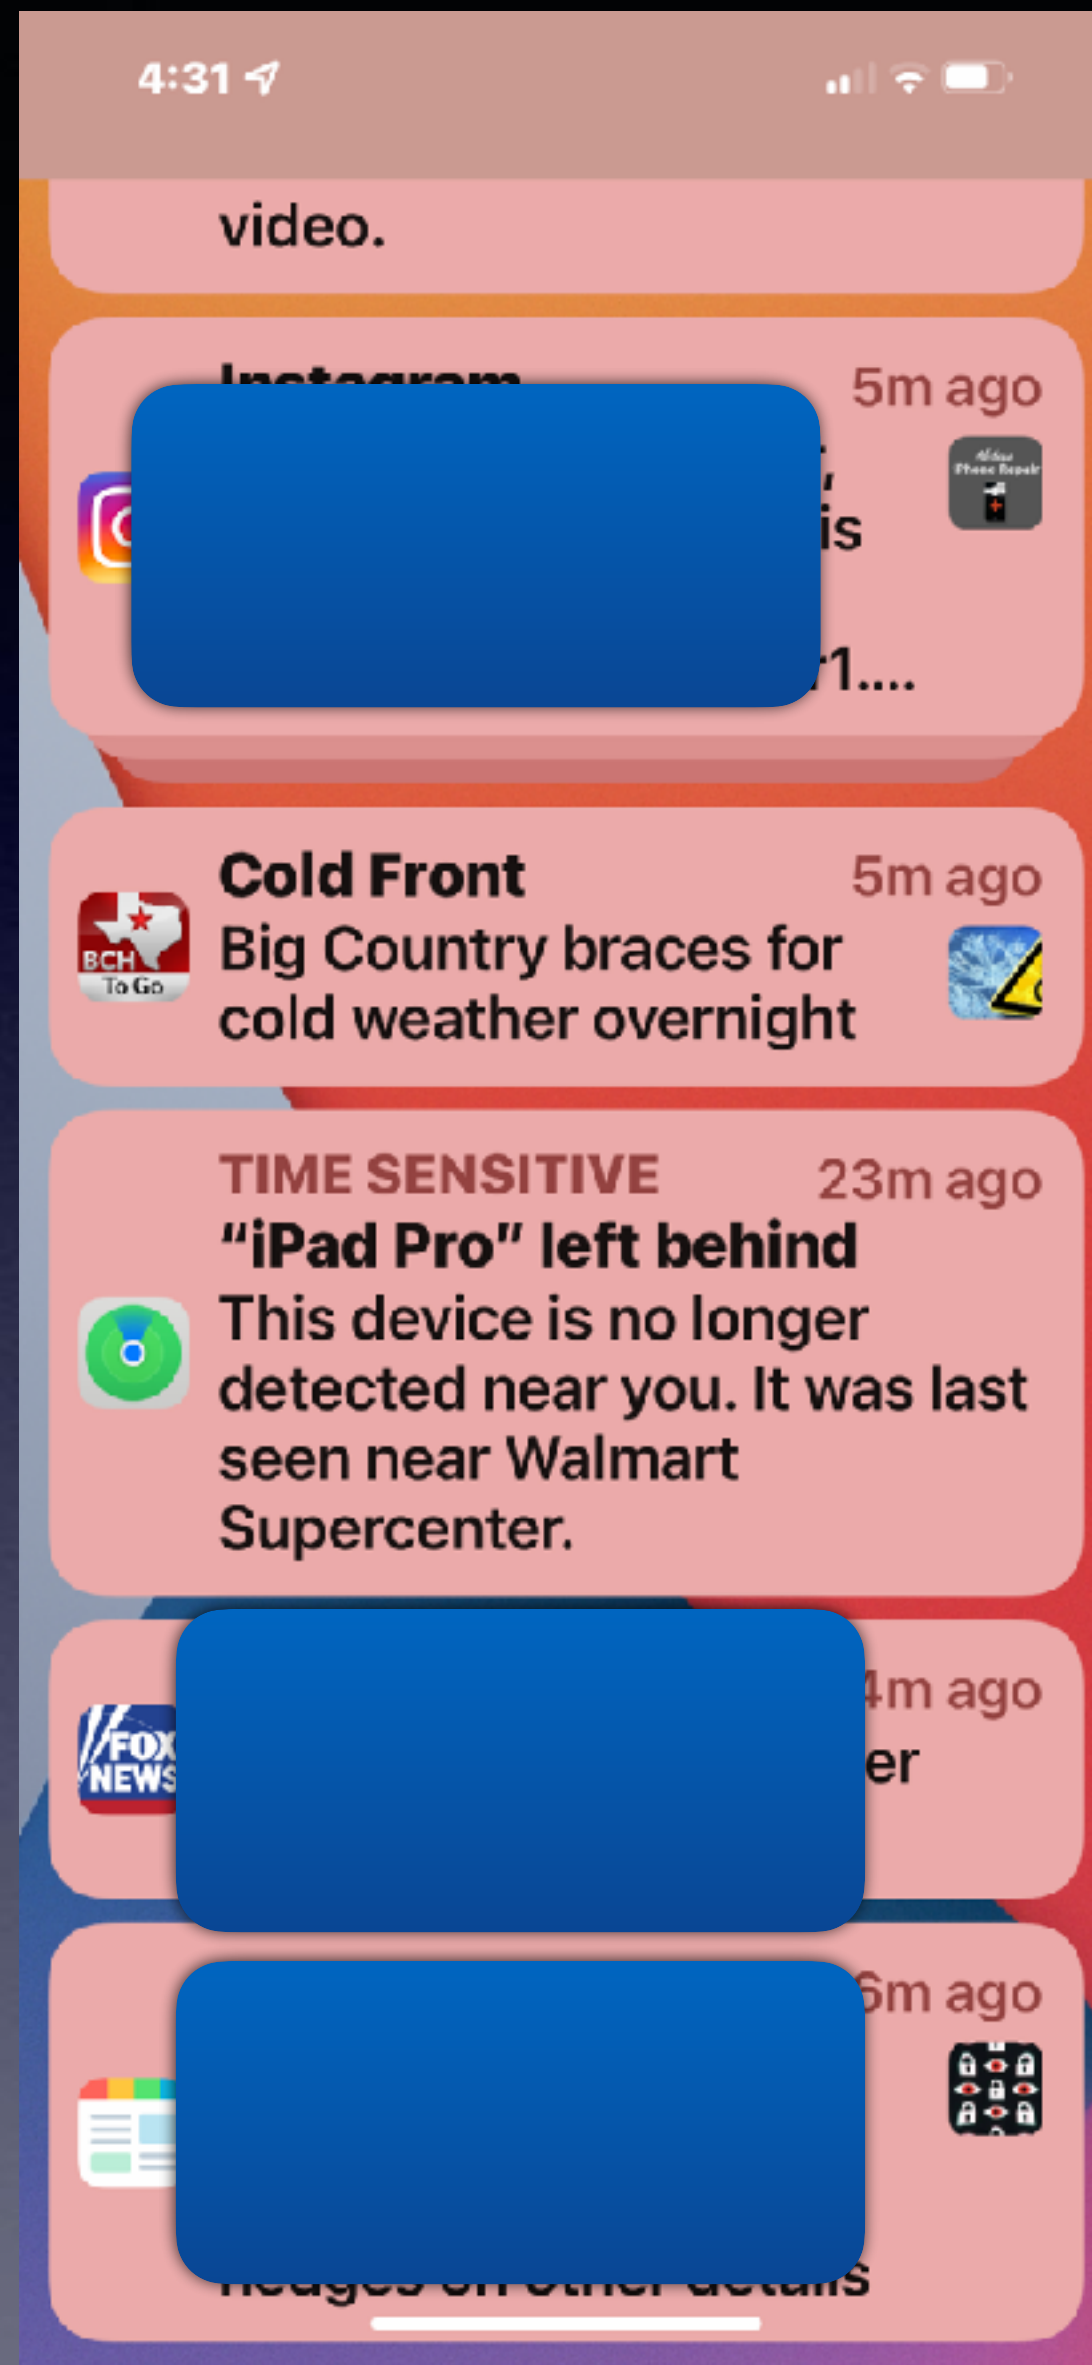

How it works. It's pretty simple. Using Bluetooth, your device recognizes when it's not in the vicinity of another device. They must be connected to your iCloud account!

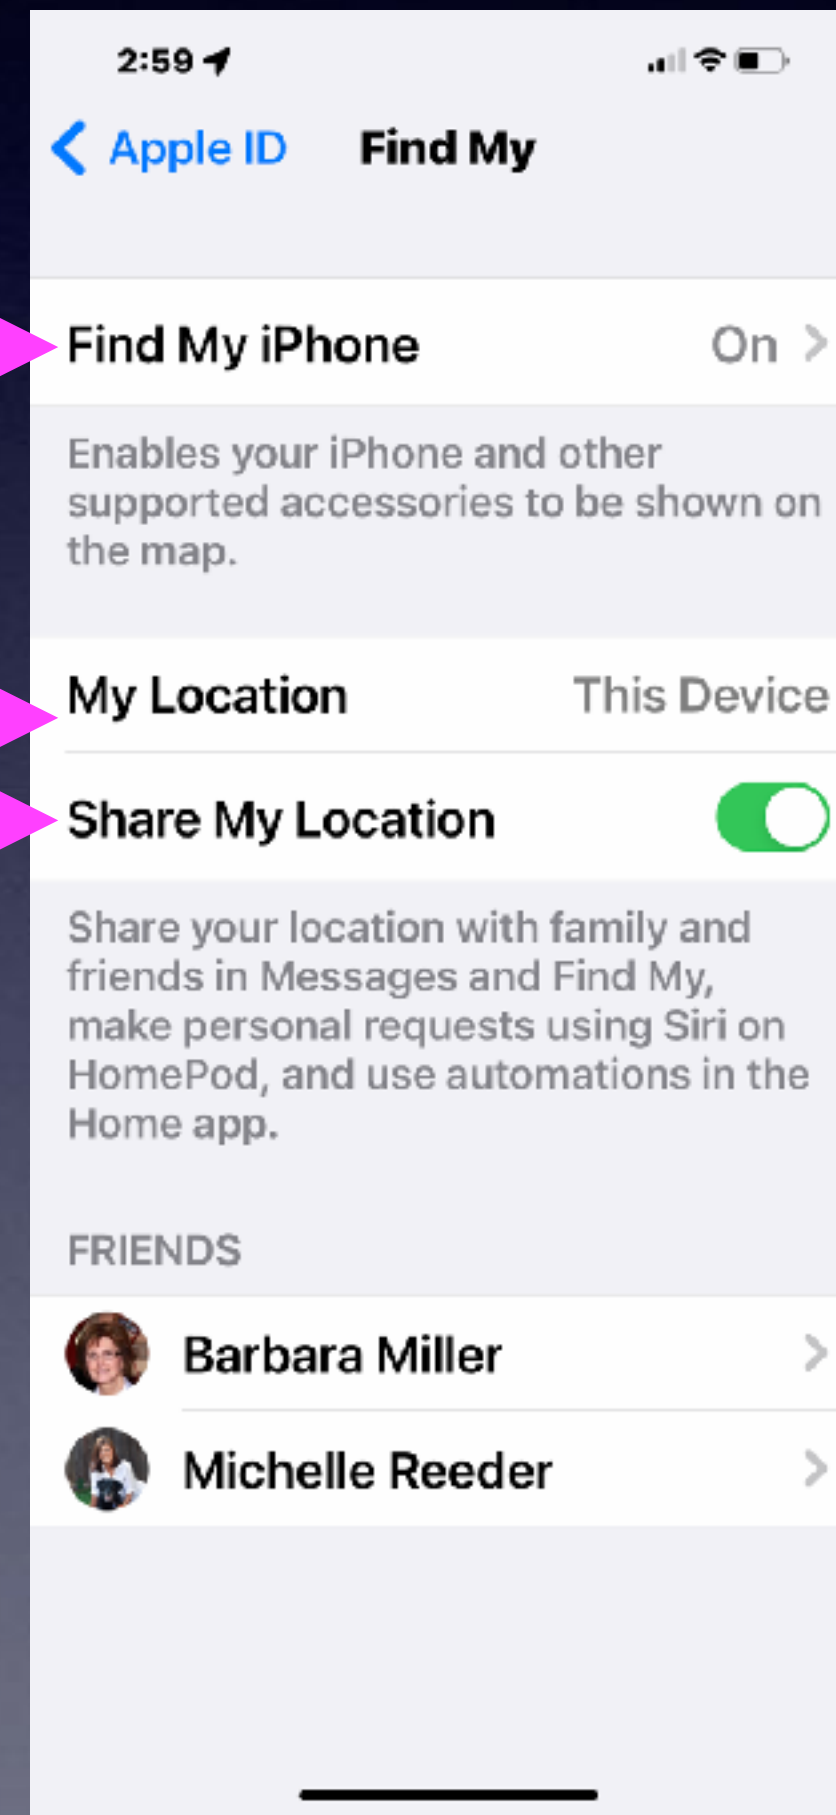

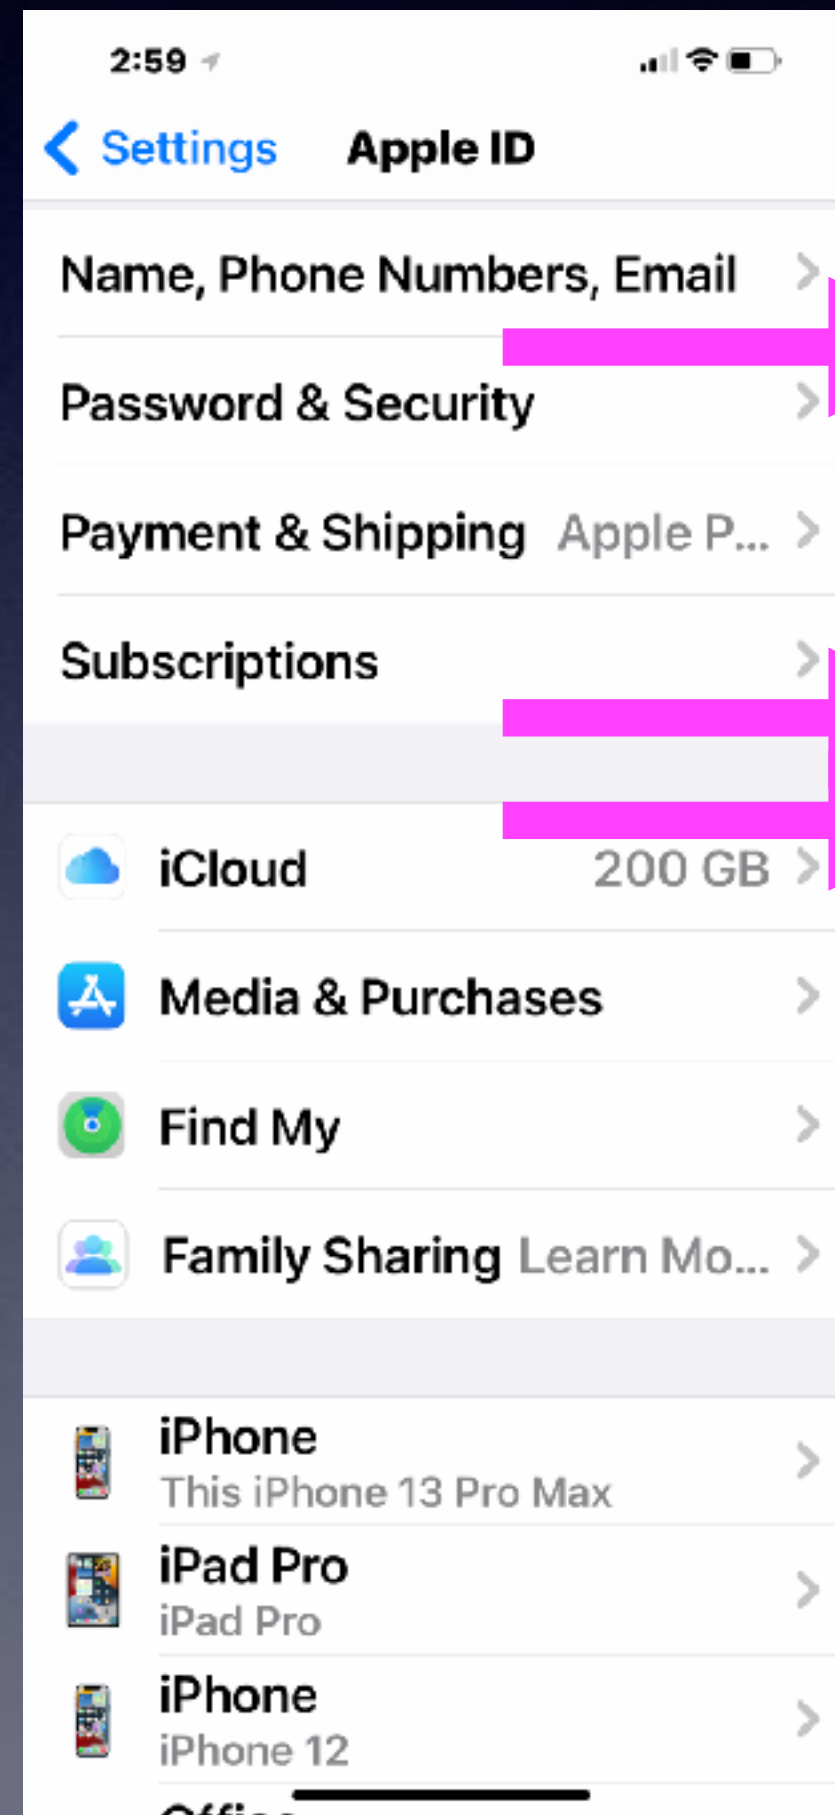

Where Is My iPad or iPhone?

This ? can be answered is you have a second device!

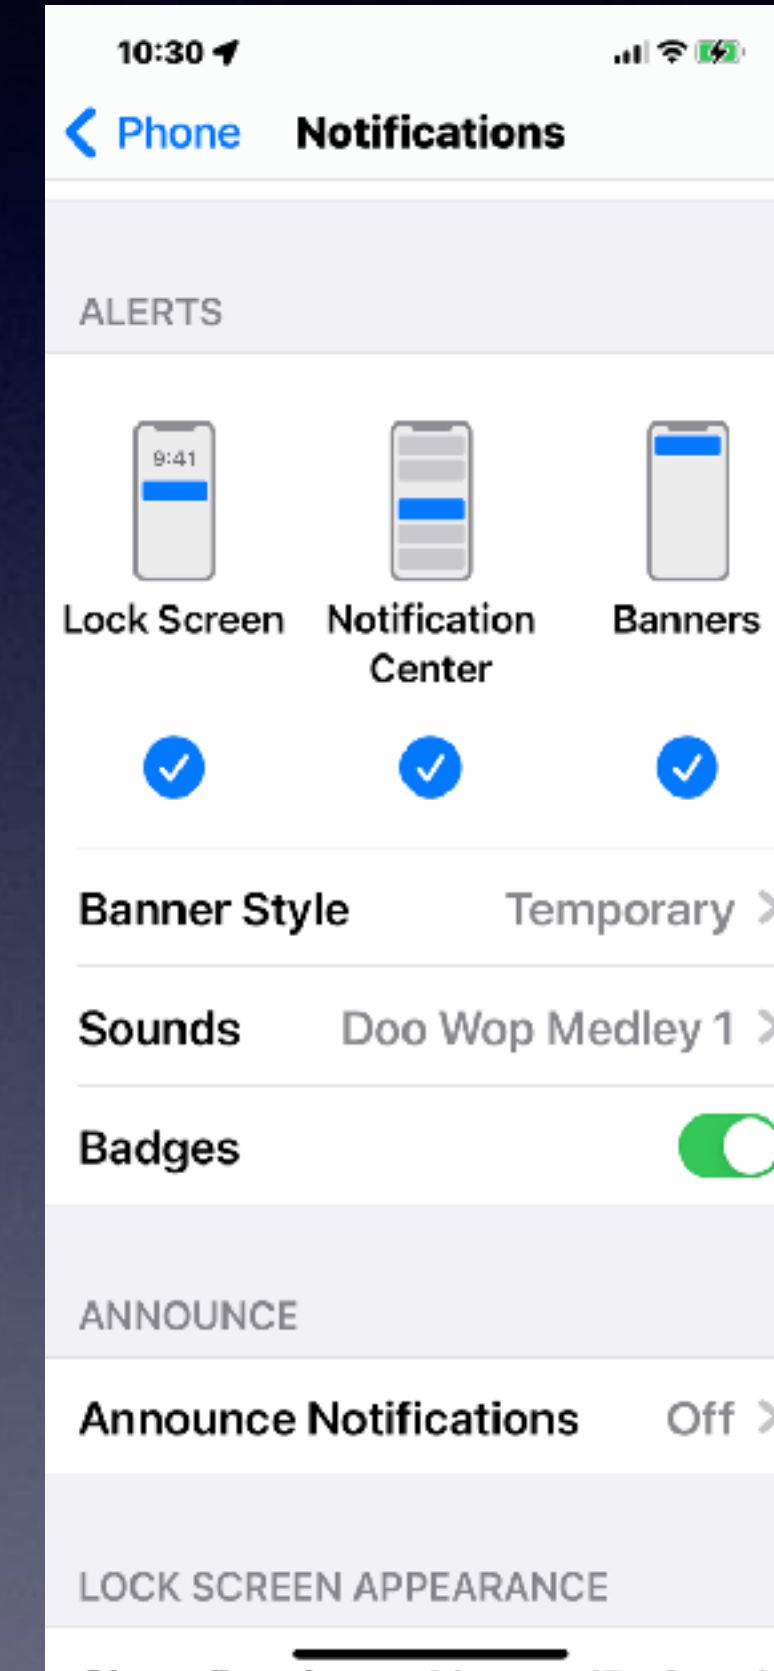

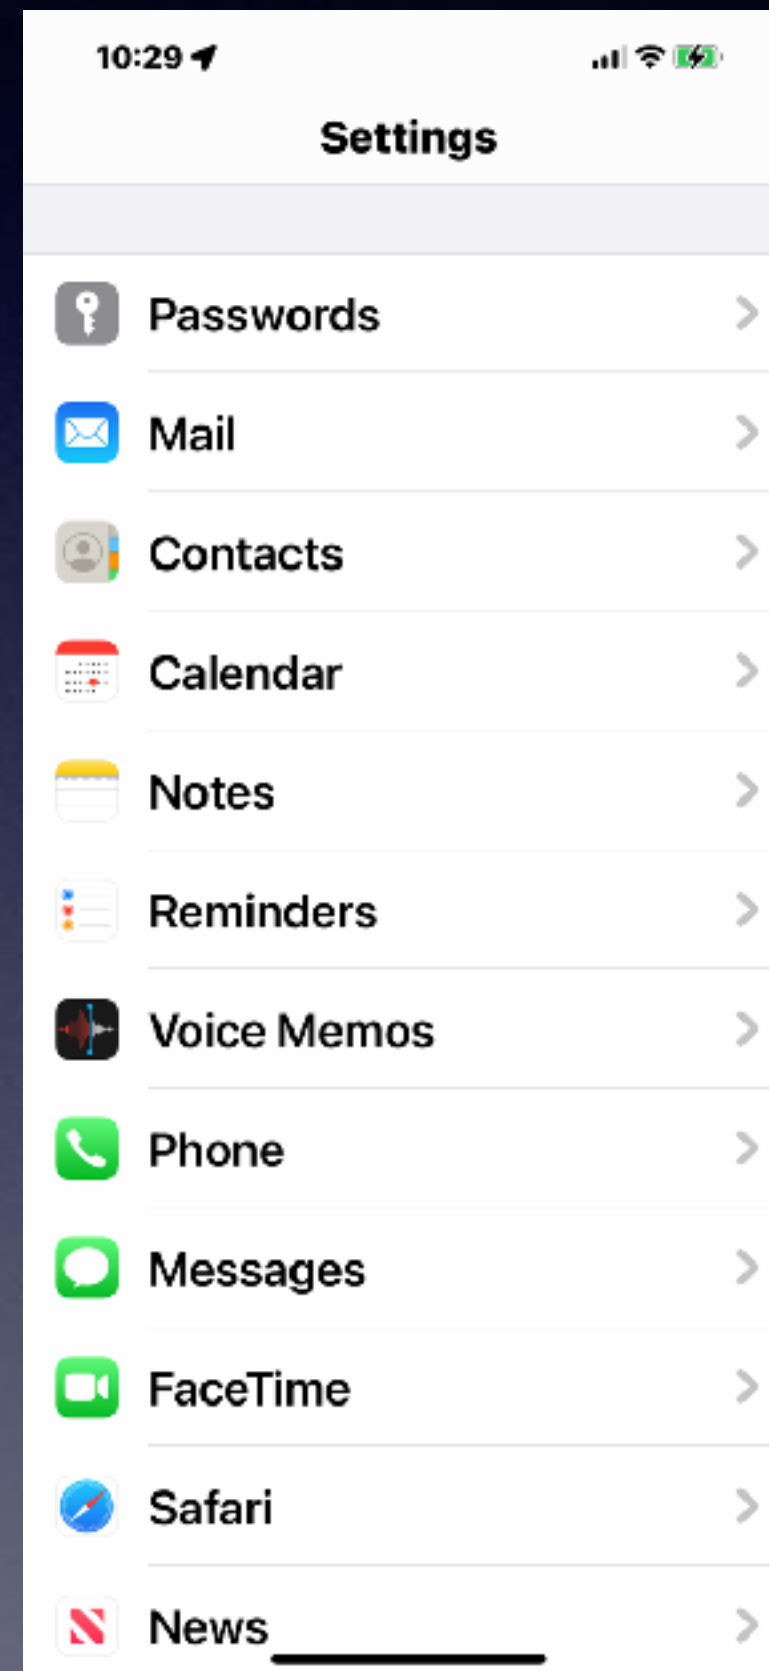

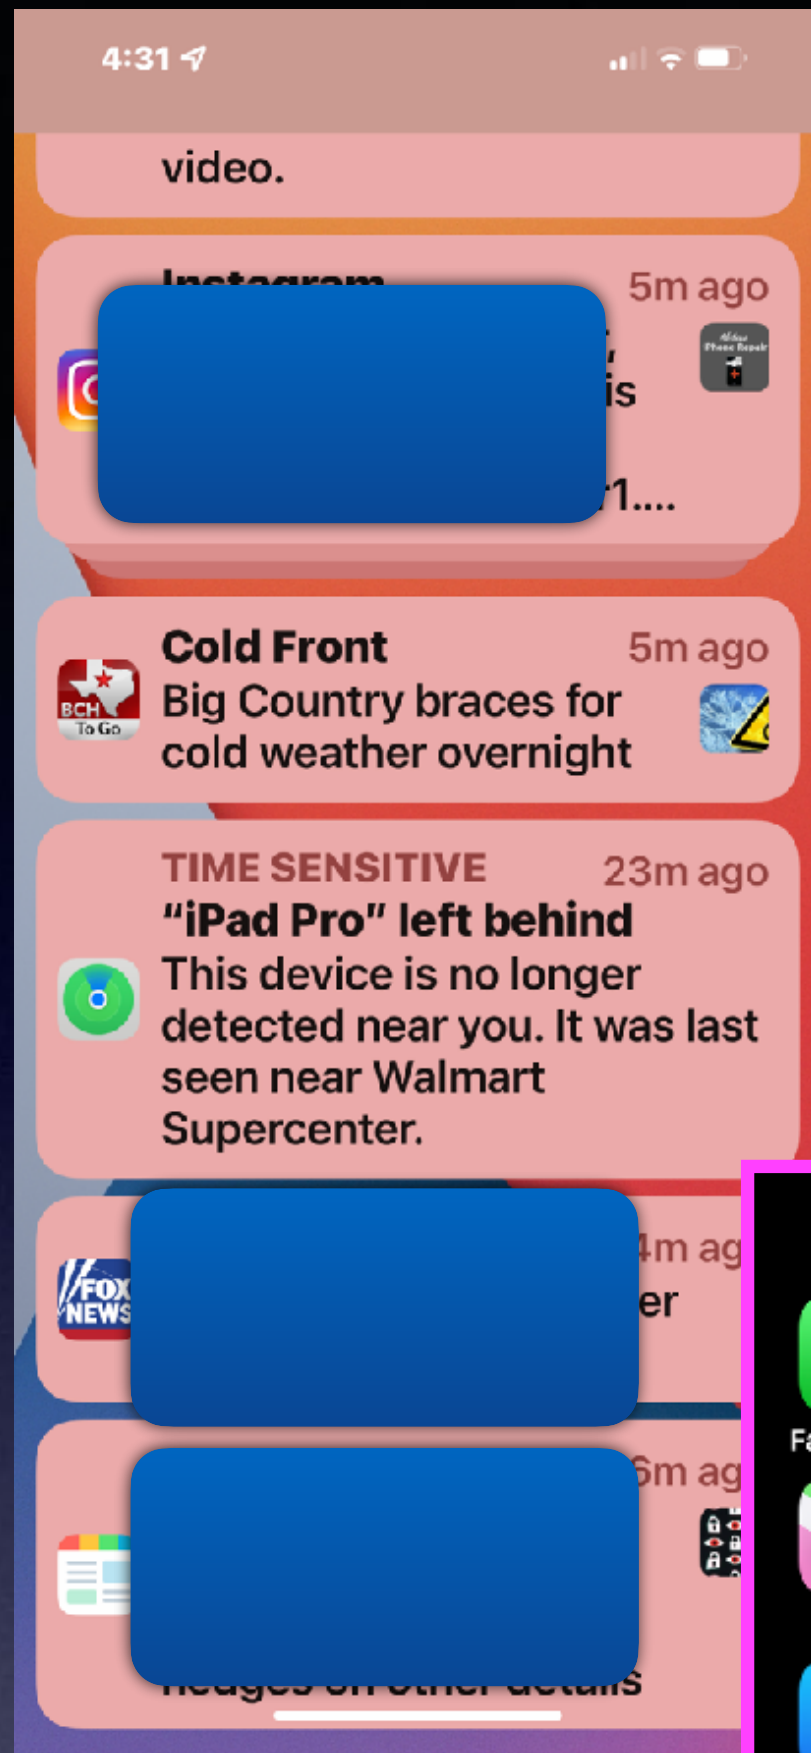

New iOS 15 feature alerts you when you leave a device behind!

“Find My” Depends On Your Settings!

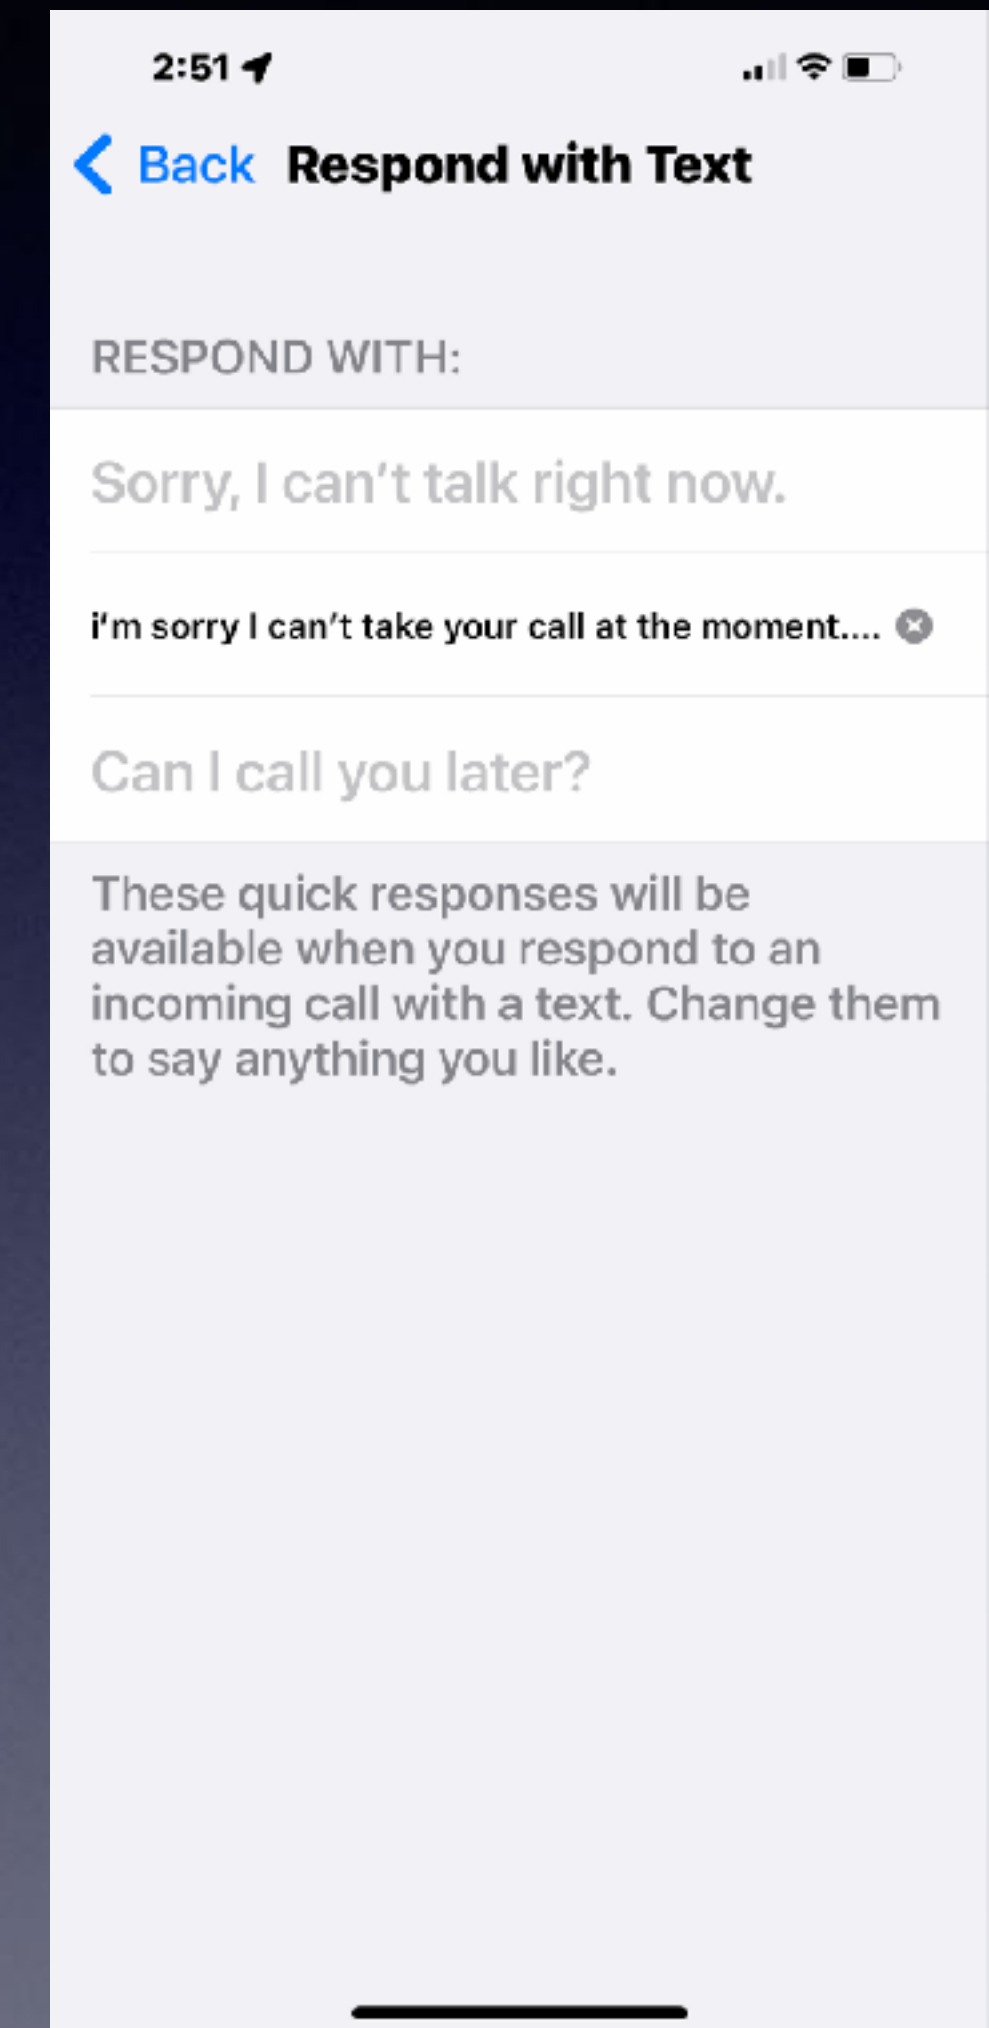

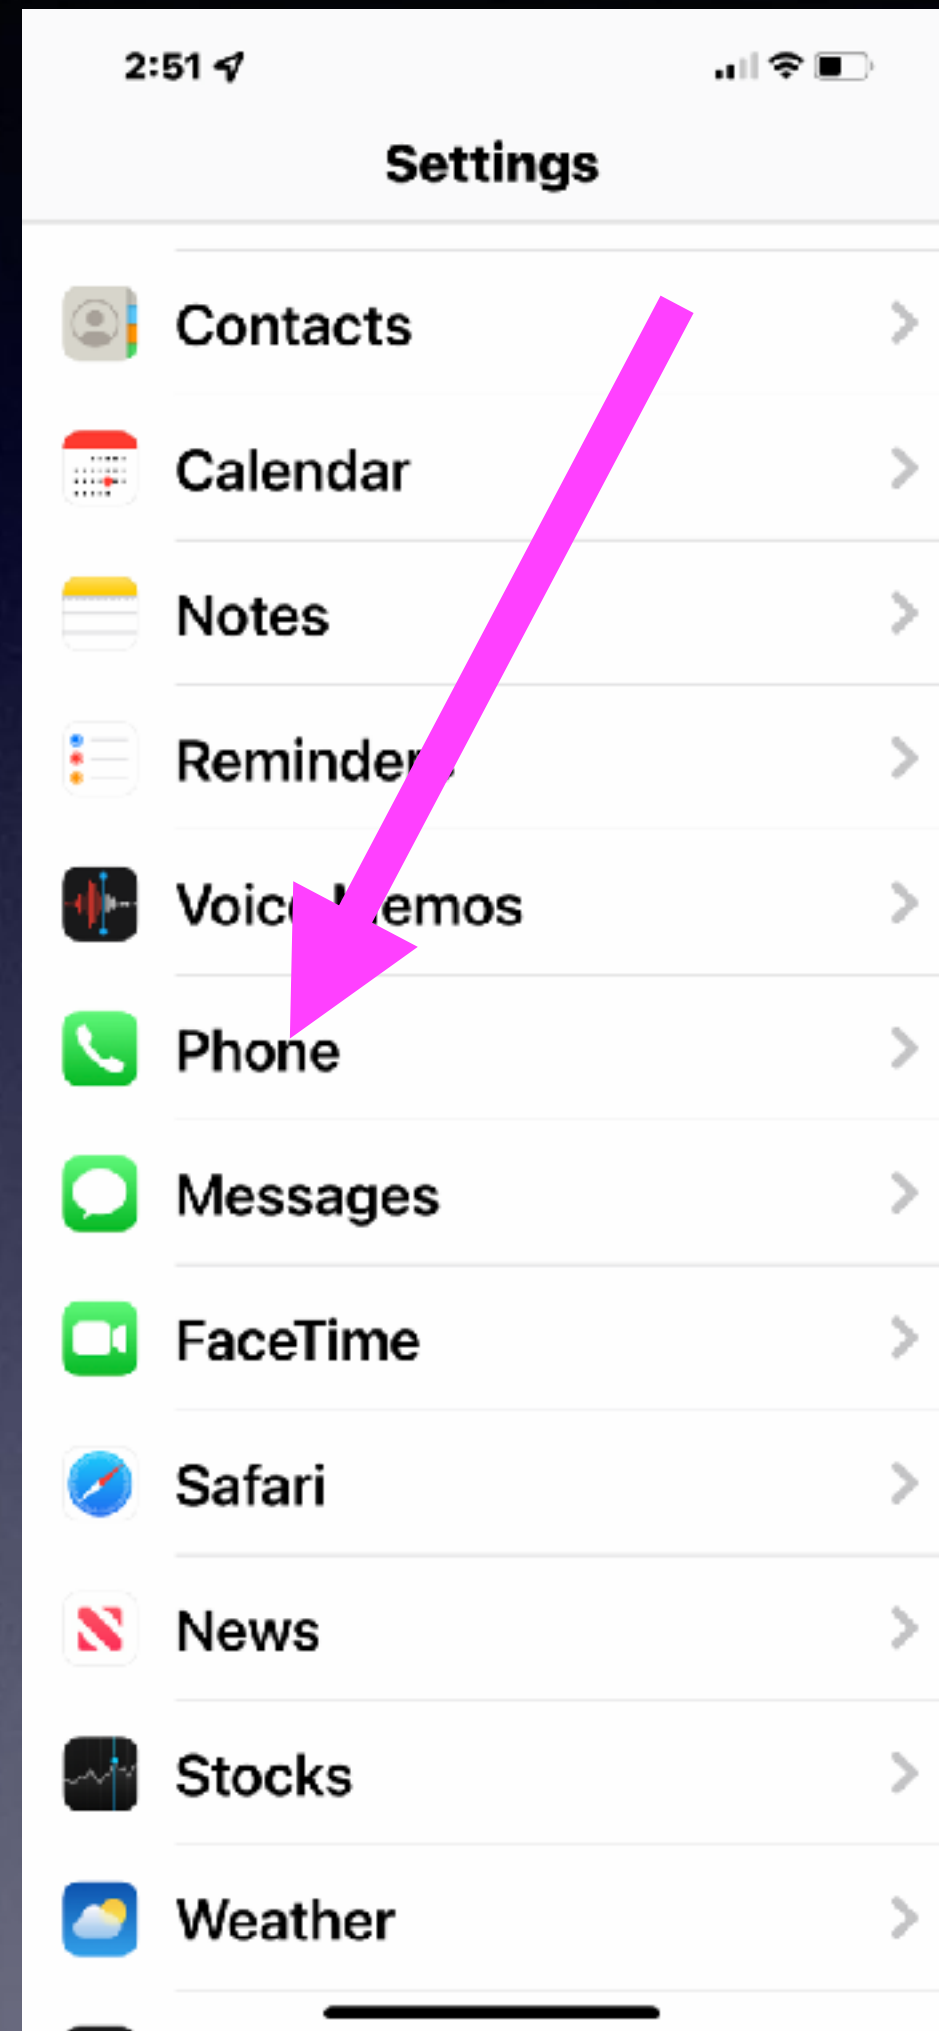

For each Apple device; each item needs selecting.

How Do I Get Notifications On My iPhone?

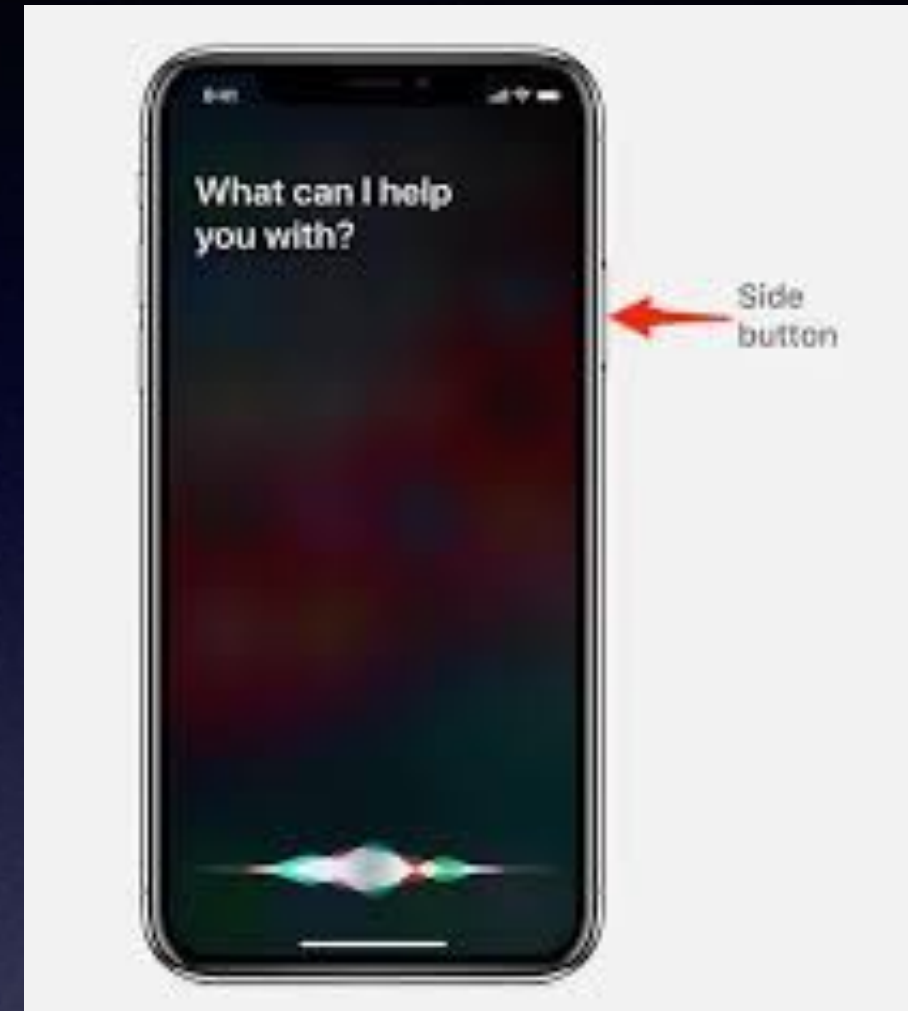

Respond To Incoming Calls With A Text Message!

Use Siri To...

Set an alarm.
Wake me up.
Turn on "Do not disturb".
& Turn off...
Make a FaceTime call.
Send a Message.

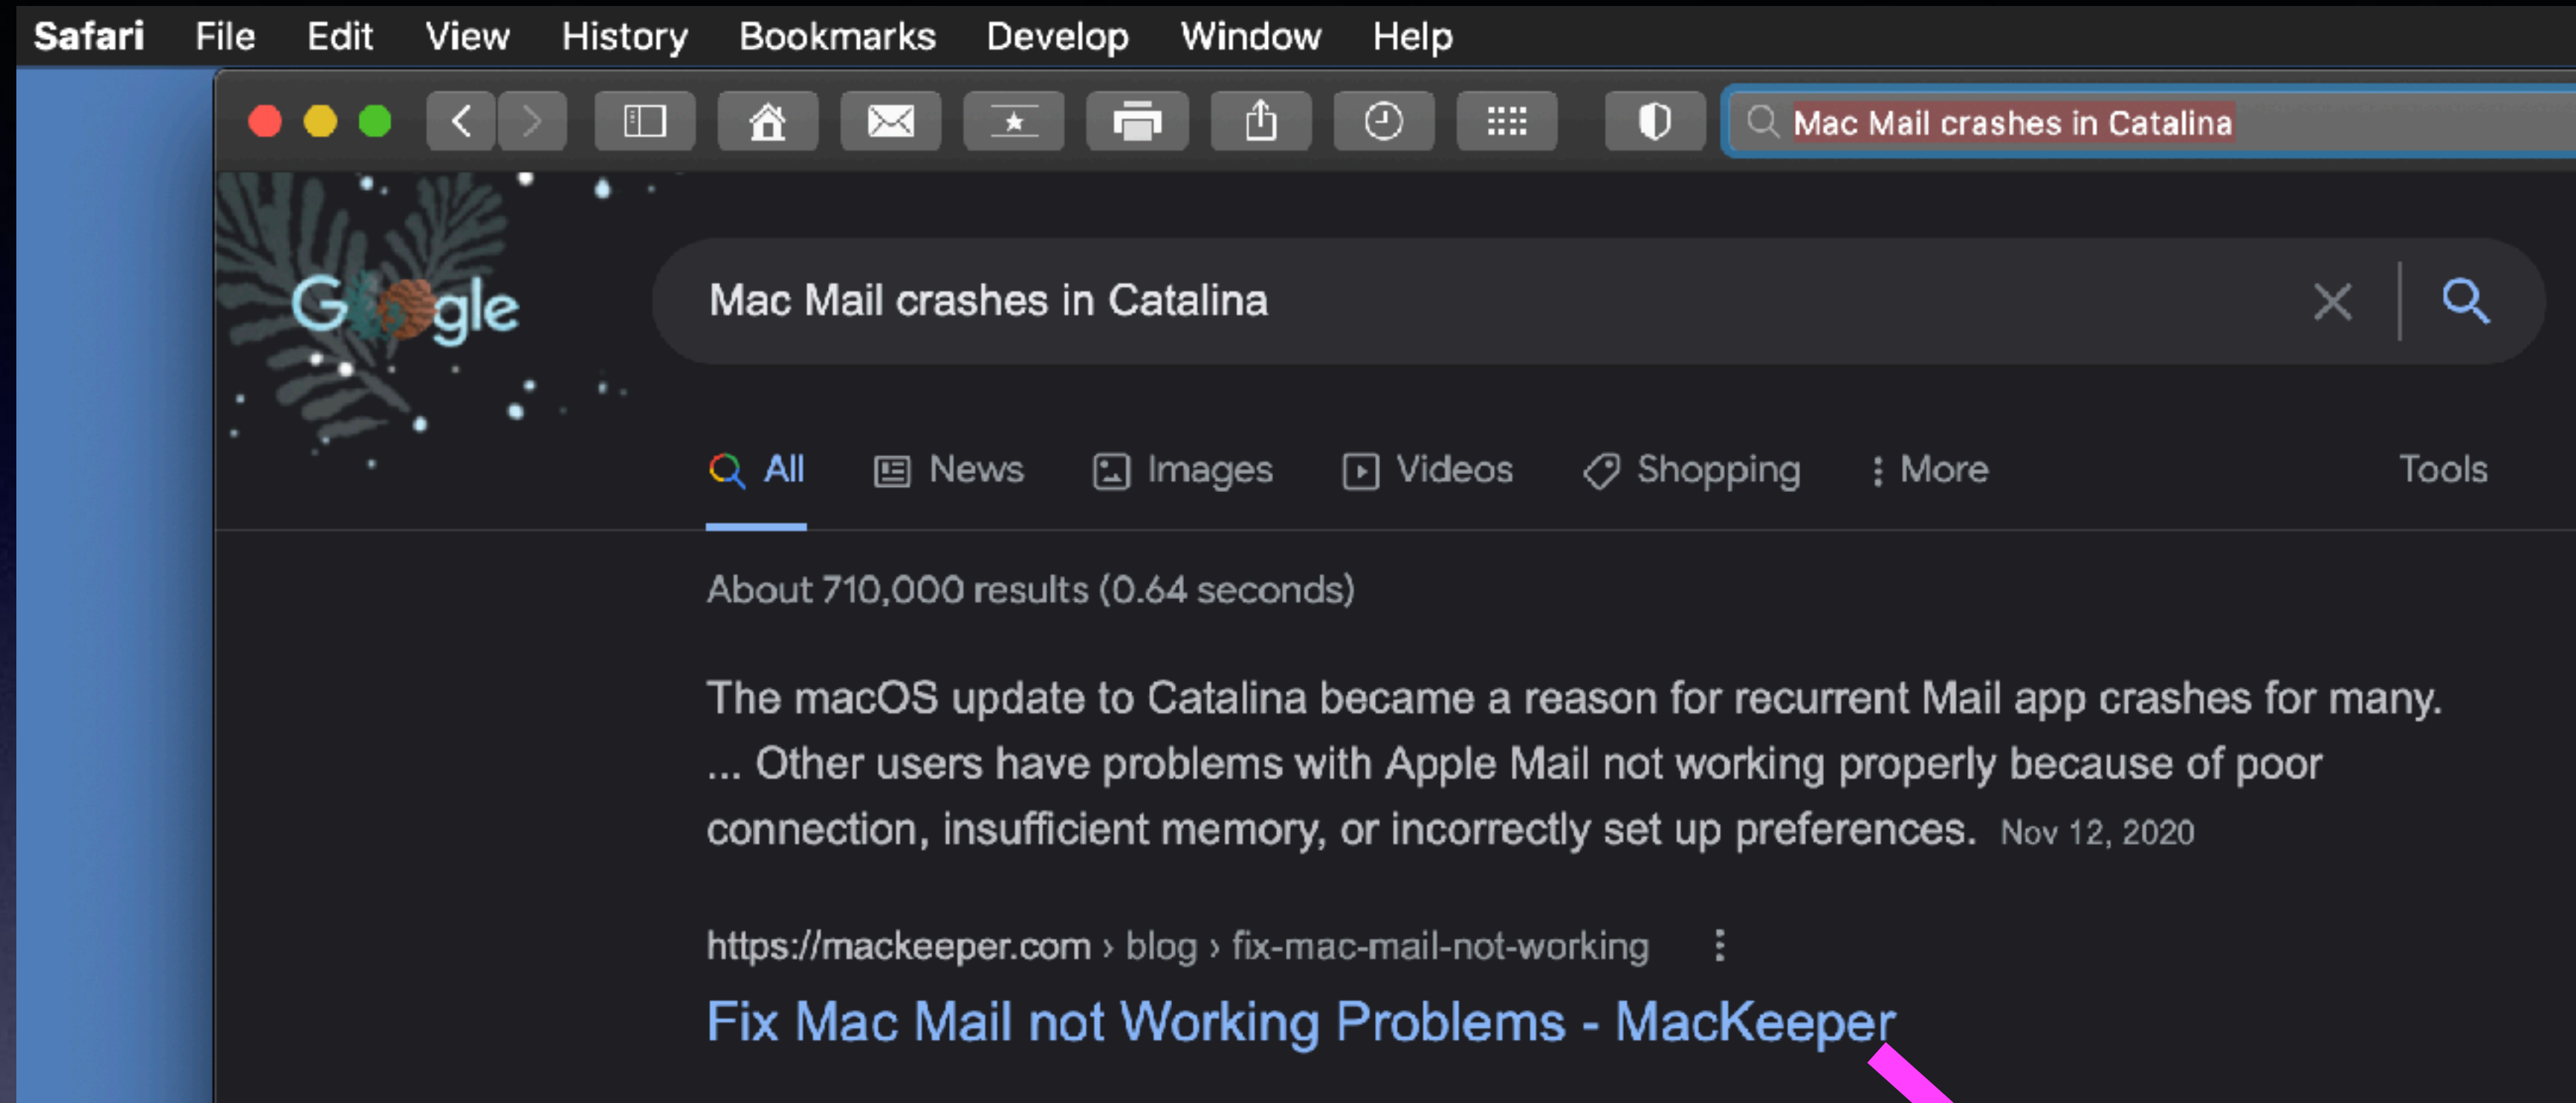

You can activate Siri with:

Activate with voice.
Activate with side button.
Activate while on the lock screen.
Listen for "Hey Siri"
