# Don't Forget How Dirty Your Phone Is!

Research has varied on just how many germs are crawling on the average cell phone, but a recent study found more than 17,000 bacterial gene copies on the phones of high school students. Scientists at the University of Arizona have found that cell phones carry **10 times more bacteria than most toilet seats.** Aug 23, 2017

# You'll Be Able To Carry Phone In Pocket In Future

Some day, Mansfielders will carry their telephones in their pockets.

Don't expect it to be available tomorrow, though.

Frederick Hantaman, telephone company commercial manager, says, "This telephone is far in the future — commercially."

Right now, it's a laboratory development and it's workable, allowing the carrier to make and answer calls wherever he may be.

Other telephones of the future includes a kitchen loud speaking telephone, and a visual image telephone.

The kitchen instrument can be used as a regular telephone, a loudspeaking phone if the housewife happens to be busy preparing a meal, or as an intercom station for the home.

The visual image telephone allows the parties to converse by way of a microphone and loud speaker while a miniature television camera transmits the image. The "TV phone" also will have a writer signature transmission system and a conversation tape recorder.

The new phones are being displayed at the Home and Tower Show at the Coliseum.

HOW ABOUT THIS? — Mrs. Jean Conrad, commercial representative of Mansfield Telephone Co. holds up the pocket-sized, wireless telephone which Mansfielders will some day carry with them. The phone is still in the development stage and "far in the future."
