Privacy & Security Are Big Deals! (With 🍏)

The age of your iPhone is not as important as whether it will update to the latest operating system.

Use Private Relay & Hide My Mail Address!

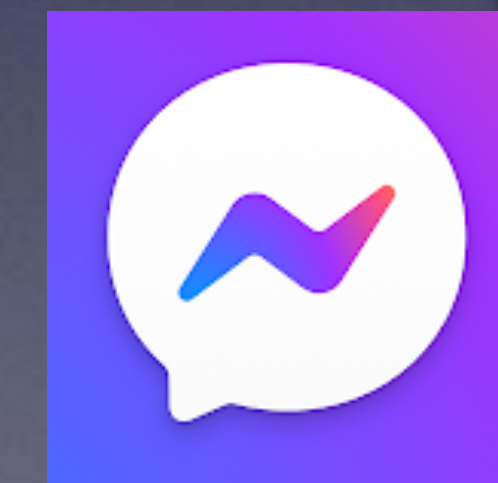

Older iPhones not using iOS 15 do not have some security features!

Messages Is Not Messenger!

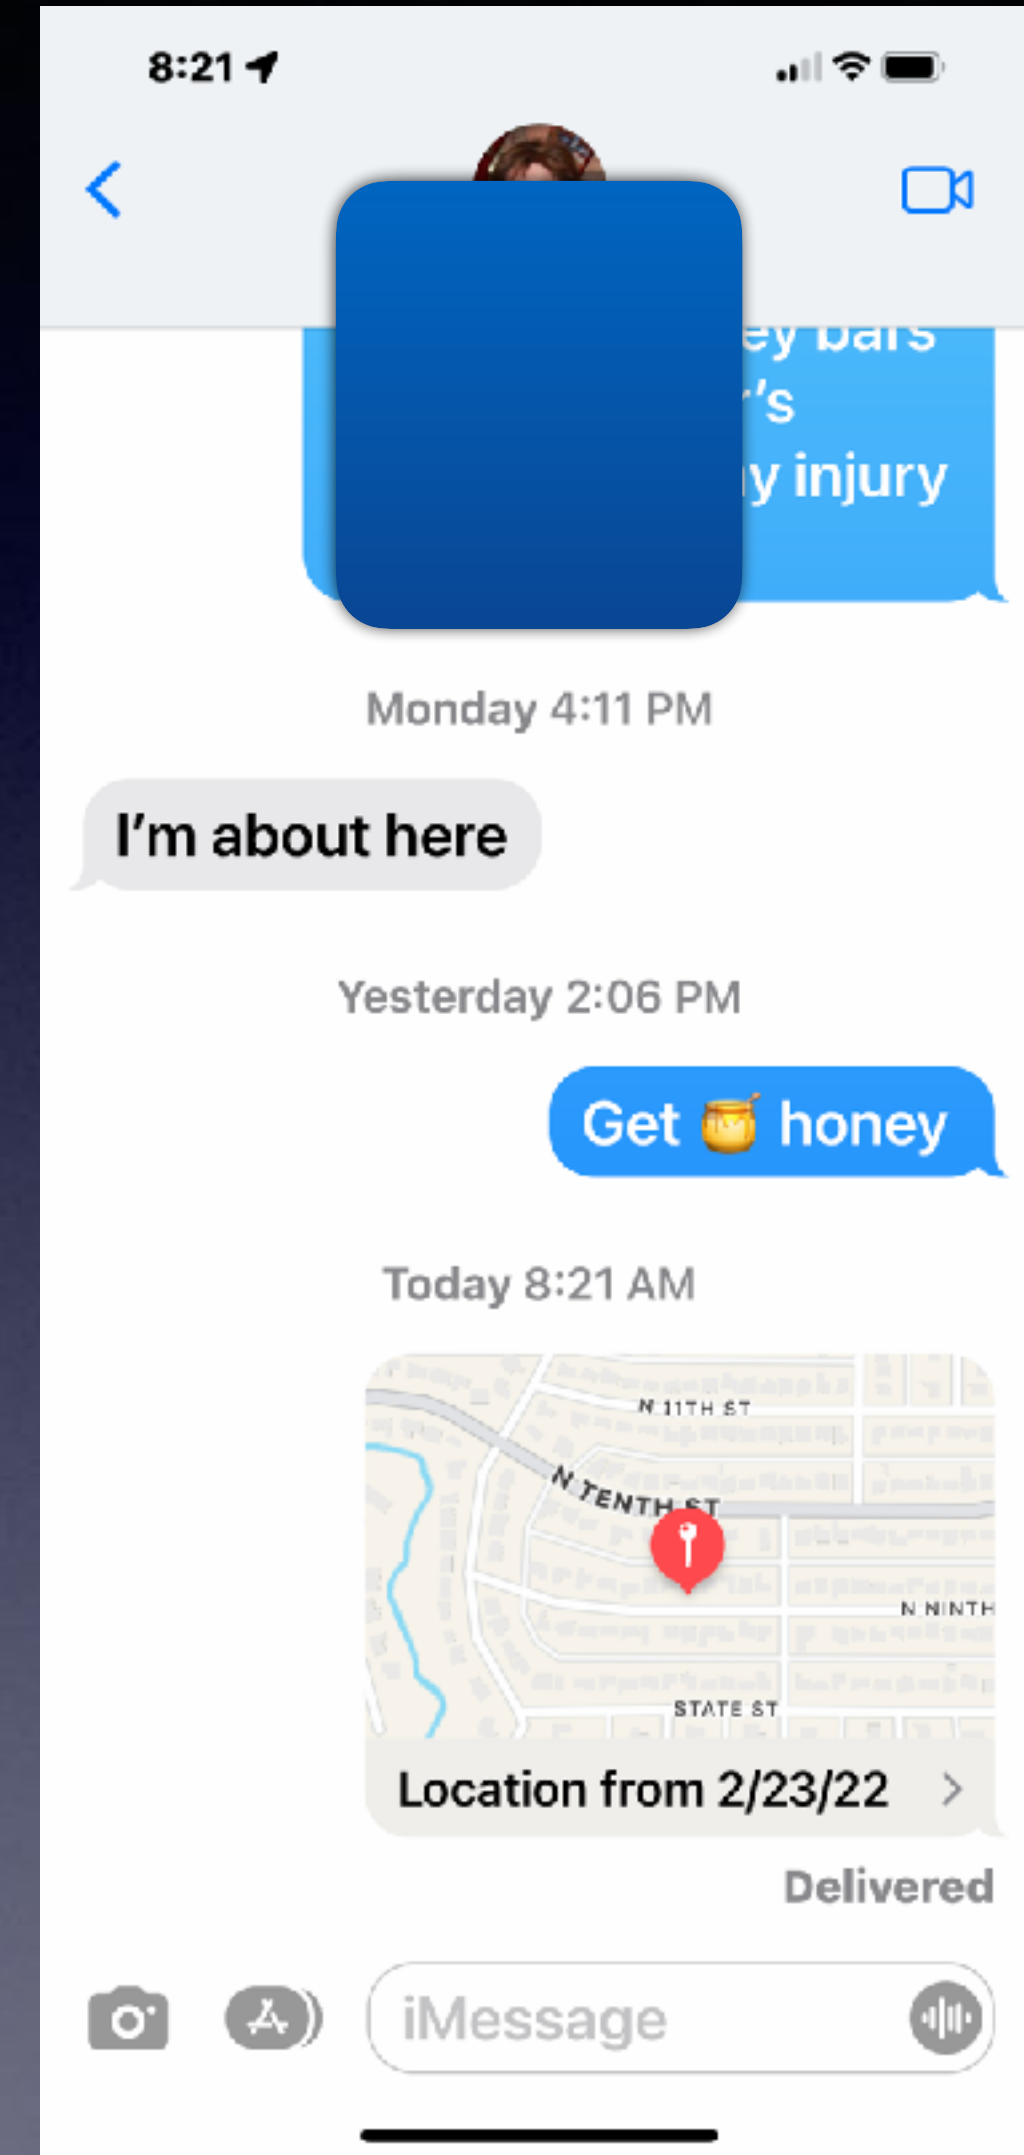

Messages
is an Apple app
and comes installed
on my iPhone & iPad
when purchased new.

Messenger
is a Facebook app
and is something
you install
manually!

iPad buying guide

The iPad is a versatile device at home or on the go. For many, it's replaced a traditional computer or laptop. Our iPad buying guide will help you quickly buy the right iPad for you.

The best iPad for most

The best iPad for most people is the [basic iPad](#). Regularly updated every September, it's a bargain in Apple's lineup. It has many features once exclusive to the more-expensive iPad Pro line, like support for the Apple Pencil, a smart connector for quickly attaching and detaching keyboards, and a True Tone screen. For basic tasks, it may be all the computer you need.

A good buying
guide for
"most" people!

What If My Email Server Leaves Town?

Such as...

As in _____@cox.net or _____@clearwire.net

What If I decide to move from Suddenlink to Vexus?

What If I Leave Town?

You can take your cell number!

But there is a good chance that you won't be able to use the same email address!

Unless you use an universal address!

Because you use suddenlink.net or sbcglobal.net does not mean you need to use their email server.

You have other choices!

Can I take my email with me?

What If My Email Becomes Flooded With “Bad Stuff”?

It would be time to change email addresses.

It is easy to add a secure email address.

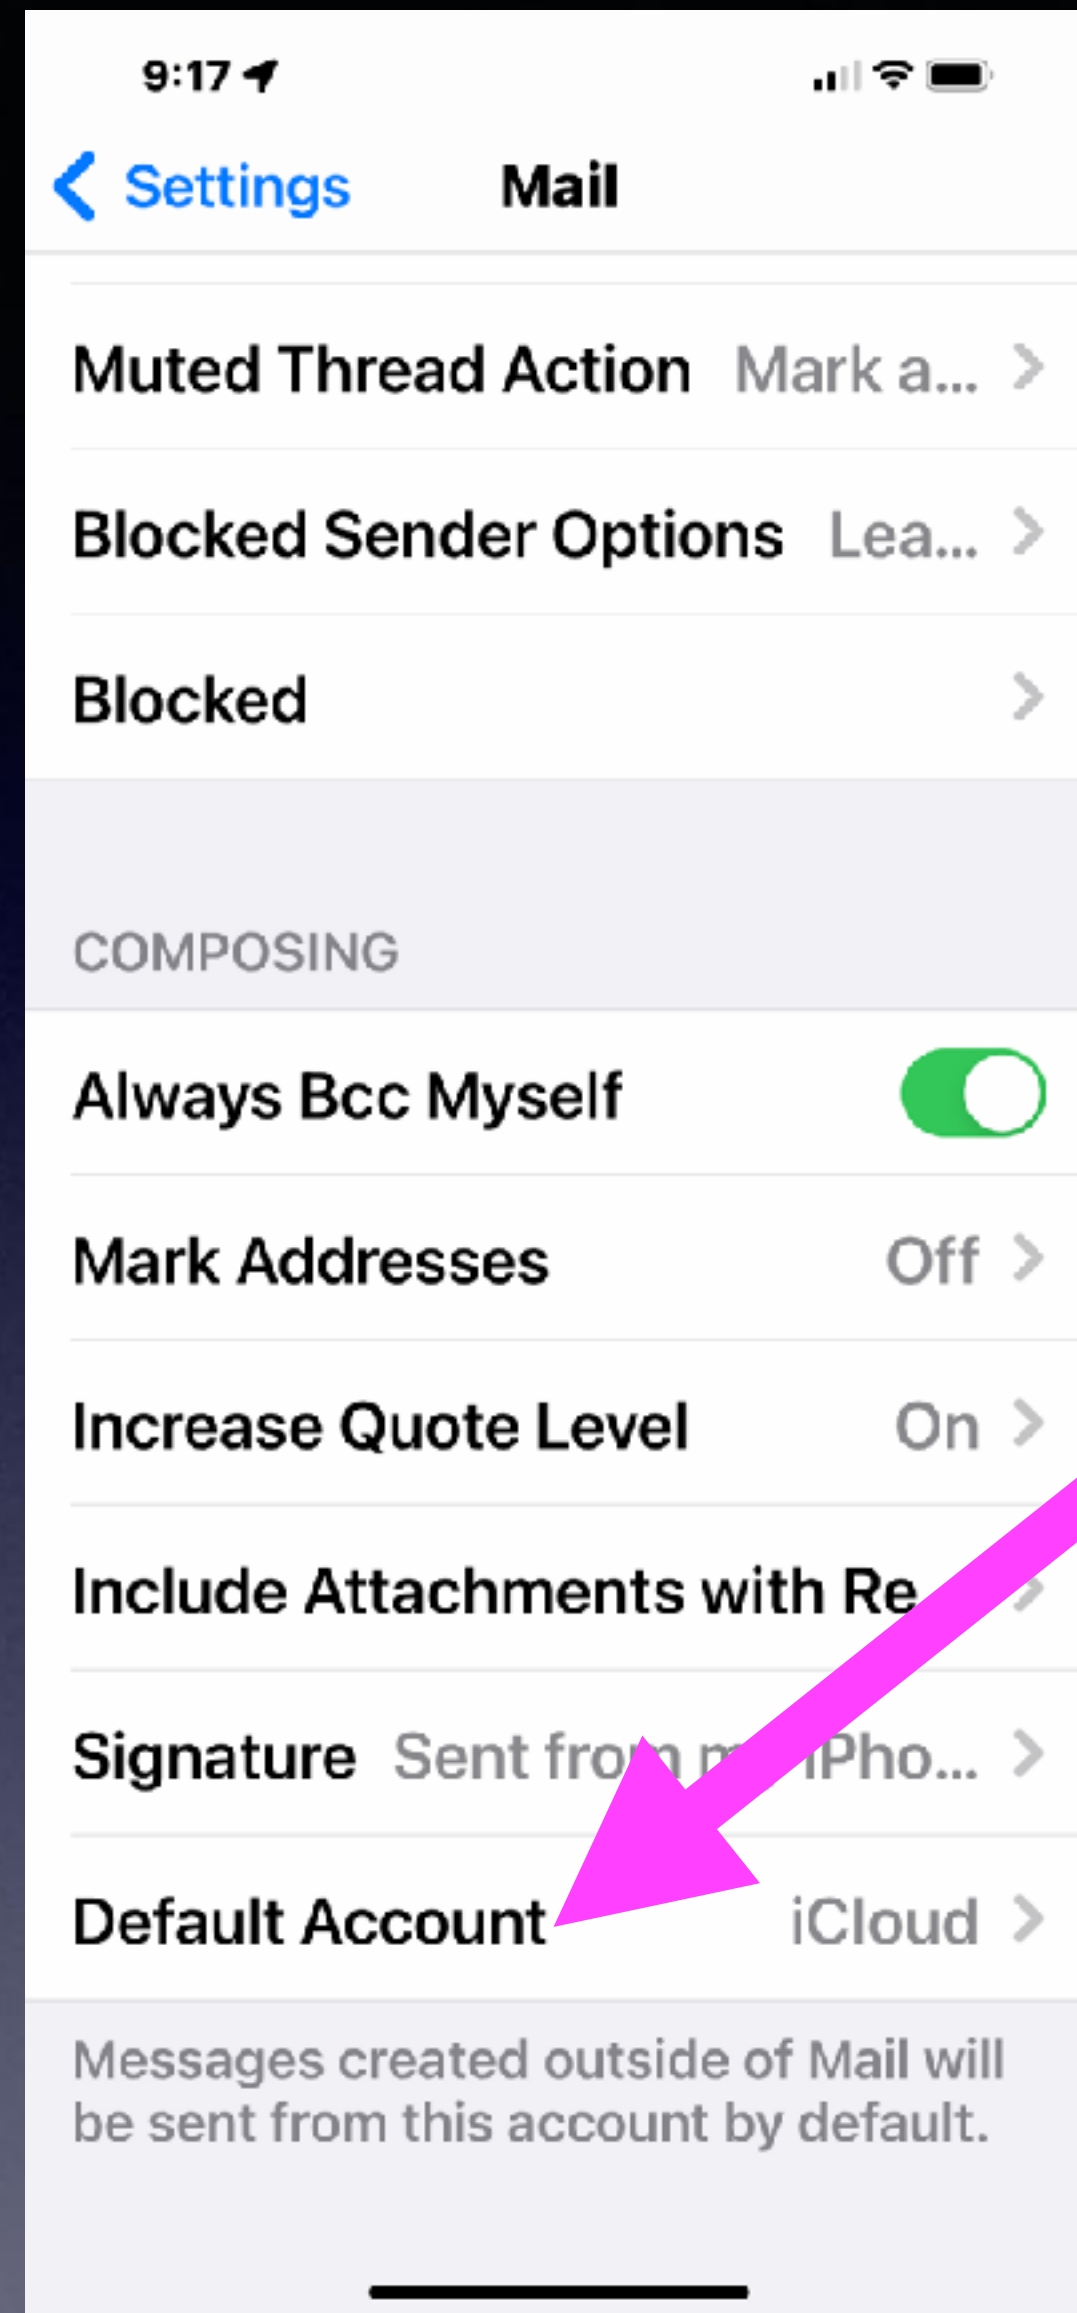

Add an ____@icloud.com or ____@gmail.com

Here's the problem; getting your users to “use” it.

Problem # 2. So many accounts are linked to it.

Solution: send from new account.

Gradually, begin verifying that users are switching over.

Make Sure Of Your Default Email Account When Sending Email!

Even if another user sends an email; They will likely send to your address that is your default account.

Advantages Of Using iCloud Email Address!

Probably the best spam filter.

It is supported & integrated on all Apple devices!

Very simple to use.

Easy to subscribe and unsubscribe email senders.

Apple does not look at the emails that you send or receive.

You can still use mac.com and me.com

iCloud use can get expensive: 200GB costs \$2.99 a month.

Advantages Of Using Gmail!*

Very fast sending and receiving emails.

1 GB of free storage space (not so with Suddenlink).

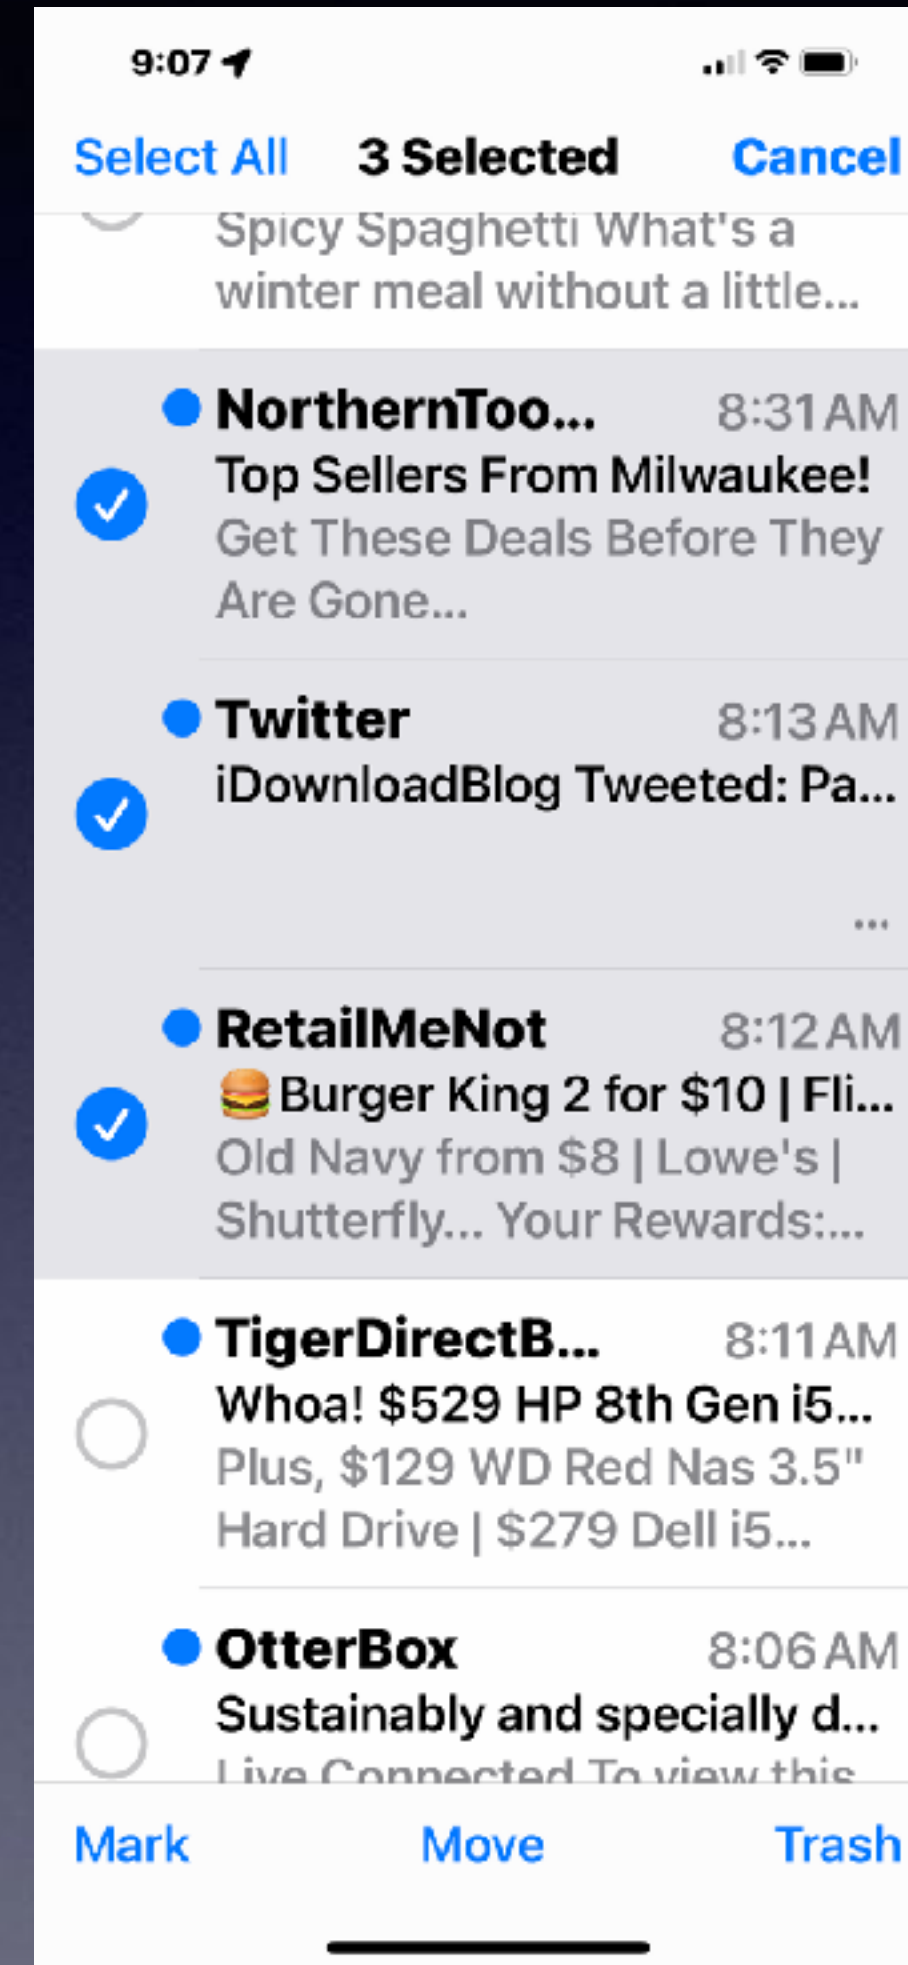

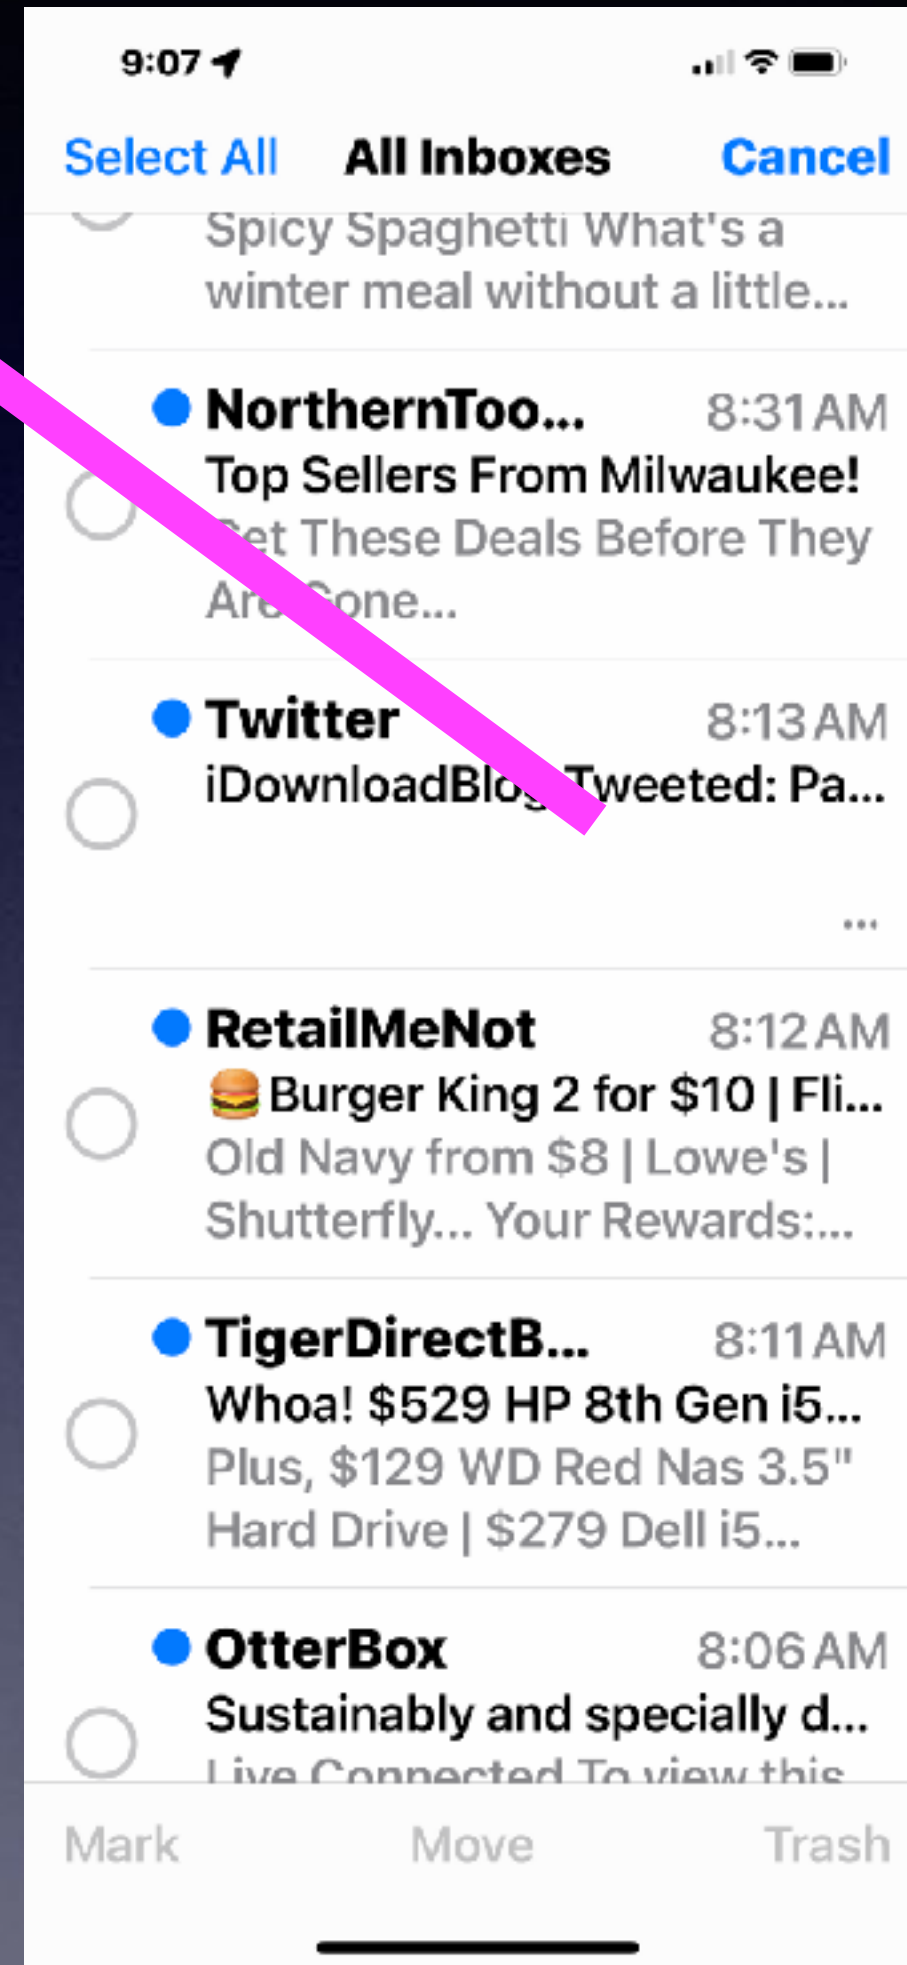

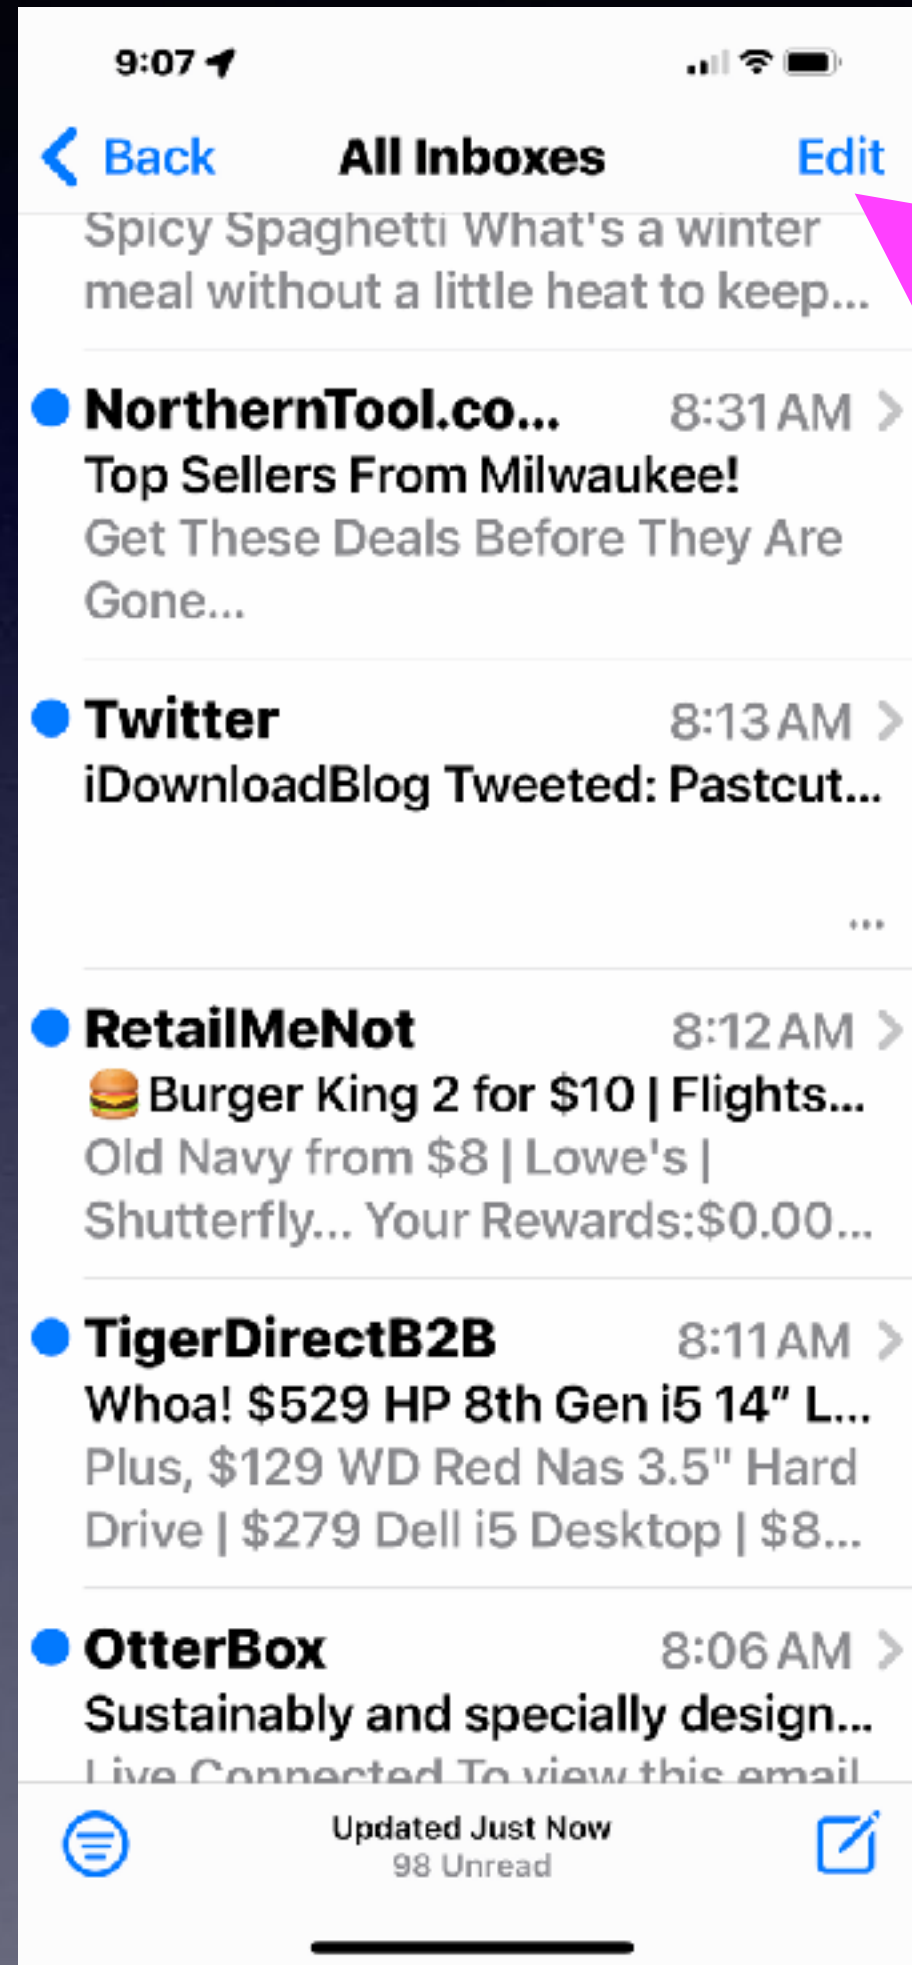

Very powerful search.

Powerful spam filtering.

*Gmail is owned by Google and they do look at your account. (That means everything!)

Delete Email F A S T !

Select "Edit"

Notice The Circles.

Put finger on one circle. Without lifting your finger;

Start pulling or moving down.

Then let up and tap Trash.
