### This Is The Second In A Series; "Apple Is Looking Out For Me."

or Apple has my best interest at heart...

Apple monitors (and prevents) unvetted apps on its platform.

Apple does not want you to lose data, i.e. iCloud.

Apple made a good lock for your iPhone. Theft is a big concern and will not share (locks) your data.

> Apple guards your privacy and security. i.e. the FBI and San Bernardino

Apple constantly upgrades its devices to make them \*More secure \*Do more things

# Let's Start With One Premise!

## Apple is looking out for you!

## Especially for my Wellbeing!

# Why Would I Want To Pay Such An Exorbitant Amount For An iPhone?

\*Apple devices look after my wellbeing!

### The list of iPhone features that make it competitive

The main reasons should actually be:

- 1. Reliable battery life I can excerpt way more control on how I spend it, than I could on my Android. You just always know how much juice is left. (since this article is written, the reliability of iPhone's battery life staggeringly deteriorated)
- 2. Stability of the operating system it almost never crashes, even jailbroken.
- 3. Integration into your existing ecosystem (for Mac users)
- 4. Content iTunes is the biggest media library on the planet, with free and paid content.
- 5. The best touch technology smoothness and responsiveness that I haven't seen anywhere else.
- 6. Still the very best display out there on the market. Retina with 360-pixel density is unmatched like two years after it's debut. And still not conquered.
- 7. Ease of use don't worry if you are not a nerd; you won't have problems using it.
- 8. User experience all the app developers are putting a lot of attention to the details! They make it intuitive and easy. I feel good when I am using those apps.
- 9. Updates there is no fragmentation. Devices have been getting updates for at least three years. In comparison with some Android devices that I had, they never got an update to begin with.
- 10. The best MP3 player I have ever had. It holds my library of 6000 songs in my pocket. (and today infinite amounts of songs with Apple Music)

# Beleve...

Apple is developing and manufacturing devices that will make money for their company!

How do they do that...

By determining what is best for the customer base.

(Tom Miller's beliefs)

# Apple Knows You Can't Remember Things Very Well

## Apple does two things for you! 1. It provides you with the Notes App.

2. It saves your passwords.

# The Notes Appl

A pin code to my credit card account.

Combination code for my lock.

My wife's social security number.

### What do I put in the Notes App?

"Stuff I Can't remember".

## Apple Remembers My Passwords...So I don't Have To!

### Apple includes a password manager. You must answer "YES" when asked, "Do you want to save the password"?

iCloud	
e Account Sto	orage >
SING ICLOUD	
otos	>
oud Drive	>
oud Mail	
sswords ychain	>
AII	>
d Fitness+ are no to iCloud.	ot

These are keys "Passwords" that unlock websites that require a password

Apple saves them (across all my Apple Devices) so that I don't have to remember them.

### When You Save Passwords In iCloud and Keychain...You save them across all supported devices! .ul 🗢 9

8:19

**C** Back Passwords & Keychain

#### iCloud Passwords & Keychain

Securely store your passwords, credit cards, and more in iCloud. AutoFill your information in Safari and other supported web browsers on all your devices. Learn More...

### **Do You See The iPhone As A Tool?** Is it an instrument, a device, mechanism? What can it do for me?

### Turn on emergency SOS!

Press and hold the side button and either volume button to make an emergency call. In certain regions, you may need to specify an emergency service to dial. Auto Call requires a SIM card.

#### Call with Hold

If you press and hold the side and volume buttons, the Emergency SOS slider appears. If you continue to hold them, a countdown begins and an alert sounds. When the countdown ends, iPhone calls emergency services.

#### Call with 5 Presses

Rapidly pressing the side button five times starts a countdown and sounds an alert. When the countdown ends, iPhone calls emergency services.

#### Set up Emergency Contacts in Health

Emergency SOS will notify emergency contacts with messages that say you have called the emergency services. These messages also include your current location. You can set up emergency contacts for Emergency SOS in your Medical ID in the Health app.

You need to prepare and be very familiar with the two methods of calling SOS!

# Crash Alert On iPhone 14

Car with four (4) hit a tree. Driver killed but iPhone alerted Emergency SOS!

Get the latest and greatest if possible!

### What Happens When You Call SOS? Or to rephrase: What happens when I call ?

3. Immediately after calling SOS your emergency contacts will be alerted (dialed or called)!

1. Your iPhone automatically calls the local emergency number!

2. If you did it by mistake; you will get a countdown and you can stop the call.

# A Major Stumbling Block For Those Who Share An iPhone!

### If you are on the side of a road and the EMTs find both of you... Whose Medical ID won't be on the iPhone?

### The iPhone is a tool that can save your life.

Sharing an iPhone is similar to sharing a toothbrush.

How Do EMTs See Your Medical ID When Your iPhone Is Locked?

A locked iPhone with passcode lock has a black screen with no apps showing!

4:16 **\*** Medical ID Cancel messages. **Emergency Access** Show When Locked

#### Your Medical ID can be viewed when iPhone is locked by tapping Emergency, then Medical ID. On Apple Watch, press and hold the side button and drag the Medical ID slider to the right.

#### Share During Emergency Call

If you call Emergency Services, iPhone and Apple Watch can share your Medical ID. Learn More

#### **Delete Medical ID**

Show Medical ID: Swipe Up To Reveal The Passcode.

Remember to enable Emergency Access on the lock screen!

# Who Has The Emergency When You Share an iPhone?

### Get Your Medical ID On Your iPhone!

### How to set up your Medical ID

Open the Health app and tap the Summary tab.

Tap your profile picture in the upper-right corner.

Under your profile picture, tap Medical ID.

Tap Edit in the upper-right corner.

To make your Medical ID available from the Lock screen on your iPhone, turn on Show When Locked.

### Open the Health app and tap the Summary tab.

Tap your profile picture in the upper-right corner.

Under Features, tap Organ Donation.

Tap Sign Up with Donate Life.

Fill out the registration form, then tap Continue.

Confirm your registration, then tap Complete Registration with Donate Life. Tap Done.

You can edit your information with Donate Life at any time.

Open the Health app and tap the Summary tab.

Tap your profile picture in the upper-right corner.

Under Features, tap Organ Donation.

Tap Edit Donor Registration.

Update your information. To remove your registration, tap Remove Me.

Tap Update.

For information on Donate Life America's privacy policy, visit their website.
