There are many similarities but also, some unique differences!

I Do Not Have A New iPhone!

Old tools can still work!

iOS 16 works with older iPhones!
iOS 16 is not available for your iPad.

iOS 16 Is Out!

The following iPhones are compatible with iOS 16:

Which "older" iPhones can be updated to iOS 16?

I Don't Have iOS 16!

Four reasons why a person may not have iOS 16 on their iPhone:

Their iPhone may be too old and your getting a message that your iPhone is up to date but not with iOS 16.

Their iPhone is on iOS 15 and they have not updated. Perhaps you don't like change.

They did not notice that below the iOS 15.7 update there is an option to download and install iOS 16.

Many don't do much with their iPhone.

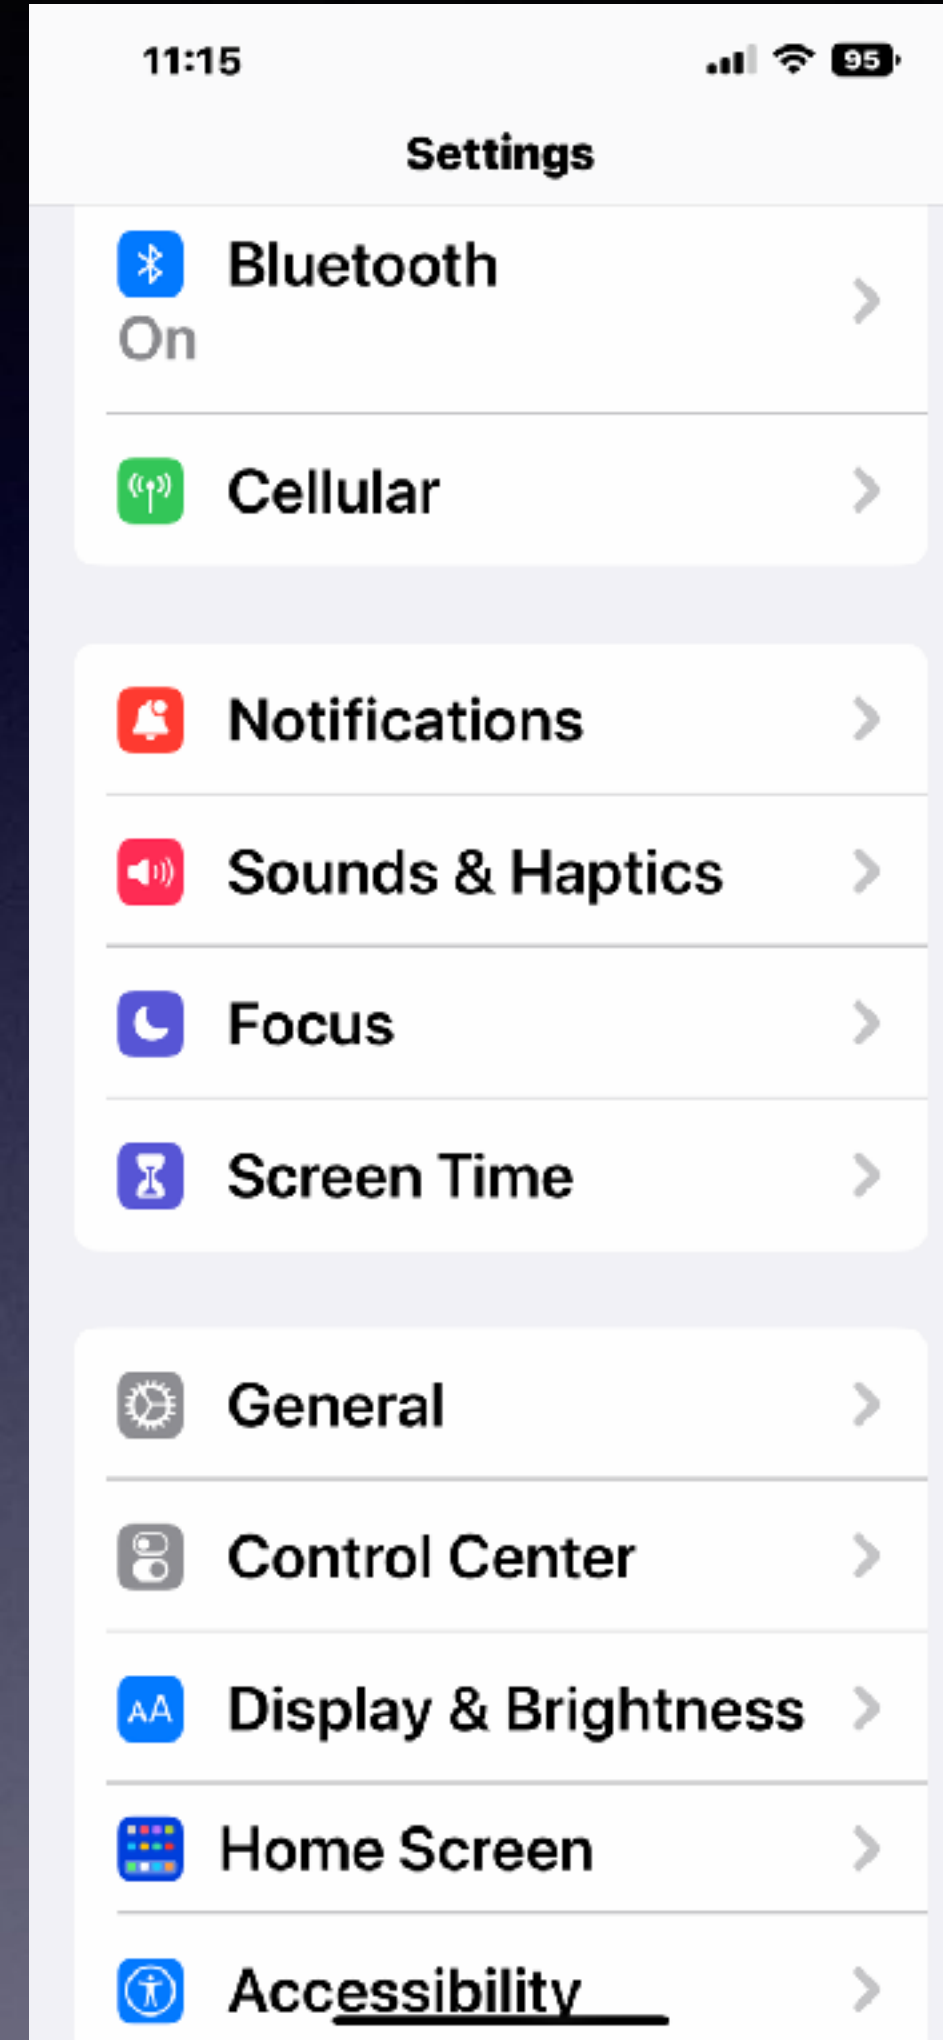

They don't expect much.

"It's doing everything I need it to do!"

There's no point in updating anything!

This Is What You Should See!

Make sure Automatic Updates is "On".

What Can I Do If My iPhone Won't Update?

I cannot tell you what do do.

If you can (\$) and want to...purchase a new (or newer) iPhone.

I do not think you must have the latest iPhone.
Remember, I am not using the latest iPhone 14!

Perhaps a used iPhone may be a good choice for you.

Dictation and Texting With Messages Is Better Than Ever!

Dictation is more accurate. When I pause for a new sentence correct punctuation is automatically added. And correctly so! A new symbol appears by Apple and dictation to let me know that I appear to be finished. I can tap on the symbol to end dictation.

“Live Text” Came To iOS in iOS 15 But Is Better In 16!

1. Open Camera, then position iPhone so the text appears within the camera frame.
2. After the yellow frame appears around detected text, tap , then do any of the following:

- *Copy Text:* Copy text to paste into another app such as Notes or Messages.
- *Select All:* Select all the text within the frame.
- *Look Up:* Show personalized web suggestions.
- *Translate:* Translate text.
- *Search the web:* Look up the selected text on the web.
- *Share:* Share text using AirDrop, Messages, Mail, or other available options.

Note: You can also touch and hold the text, then use the grab points to select specific text and perform the actions above.

Tap a quick action at the bottom of the screen to do things like make a phone call, visit a website, start an email, convert currencies, and more.

3. Tap  to return to Camera.

To turn off Live Text on your iPhone camera, go to Settings  > Camera, then turn off Show Detected Text.

Live Photos Come To iOS 16.

Your selection is ready to drop into Notes, Pages, email, Photoshop, etc.

I Made A Big Mistake!

**I Did Not Mean To Type “That”
In Messages.**

I want to “Unsend” a Message!

There is “finally” an
unsend button.
(not really)

You Can “Unsend” Or Edit After Sending A Message!

Man begins a very heated argument with wife!

Person asked me about some tools.

I mentioned that I had three “bitc#\$\$#” for sale.

I had three **bits** not bitc#\$\$#.

How Much Can You Blame On Autocorrect?

If you want to unsend or edit...

Long press on the message

You have two minutes to correct or unsend.

It works WHEN sender and receiver both having iOS 16.
