## Truth bias

We assume most people are telling the truth. It is why scammers are successful.

# How Clever Does A Scammer Have To Be?

## Check the following...

Does he/she speak native English?

Does it seem to be a random call?

Is it something I have thought about?

Do I have time to think about it?

Are they wanting info from me?

Do they put pressure / intimidate on me?

Is money / credit card involved?

Will they give me time to think about it?

The technology giant released [iOS 16.6.1](#) on Thursday (September 7) and recommended all users to download it as it is meant to fix a security bug that leaves iPhones vulnerable to software that steals information from a device.

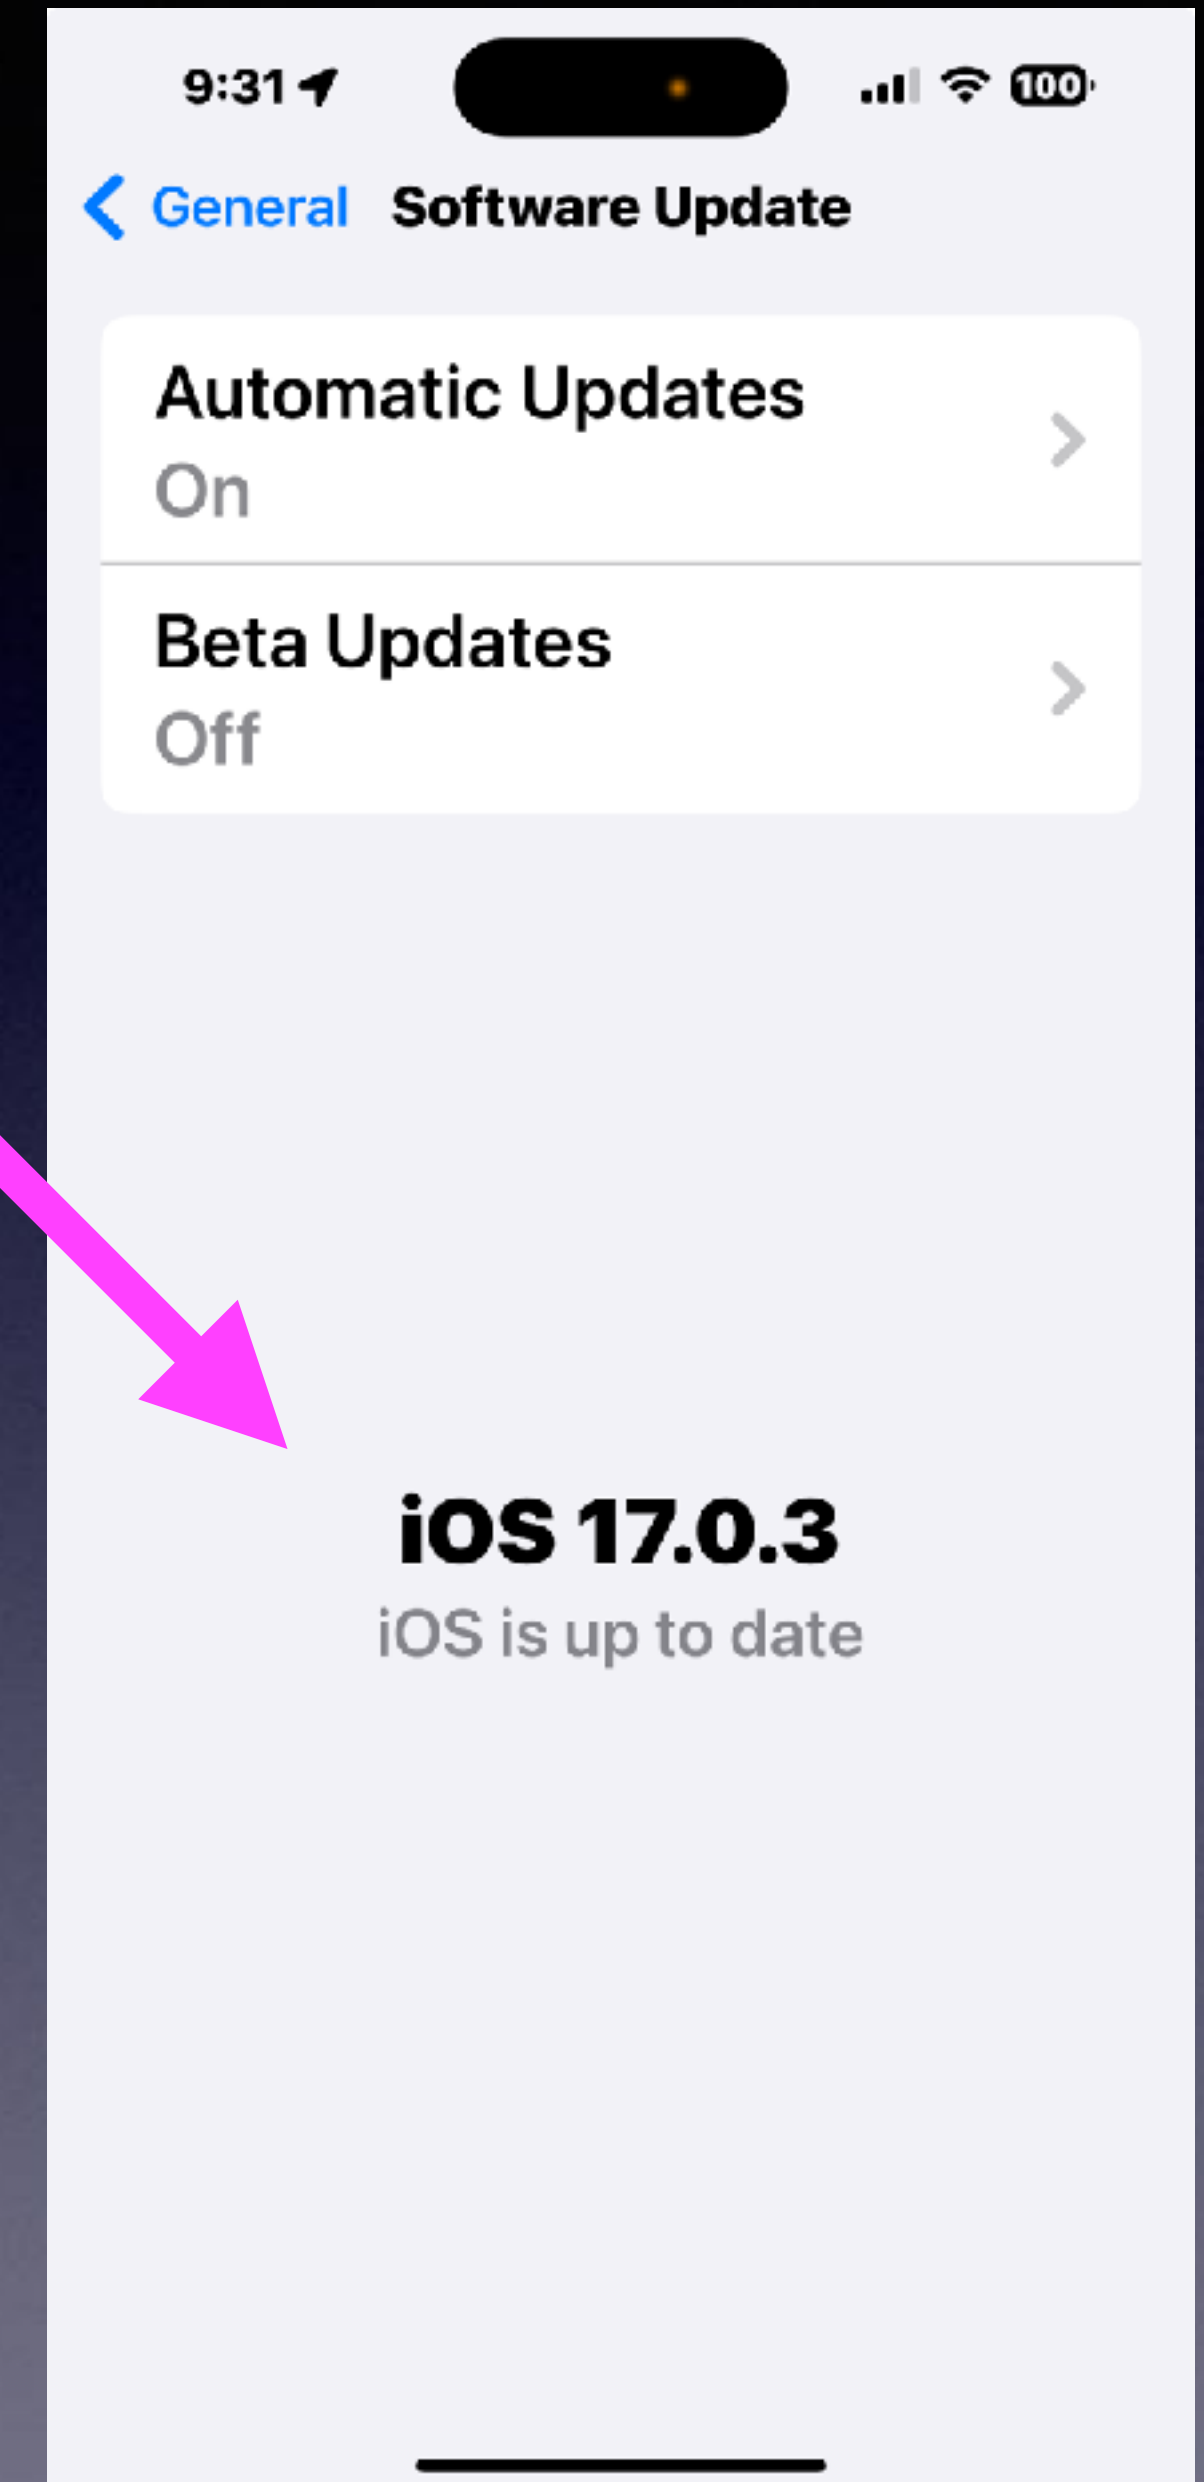

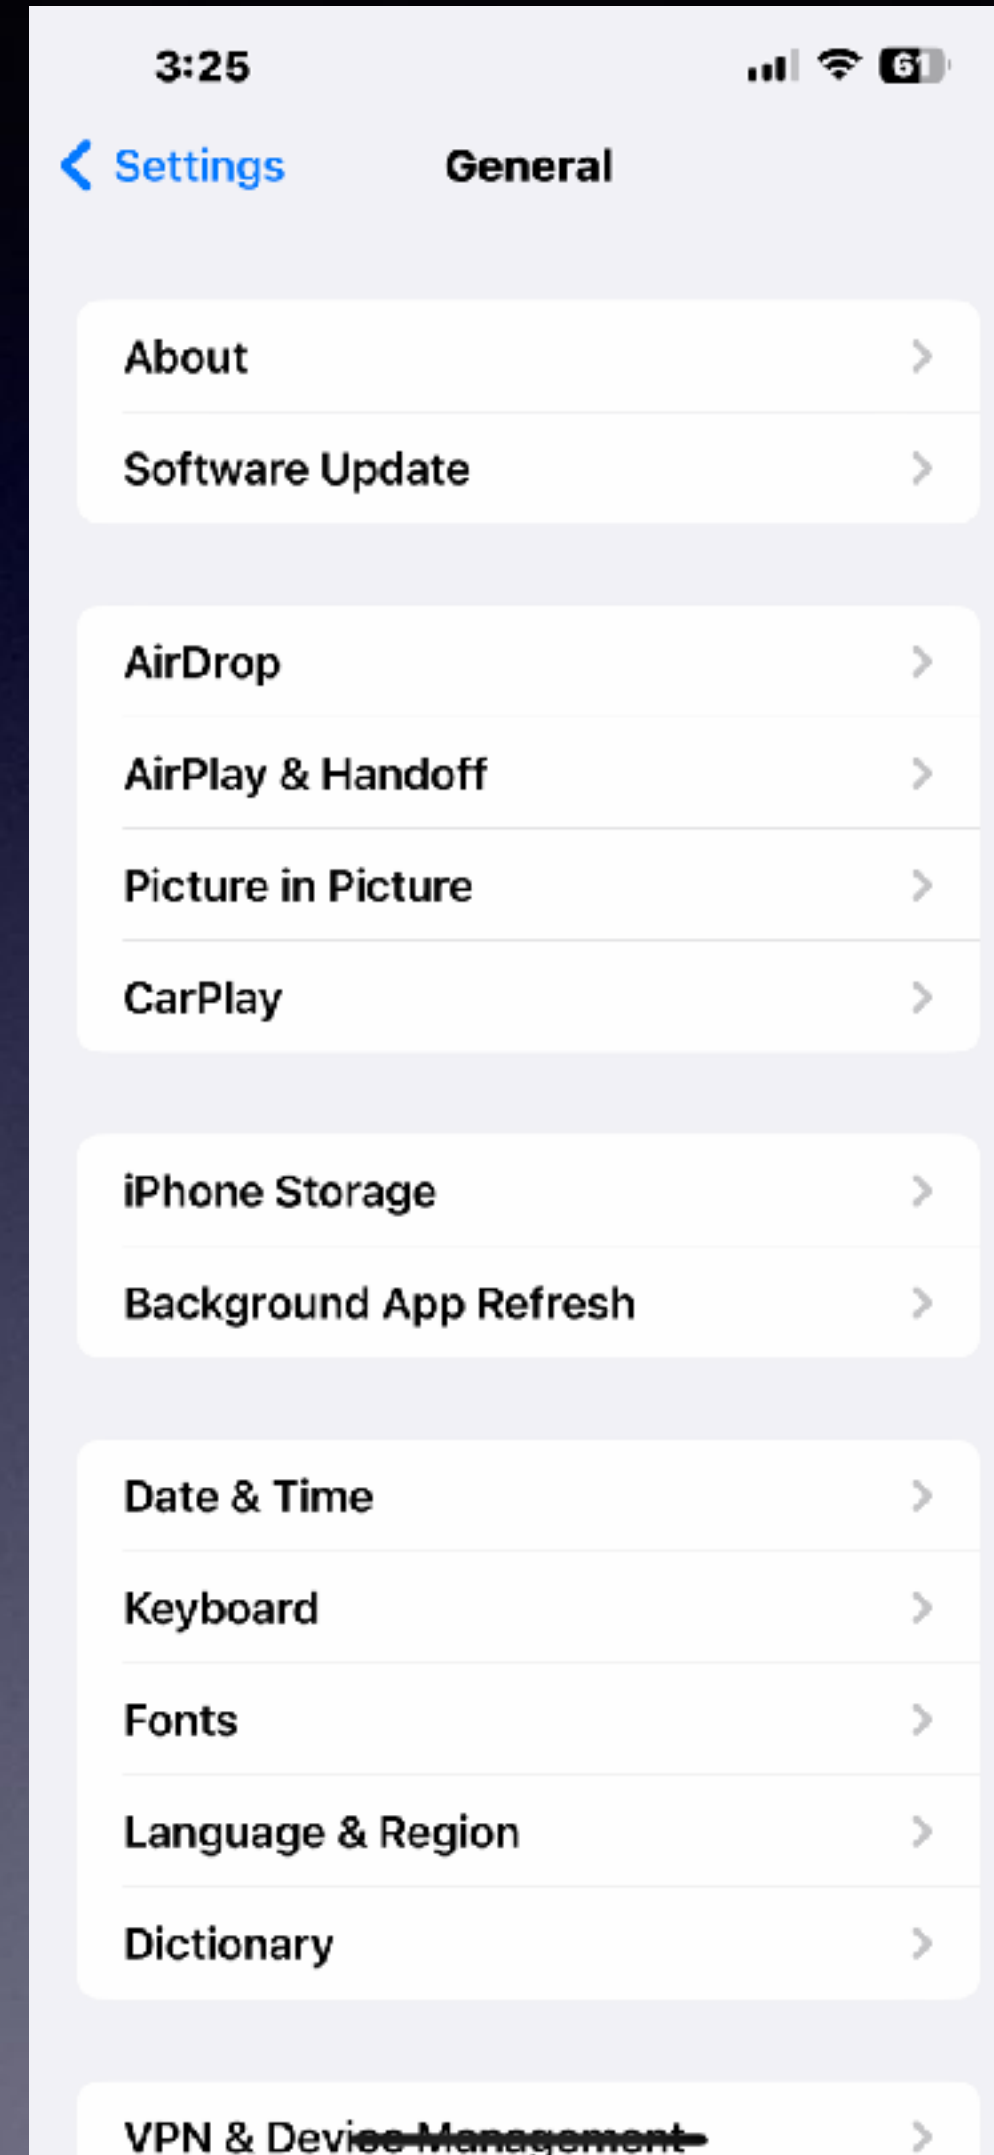

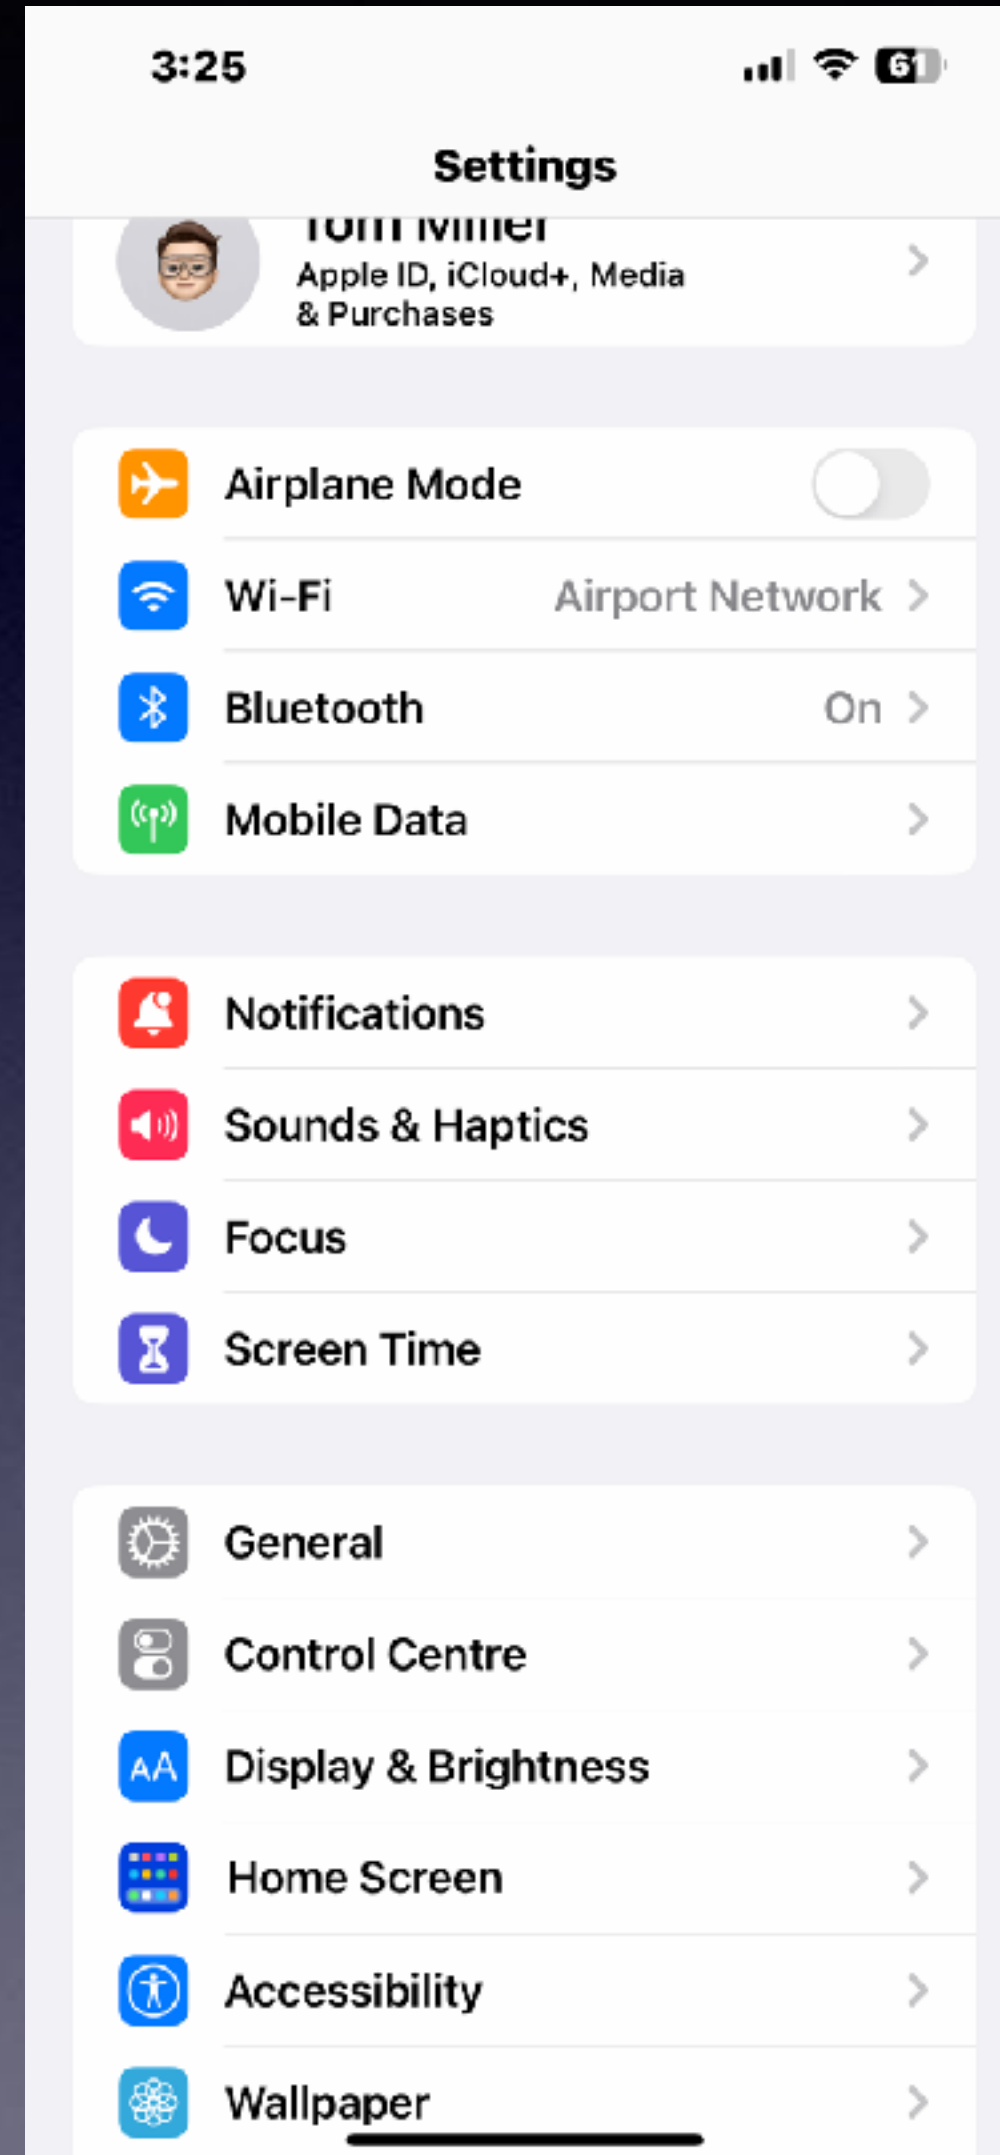

The update was unveiled after a major security vulnerability was discovered in the devices, but fixing up that hole with the new software update should keep those devices secure.

"Processing a maliciously crafted image may lead to arbitrary code execution," Apple confirmed on its security pages. "Apple is aware of a report that this issue may have been actively exploited."

# What Should Software Update Look Like?

Apple iPhone iOS 17.1  
will be out shortly.

We will have to update
