## **Prevent Google From Keeping Track Of Your Data!** Search: my Google activity.

Ç

### Activity controls

Your Location History and Web & App Activity can include info about your location, like places you've visited or where you've used a Google service. You can turn these settings off, see and delete your data, and choose an auto-delete option below. To learn how Google uses location information, go to g.co/privacypolicy/location.

The data saved in your account helps give you more personalized experiences across all Google services. Choose which settings will save data in your Google Account.

#### Web & App Activity

Saves your activity on Google sites and apps, including associated info like location, to give you faster searches, better recommendations, and more personalized experiences in Maps, Search, and other Google services. Learn more

### Screen Distance

7:59 🕻 7:09

To reduce eye strain and the risk of myopia in children, Screen Distance will alert you to hold an iPhone or iPad with Face ID at a recommended distance.

Screen Distance works by measuring the distance between the screen and your eyes. The camera is not capturing images or video, and the data collected remains on the device and is not shared with Apple.

#### Continue

**Not Now** 

7:59 \$7:25

### Works

Screen Distance encourages you to move your iPhone or iPad further away to support vision health.

### 0

#### **Viewing Distance**

iPhone or iPad should be held at a suggested distance of 12 inches from eyes.

### 0

#### **Screen Shield**

The shield reminds you to hold your device further away.

#### **Position Guide**

Once the device is moved to

# How Good Is Your Battery? Health?

ul 🗟 63

**Battery Health** 

**Battery Health** 

This iPhone battery is performing as expected. About Battery & Warranty...

### Maximum Capacity

This is a measure of battery capacity relative to when it was new. Lower capacity may result in fewer hours of usage between

### Cycle Count

This is the number of times iPhone has used your battery's capacity. Learn more...

Manufacture Date August 2023

### It charges fast for convenience and slow for longevity.

Your Apple lithium-ion battery uses fast charging to quickly reach 80% of its capacity, then switches to slower trickle charging. The amount of time it takes to reach that first 80% will vary depending on your settings and which device you're charging. Software may limit charging above 80% when the recommended battery temperatures are exceeded. This combined process not only lets you get out and about sooner, it also extends the lifespan of your battery.
